

Card Task 38: Configure sequential completion/restricted access and the visible progress pattern; capture Student-view evidence of lock/unlock behaviour

By: Reshan Lahandapura (Dev 1)

Documentation Creation Date: 19/09/2026

Site: <https://academy.open-publishing.org/login/index.php>

Each of the content configured has placeholder text, none of it is tied to a specific course as it is supposed to be a general re usable template that course creators change around to fit their course content, this was made as a seperate course and any of the current existing OAPA content courses are not altered

Module 1 Sequential Progression configuration proof

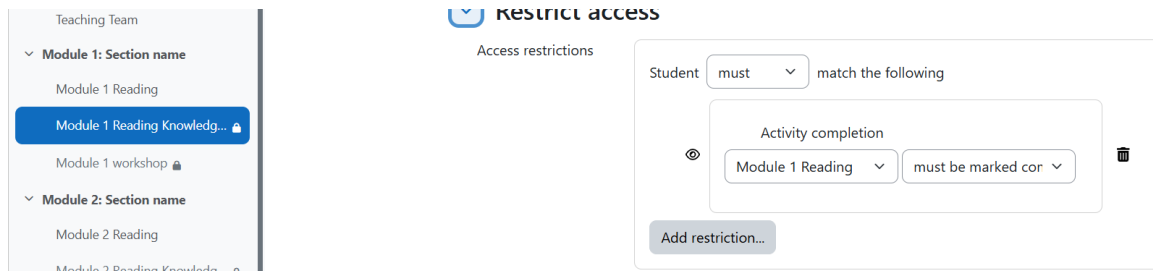

Module reading 1 configuration

The applied conditions are that students have to mark the reading as done, this is required as a requirement for future content in module 1 in order for them to be accesses

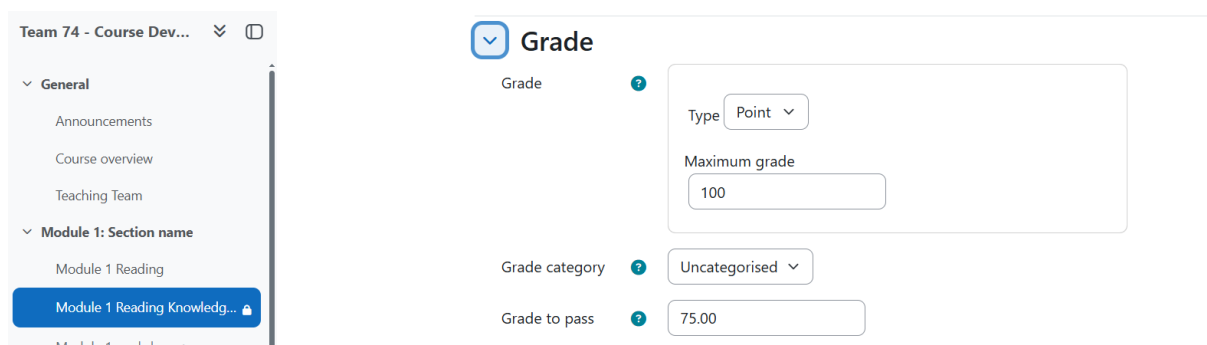

The screenshot shows the OAPA Academy dashboard. On the left, a sidebar menu lists various sections: General (Announcements, Course overview, Teaching Team), Module 1: Section name (Module 1 Reading, Module 1 Reading Knowledge..., Module 1 workshop), and Module 2: Section name (Module 2 Reading, Module 2 Reading Knowledge...). The 'Module 1 Reading' item is selected and highlighted in blue. The main content area displays the configuration for this module. It includes a text input field with the placeholder 'p', a word count of '2 words', and a 'Build with tinyMCE' button. Below this is a checkbox for 'Display description on course page'. The configuration is organized into sections: Appearance, Common module settings, Restrict access, and Completion conditions. The 'Completion conditions' section is expanded, showing three options: 'None', 'Students must manually mark the activity as done' (which is selected), and 'Add requirements'. At the bottom, there is a 'Set reminder in Timeline' section with an 'Enable' checkbox and a date/time picker set to '19 September 2026 04:36'.

