

Note; THIS WAS ALL DONE ON THE TEST MOODLE SITE SAME AS WHERE THIS REUSABLE TEMPLATE WAS ORINALLY CREATED, next sprint these will be on the OAPA moodle however it is NOT currently on the OAPA moodle

Re testing of module by module restrictions

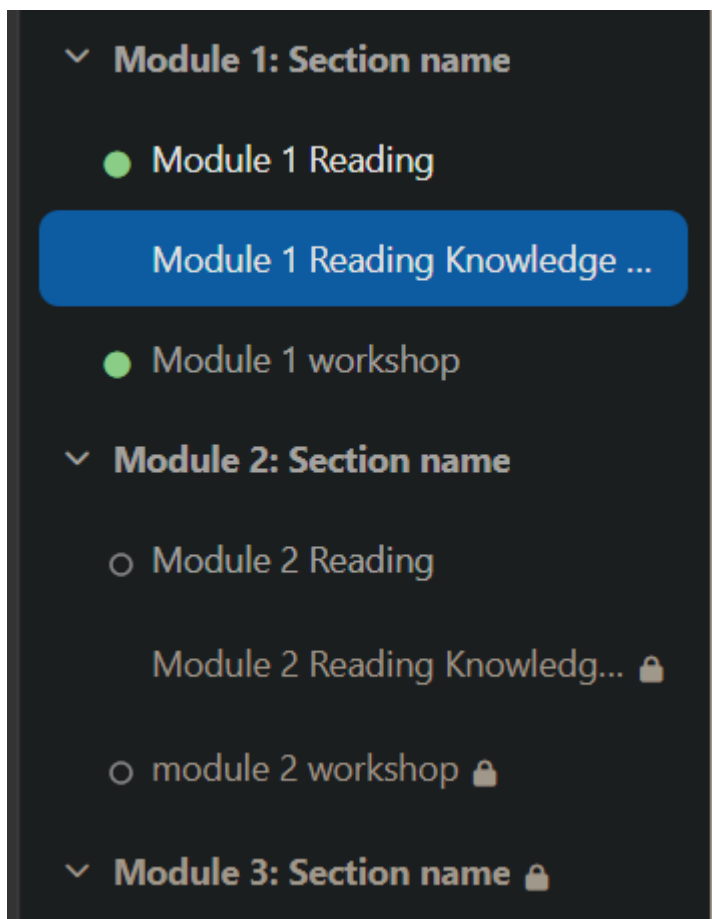

- Module 1 incomplete, module 2 and 3 inaccessible

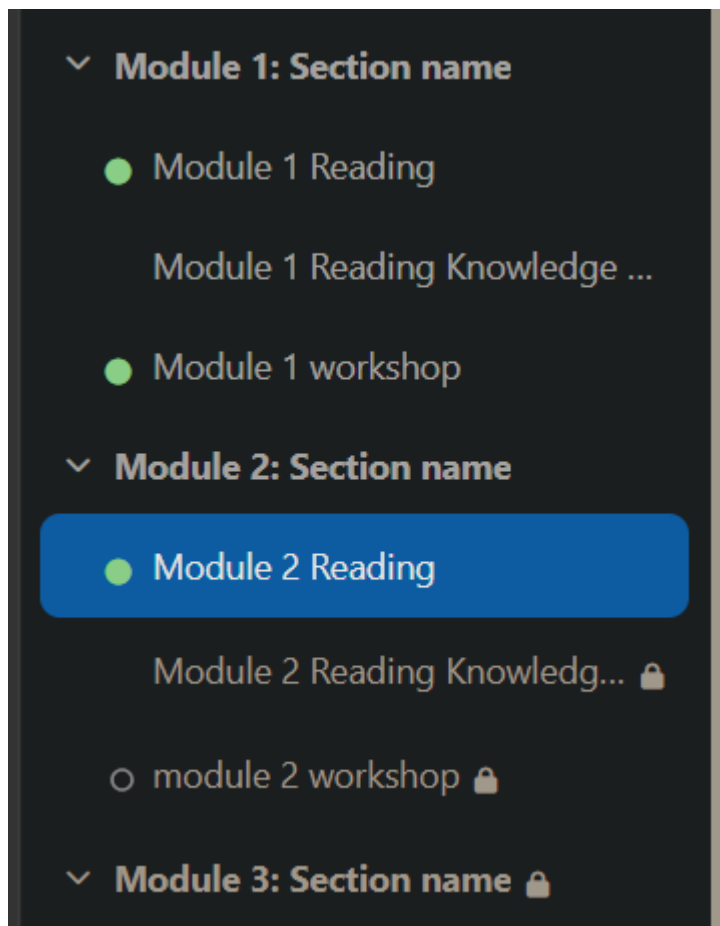

- Module 1 partially complete however not fully complete so module 2 cannot still be accessed ensuring no content can be skipped

