Final Requirements and User Story Traceability Record

The course supports parts of the intended journey, but the available evidence doesn't establish full delivery of the complete Task 73 stories. Three stories contain observed failures, while the remaining 17 have incomplete checks or unresolved dependencies.

Each of the stories are therefore recorded as Not Delivered in full. This includes work that functions in part but has not been fully demonstrated.

Student stories

User story	Priority and requirements	Delivery position and evidence
ST01 As a Student, I want to understand the course journey so I can start and resume learning.	P2 R01-R03/R06-R09	Home opens, but the required course guidance has not been confirmed. E01/E04/E07.
ST02 As a Student, I want to reach the correct activity and understand what is locked.	P2 R12-R13/R16	Selected links work, but mobile, keyboard, direct-link and return visits were not fully checked. E04-E06/E20/E23.
ST03 As a Student, I want to unlock modules by completing the approved learning requirements.	P1 R01-R03; E01	The tested sequence works, but approved completion rules and boundary cases remain unconfirmed. E05/E13/E20/E23/E28.
ST04 As a Student, I want to find the correct Teams session and its resources.	P2 R04; W01	A workshop session exists, but approved details, time zones and resources remain unverified. E31/E32/E36.
ST05 As a Student, I want to have an accurate attendance record that I cannot self-verify.	P1 R04-R05; W02-W05/Q01	Attendance was simulated; verified participation, permissions and exception rules were not demonstrated. E31-E36.
ST06 As a Student, I want to access assessment after completing all modules and any two qualifying workshops.	P1 R06; E01/Q01	One workshop remained blocked and W1+W2 allowed access, but the full eligibility matrix remains incomplete. E27/E30/E35-E38.
ST07 As a Student, I want to see accurate progress and my next step.	P1 R11/Q01	Learner indicators work on the tested path, but the Gradebook failure prevents full comparison. E15.
ST08 As a Student, I want to receive useful self-check feedback and retain my results.	P1 R03/R11	Saved attempts and Moodle Quiz work, but M1 H5P becomes blank when finished. E11-E29.
ST09 As an eligible Student, I want to submit optional formative work, receive feedback and revise my final submission.	P1 R07-R09; A01-A04	The grading failure prevented feedback and revision from being demonstrated. E39.

User story	Priority and requirements	Delivery position and evidence
ST10 As an eligible Student, I want to submit final work without the optional formative stage.	P1 R09; A04-A05	Final submission after the feedback deadline works, but the earlier submission route and staff retrieval remain unverified. E38/E39.
ST11 As a Student, I want to receive my correct final result privately at the approved time.	P1 R10; A08/Q01	The grading failure prevented final outcomes, privacy and release from being checked. E39.
ST12 As a Student, I want to use authorised extra time without changing other course requirements.	P1 R10; A06-A07	Individual extensions, deadline boundaries and authorised late cases were not tested. E38 only demonstrates one submission.

Remaining dependencies and scope

Completion rules and thresholds, verified attendance and exceptions, assessment dates and marking rules, and reporting permissions still don't have confirmed decisions.

The wider baseline also retains clean Academy reuse and content replacement (R14 – R15), supported branding (R12) and navigation/accessibility (R13). Their full delivery is not established by the local test. H5P and automated attendance are optional methods, but reliable self-checks and verified attendance remain required.

Facilitator and Teacher stories

User story	Priority and requirements	Delivery position and evidence
FT01 As an authorised Facilitator, I want to manage workshop details and record source-based attendance.	P1 R04-R05; W01-W02/W05	Staff attendance controls work, but verified source records and permission checks remain incomplete. E32-E37.
FT02 As an authorised Facilitator, I want to correct attendance and record traceable exceptions.	P1 R05; W04-W05	Corrections, distinguishable exceptions and their approval trail were not demonstrated.
FT03 As a Teacher, I want to support revision and retrieve the correct final work.	P1 R07-R09; A02-A05	The grading failure prevented feedback and retained revision history from being demonstrated. E39.
FT04 As an authorised Teacher, I want to mark and release accurate outcomes.	P1 R10; A08	The grading page does not load, so marking and release cannot be completed. E39.
FT05 As an authorised Facilitator, I want to grant extensions and permitted late access.	P1 R10; A06-A07	Individual extensions and permitted late access were not demonstrated.
FT06 As an authorised Teacher, I want to view reliable learner progress and attempts.	P1 R11; G11-G13	Activity attempts match learner results, but the course Gradebook remains unavailable. E15/E21/E24/E29.

User story	Priority and requirements	Delivery position and evidence
FT07 As a Teacher with agreed editing rights, I want to maintain supported H5P/Quiz content.	P1 R03/R11	Teacher creation or replacement of H5P/Quiz content was not demonstrated.
FT08 As an authorised Teacher, I want to find course learners within approved role boundaries.	P2 R11-R13	Names and roles display, but approved visibility, actions and access boundaries remain unverified. E02/E03.

Sources

Task 63 Final Requirements Baseline supplies R01 – R16;

Task 64 Workshop Attendance and Assessment Criteria supplies the W, E, A and Q references.

Task 73 Condensed Baseline v1.2 supplies the story wording.

Priorities follow the Task 54 gap register: P1 is required before full acceptance; P2 covers presentation and UX, with essential access problems treated as P1.

Results come from Task 74 Final Functional Acceptance Record Completed and its evidence.
