

NOTE: this was NOT done on the OAPA moodle but a different one I made to design this due to the OAPA moodle not letting me create any courses, the link to my one is the following:

<https://localtestsite.moodlecloud.com/>

Steps to carry out as a course creator to use the template feature to enable course importing without starting creating courses from scratch

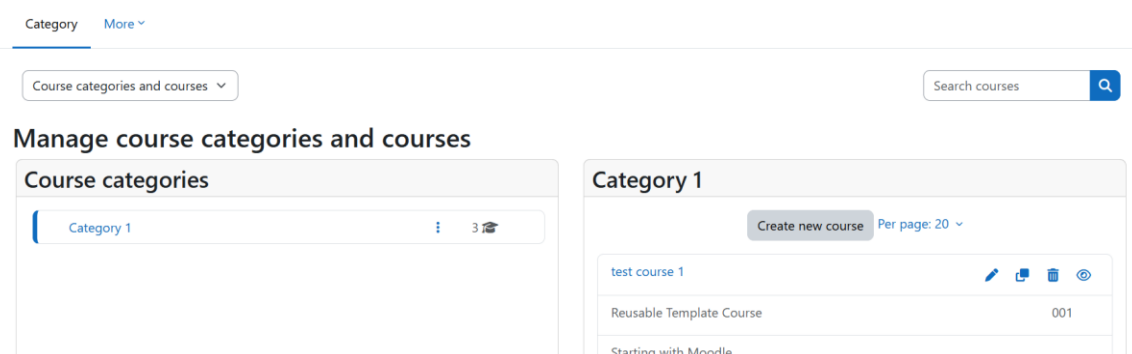

Step 1: Create the course

When logging in as course creator, the following will be seen:

- 1.1) Go go site administration and click “manage courses and categories”

Category 1

- 1.2) Click “Create new course” and set required names

Category 1

Category [More](#) ▾

Add a new course

Exp

LIMITATIONS

- The courses created from the template document will reflect the format of the original version of the template course, any changes made to the course template after will not update the courses made from the template course before the change was made so if you want to update their structure it will have to be manually updated within the course you want to change
- This process cannot be automated, it is purely a manual process
