Final User Stories and Acceptance Baseline

Student user stories

ST01 Course Home

As a Student, I want to understand the course journey so I can start and resume learning.

Pass conditions:

1. A fresh learner can open Home and M1; Home explains three sequential modules, matching workshops, assessment routes and the eligibility rule.
2. Start/resume links and facilitator information are findable and agree with the approved course flow.

Trace: R01-R03/R06-R09.

ST02 Navigation

As a Student, I want to reach the correct activity and understand what is locked.

Pass conditions:

1. Course links, breadcrumbs and provided Previous/Next controls work without bypassing restrictions; lock messages identify unmet conditions and remain truthful after unlocking.
2. Saved state survives relogin; the essential journey works on agreed desktop/mobile/browser configurations and with keyboard focus.

Trace: R12-R13/R16; Week 1 D7.

ST03 Module progression

As a Student, I want to unlock modules by completing the approved learning requirements.

Pass conditions:

1. M1 starts open; M2 requires approved M1 completion and M3 requires approved preceding completion. Missing items/no attempt/below-threshold results remain incomplete; an approved threshold is tested at its boundary.
2. All modules can be completed with only two workshops attended; Student access and saved completion agree.

Trace: R01-R03; E01.

ST04 Workshop information

As a Student, I want to find the correct Teams session and its resources.

Pass conditions:

1. W1-W3 match M1-M3 with approved labels, dates, duration, zone, join links and applicable resources/recordings; no setup placeholders remain.
2. Course/calendar entries identify the same session and convert correctly in Melbourne and a second agreed time zone.

Trace: R04; W01; Week 1 D6.

ST05 Verified attendance

As a Student, I want to have an accurate attendance record that I cannot self-verify.

Pass conditions:

1. My status matches the authorised source/staff record; opening links, recordings or Done controls cannot independently qualify attendance, and Student-only accounts cannot record or override it.
2. Duplicates/rejoins/multiple W1 sessions count as at most one distinct workshop. Late/Excused/unverified states follow confirmed policy.

Trace: R04-R05; W02-W05/Q01.

ST06 Assessment eligibility

As a Student, I want to access assessment after completing all modules and any two qualifying workshops.

Pass conditions:

1. Both formative and direct-final routes enforce M1 AND M2 AND M3 AND ((W1 AND W2) OR (W1 AND W3) OR (W2 AND W3)), including direct URLs.
2. With all modules complete, 0/each single workshop blocks and each pair/all three qualifies. With each module individually incomplete, every pair/all three blocks. Duplicate or unverified attendance cannot substitute.

Trace: R06; E01/Q01; Week 1 D1.

Student assessment and tracking stories

ST07 Progress and completion

As a Student, I want to see accurate progress and my next step.

Pass conditions:

1. Own activity/module/course completion agrees with approved events and staff records after the agreed update interval and relogin.
2. Eligibility, submission, awaiting marking, release and completion are distinguishable; ungraded/withheld is not Fail and unverified attendance is not confirmed absence. Other learners remain unaffected.

Trace: R11/Q01.

ST08 H5P and Moodle Quiz

As a Student, I want to receive useful self-check feedback and retain my results.

Pass conditions:

1. Delivered H5P renders; correct/incorrect feedback and approved retries work. Finished attempts, grades, approved completion and next-module access persist and match staff records, including applicable threshold boundaries.
2. The native Moodle Quiz alternative is actually attempted with feedback, saved results, reporting and approved progression; installed availability alone is insufficient.

Trace: R03/R11; Week 1 D5 regression.

ST09 Formative feedback and revision

As an eligible Student, I want to submit optional formative work, receive feedback and revise my final submission.

Pass conditions:

1. Instructions/criteria and soft/hard dates agree with settings. Formative submission identifies learner/file/time, triggers the required staff alert and provides learner feedback/notification without releasing a summative grade.
2. The learner revises and submits identifiable final work by the applicable deadline; staff retrieve both required stages/history. An editable upload alone is not proof.

Trace: R07-R09; A01-A04; Week 1 D2.

ST10 Direct final submission

As an eligible Student, I want to submit final work without the optional formative stage.