Module 1 reading knowledge check configuration

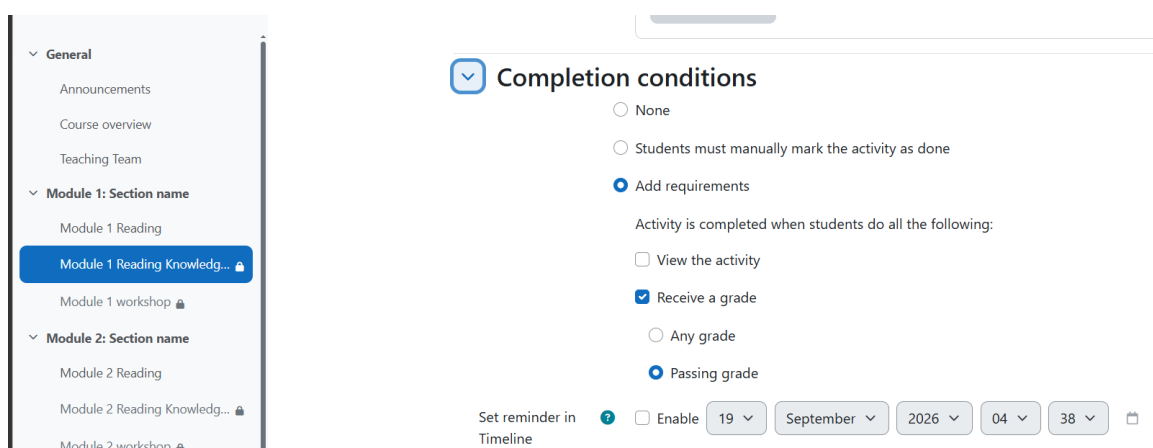

The restriction conditions are that Module 1 must be marked as complete, this ensures that module 1 cannot be skipped and has to be completed before being able to access this part

The required pass grade is set to 75%, this is set in completion conditions as a requirement for this piece of content to be counted as a pass so students cant just not do the quiz or get a low score and pass

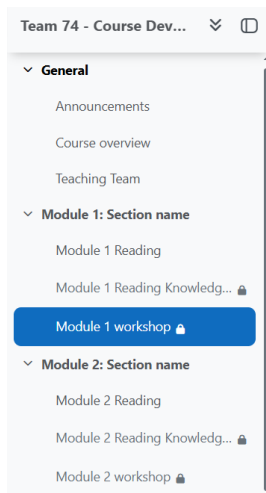

As referred above, completion conditions are set to having the user requiring a pass grade for them to be able to continue

Module 1 workshop configuration

The restrict access settings are configured so that module 1 reading AND the module quiz 1 is required for it to be accessed ensuring that those two content MUST be completed first before accessing this

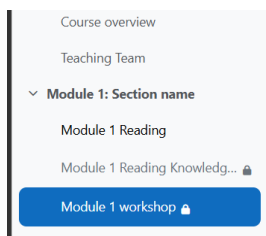

Restrict access

Access restrictions

Student must match all of the following

- Activity completion
 - Module 1 Reading must be marked cor
- and
 - Grade
 - Module 1 Reading K
 - ☒ must be ≥ 75 %
 - ☐ must be < %

Completion settings is set to mark as done meaning they must access the content and mark it as done before moving on

Completion conditions

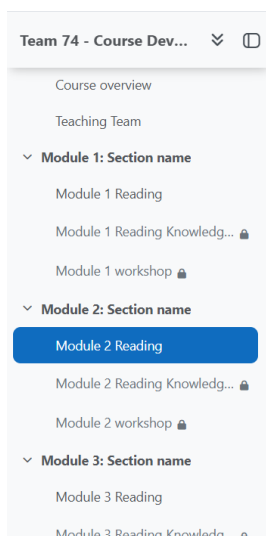

☐ None
☒ Students must manually mark the activity as done
☐ Add requirements

Set reminder in Timeline ☐ Enable 19 September 2026 04 43

Module 2 Sequential Progression configuration proof

Module 2 reading configuration

Restrict access settings is set so BOTH module 1 reading and module 1 quiz must be passed in order for this to be accessed, online workshop attendance is optional so it is not a requirement

Restrict access

Access restrictions

Student must match all of the following

- Activity completion

- correct test answer 1
- correct test answer 4

2/4 Show solution Retry

With me getting 50% which is under 75% it still does not mark me as complete and module 2 reading is still locked meaning restrictions still work as intended

- Module 1 knowledge check for successful completion on successfull test

The screenshot shows a course completion interface. On the left, a sidebar lists course sections: General (Announcements, Course overview, Teaching Team), Module 1: Section name (Module 1 Reading, **Module 1 Reading Knowledge...**, Module 1 workshop), and Module 2: Section name (Module 2 Reading, Module 2 Reading Knowledge..., Module 2 workshop). The main area displays a 'Knowledge Check' with 'Completion requirements' (Receive a grade, Receive a passing grade). Below, it says 'Select the correct answers' and lists five items: 'false test answer 5' (greyed out) and four 'correct test answer' items (green bars, each with a '+1' score). A progress bar at the bottom shows a full green bar and a star icon with '4/4'.