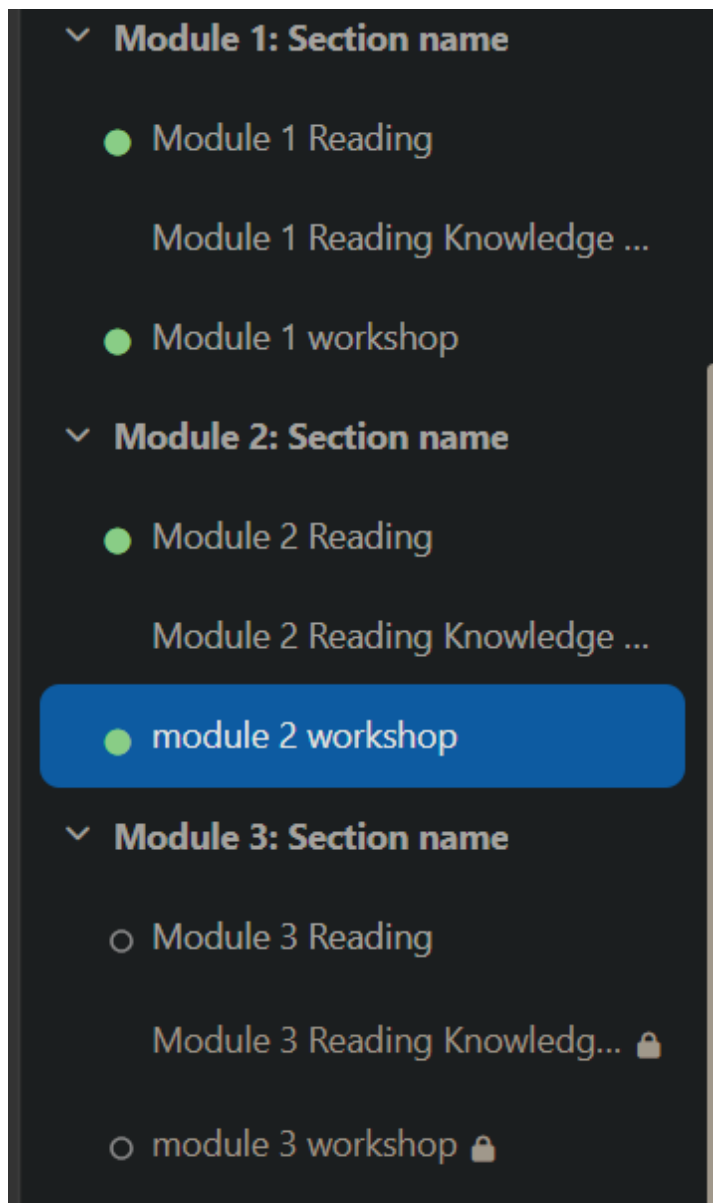

- Module 1 fully complete, Module 2 now accessible however module 3 locked as module 2 hasnt been completed

- Module 1 fully complere however Module 2 partially complete however not fully complete so module 3 cannot still be accessed ensuring no content can be skipped