Pass conditions:

1. Separate fresh learners can submit before the soft date and between soft/hard dates, without a prior draft, feedback or waiting period.
2. Staff retrieve the correct learner/file/time as final work awaiting marking; marking does not introduce an unapproved revision cycle.

Trace: R09; A04-A05.

ST11 Final outcome and release

As a Student, I want to receive my correct final result privately at the approved time.

Pass conditions:

1. One final Pass and Fail match the approved standard. Withheld summative grades/final feedback remain unavailable through assignment, grades and notifications until authorised release.
2. After release only the correct learner and authorised staff access the result/feedback, with required notifications. Formative feedback remains usable; ungraded is not Fail.

Trace: R10; A08/Q01; Week 1 D3.

ST12 Extensions and late permission

As a Student, I want to use authorised extra time without changing other course requirements.

Pass conditions:

1. Actual submission follows approved before/at/after original and extended boundaries; an unextended control retains the original rule. Hard extensions do not automatically extend soft feedback or waive eligibility.
2. An authorised post-cutoff case remains submittable and markable without late penalty/date-only failure. Unauthorised late handling follows confirmed policy.

Trace: R10; A06-A07.

Facilitator and Teacher user stories

FT01 Workshop and attendance records

As an authorised Facilitator, I want to manage workshop details and record source-based attendance.

Pass conditions:

1. Approved source records map to the correct learner/session and persist; missing or ambiguous records do not qualify. A supported Teams integration or verified report plus manual staff recording is acceptable.
2. Permissions, duplicate counting and Student/staff views meet ST04-ST06.

Trace: R04-R05; W01-W02/W05.

FT02 Attendance corrections and exceptions

As an authorised Facilitator, I want to correct attendance and record traceable exceptions.

Pass conditions:

1. The agreed record identifies learner/workshop, authoriser and reason/source; exceptions are distinguishable from actual attendance, with no Student override access.
2. Saved corrections update eligibility for the correct learner under confirmed policy; later corrections do not invent automatic submission cancellation or grade reversal.

Trace: R05; W04-W05; Week 1 D4.

FT03 Feedback and final work

As a Teacher, I want to support revision and retrieve the correct final work.

Pass conditions:

1. Alerts, feedback/reopening and retained stage history support ST09 without requiring a formative summative grade.
2. Revised-final and both direct-final cases identify the correct learner/file/time/stage and agree with Student views.

Trace: R07-R09; A02-A05.

FT04 Marking and release

As an authorised Teacher, I want to mark and release accurate outcomes.

Pass conditions:

1. Staff retrieve final work, mark approved Pass/Fail examples and control release.
2. Saved marks remain withheld until the agreed trigger; released results/feedback/notifications and privacy meet ST11 and match reports.

Trace: R10; A08.

FT05 Individual discretion

As an authorised Facilitator, I want to grant extensions and permitted late access.

Pass conditions:

1. Only authorised staff can grant the correct learner a saved extension/late permission.
2. Actual submissions, original/extended boundaries, control learner and markability meet ST12 without changing soft feedback or eligibility.

Trace: R10; A06-A07.

FT06 Tracking and reporting

As an authorised Teacher, I want to view reliable learner progress and attempts.

Pass conditions:

1. Agreed completion, attendance, H5P/Quiz attempts, submissions and grades show accurate incomplete/completed and attempted/unattempted states, matched with Student evidence.
2. Original Attempts and Gradebook issues are retested; required reporting or an agreed supported alternative works with approved fields, audience and update interval.

Trace: R11; G11-G13.

FT07 Self-check maintenance

As a Teacher with agreed editing rights, I want to maintain supported H5P/Quiz content.

Pass conditions:

1. The actual editing role creates/replaces representative H5P content and proves feedback, attempts, grades and progression still meet ST08.
2. A usable native Quiz alternative and activation/content handoff are demonstrated; missing libraries/permissions are recorded as dependencies.

Trace: R03/R11; relevant R14-R15 editing permissions.

FT08 Participants

As an authorised Teacher, I want to find course learners within approved role boundaries.

Pass conditions:

1. Native Participants access, membership/role information and required actions work; Student visibility, identity fields and any exports follow approved permissions.
2. Participants/navigation changes preserve the core journeys. No new redesign, tabs, broad export or analytics are assumed.

Trace: R11-R13; approved UX handoff.