As expected on a pass, I get given a pass grade and the workshop gets unlocked as well as the module 2

Module 2 Access testing

- Module 2 access without finishing module 1 reading and passing the module 1 knowledge check:

The screenshot shows a course page for 'Team 74 - Course Dev...'. The sidebar lists sections: Module 1: Section name (Module 1 Reading, Module 1 Reading Knowledge..., Module 1 workshop), **Module 2: Section name** (Module 2 Reading, Module 2 Reading Knowledge..., Module 2 workshop), and Module 3: Section name (Module 3 Reading, Module 3 Reading Knowledge...). The main area shows 'Module 2: Section name' with three activities: 'Module 2 Reading' (locked, 'Not available unless: The activity Module 1 Reading is marked complete, You achieve higher than a certain score in Module 1 Reading Knowledge Check'), 'Module 2 Reading Knowledge Check' (locked, 'Not available unless: The activity Module 2 Reading is marked complete'), and 'Module 2 workshop' (locked, 'Not available unless: The activity Module 2 Reading is marked complete ...').

As shown, due to module 1 reading not finished and having the expected grade, module 2 cannot be accesses

- Module 2 access with successfull module 1 reading and quiz passed results

- ✓ correct test answer 2 (+1)

4/4

As expected, module is 2 is not accessible

For this module and module 3 all the rest of the content have the same restrictions so testing for quiz passing to access the workshop will result in the same results therefore I will not be doing redundant testing for those

Module 3 Access testing

- Module 3 access without finishing module 2 reading and passing the module 2 knowledge check:

 Module 3 Reading Knowledge Check

 Not available unless: The activity **Module 3 Reading** is marked complete

 Module 3 workshop

 Not available unless: The activity **Module 3 Reading** is marked complete ... Show more

As expected the module 3 is not unlocked with only reading as the others require reading to be done, For this module all the rest of the content have the same restrictions as module 1 and 2 so testing for quiz passing to access the workshop will result in the same results therefore I will not be doing redundant testing for those

 - The activity **Module 2 workshop** is marked complete
 - The activity **Module 3 workshop** is marked complete

Show less

As expected, it is locked as neither 2 combos have been done

- Attempting to access the assessment with only 1 workshop completed

The screenshot shows the OAPA Academy dashboard for a student. On the left, a sidebar lists the course structure: Team 74 - Course Dev..., Module 1: Section name (with Reading, Knowledge, and workshop items), Module 2: Section name (with Reading, Knowledge, and workshop items), Module 3: Section name (highlighted in blue), and Assessment. The main content area shows three sections: 'Module 2 workshop' (locked with a message about Module 2 Reading Knowledge), 'Module 3: Section name' (containing 'Module 3 Reading' (locked), 'Module 3 Reading Knowledge Check' (locked with a message about Module 3 Reading), and 'Module 3 workshop' (locked with a message about Module 3 Reading)), and 'Assesment' (containing an 'Assignment' with dates: Opened: Saturday, 19 September 2026, 12:00 AM; Due: Saturday, 26 September 2026, 12:00 AM).

As expected it is still locked and not accessible

- Testing access with 2 workshops marked as completed

The screenshot shows the OAPA Academy dashboard for a student, now with two workshops marked as completed. The sidebar is the same, but the 'Assesment' section is highlighted in blue. The main content area shows the 'Assignment' details: 'Opened: Saturday, 19 September 2026, 12:00 AM' and 'Due: Saturday, 26 September 2026, 12:00 AM'. Below this is a text input field 'Enter Assignment details here' and a blue 'Add submission' button. A 'Submission status' section contains a table with the following data:

Submission status	No submissions have been made yet
Grading status	Not graded
Time remaining	6 days 15 hours remaining
Last modified	-
Submission comments	> Comments (0)

As expected the assesment is now accessible now that atleast 2 workshops have been marked as done

Limitations

- While I set the workshops to be marked as done to be completed, OAPA holds live workshops and since I do not know how that attendance is tracked I cannot properly set a condition to pass that as complete until I know that so the manual marking as student is something there in place of it