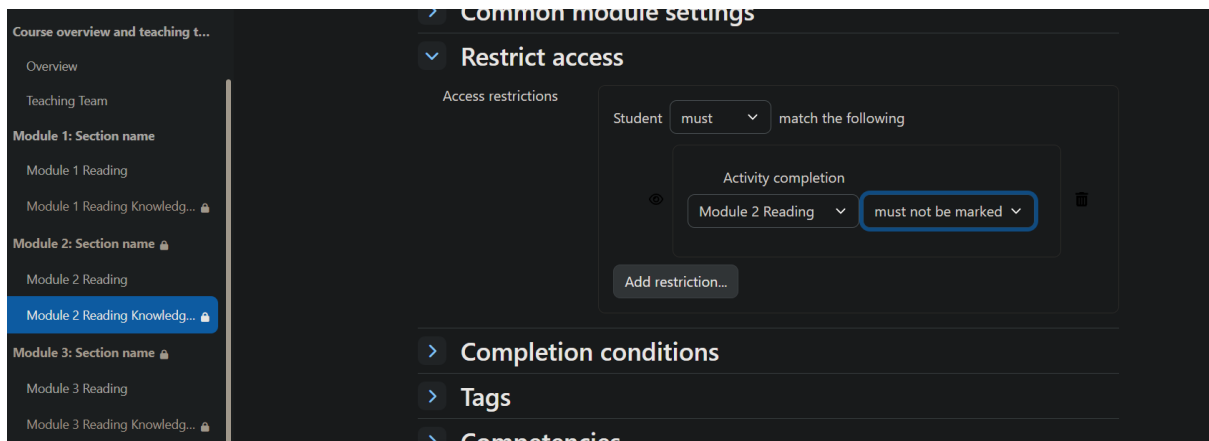

- Module 1 and 2 fully complete, module 3 finally accessible after previous modules have been fully completed

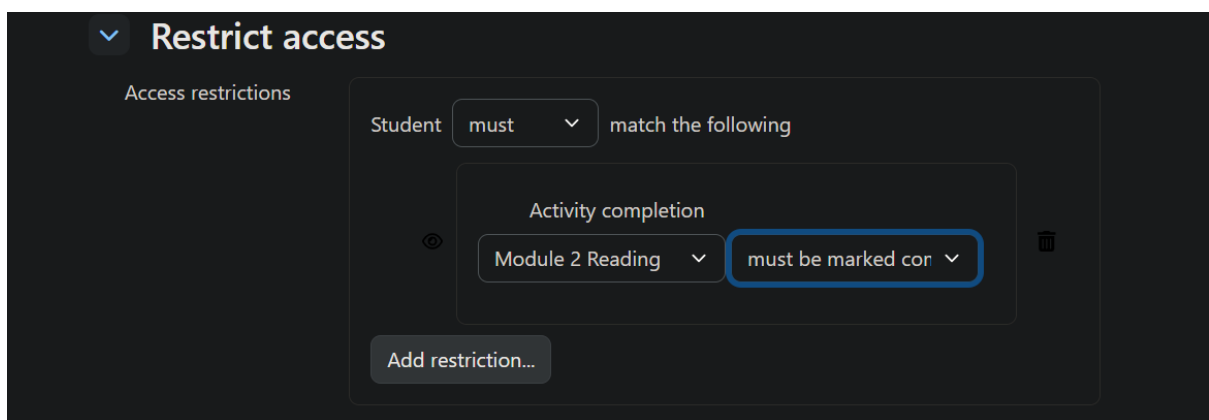

ISSUES and FIXES PROOF

Issue: Module 2 knowledge check has incorrect restriction set

- Module 2's Knowledge Check has its unlock condition backwards, says "is incomplete" when it should say "is marked complete" (see Fig 12). This one fully blocks Module 2 right now, probably the most important one to fix first.

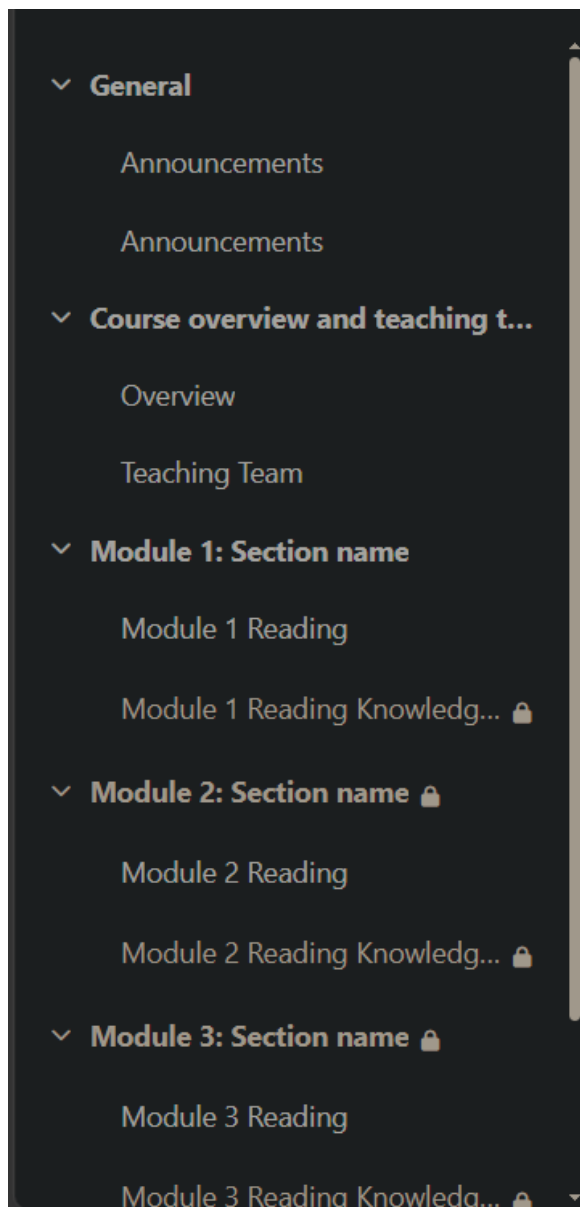

Fixed Issue

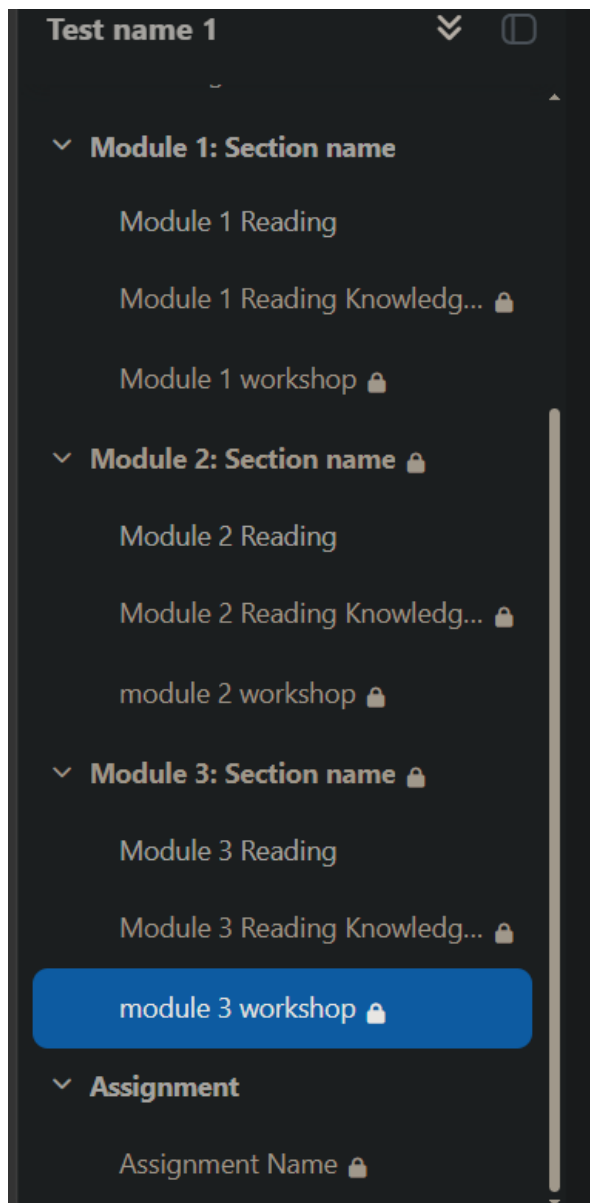

Issue 2: Missing workshops and missing dependency on assignment on them:

- ~~Missing with reason:~~ Assessment requiring 2 of 3 workshops: expected this to be a condition. It isn't there at all. Fail, needs to be added.
- Original with missing workshops

Fixed Issue:

- Added Workshops

- Setting the restriction modules to have module 1 and 2 workshop marked as complete (in this case this is proof of attendance)

OAPA Verification status

We were given course editing permissions to currently existing course how ever not course creating access itself so because of this, the reusable course template cannot be added to the existing oapa moodle however in the next sprint after requesting such access this will be moved the OAPA moodle asap.
