Team 74, Sprint 3, Week 2, Task 79

Branding, Navigation and Accessibility Defect Closure Evidence

Name	Shaikh Zarin Tasnim, Developer 2
Project	Building an Editor Academy Moodle platform (Team A)
Date	18 October 2026
Environment	Local Docker Moodle 5.3, Boost theme, "Test Course" (course 2) and its restored copy (course 4). Nothing was changed on the live Academy.

Summary

This week I closed the branding, navigation and accessibility items that were mine from the Week 1 testing, Walaa's Week 1 handoff and Walaa's Week 2 audit. Everything is done with Moodle's own settings (Raw SCSS, Additional HTML and section text), so no core code or plugin was added. The only thing I could not fix is the blue Check button inside H5P, which is written up in section 6 with the setting an OAPA admin would use.

Item	Source	Status
D7 locked/unlocked wording	Week 1 testing	Fixed
D9 logo size	Week 1 testing	Closed, approved by Walaa
Green completion indicators	Walaa, Week 2 audit	Fixed
Previous / Next as buttons, no sticky bar	Walaa, Week 2 audit	Fixed
Quizzes and Assignments tabs instead of Activities	Walaa, Week 1 handoff	Fixed
Tab row stays at the top when scrolling	Walaa, Week 1 handoff	Fixed
Left panel closed on tabs that are not the course	UX audit, 3 Sep	Fixed
Dark mode icons and colours	Client feedback	Fixed
Participants page to match the mock-ups	Walaa mock-ups	Done (Task 80)
D10 H5P blue Check button	Week 1 testing	Known limit, fallback ready

1. D7: misleading locked/unlocked messages

Modules 2 to 4 used to say "Locked until..." in their summary, and the text stayed after the module opened. I changed each summary to say what unlocks it, so it is true in both states, for example "Unlocked by passing the Module 1 Quiz with 80% or more." While a module is still locked, Moodle's own restriction box shows under it. I made the same change in the restored copy so the template stays the same.

s1only (Module 2 open) **s3all (Module 4 open)**

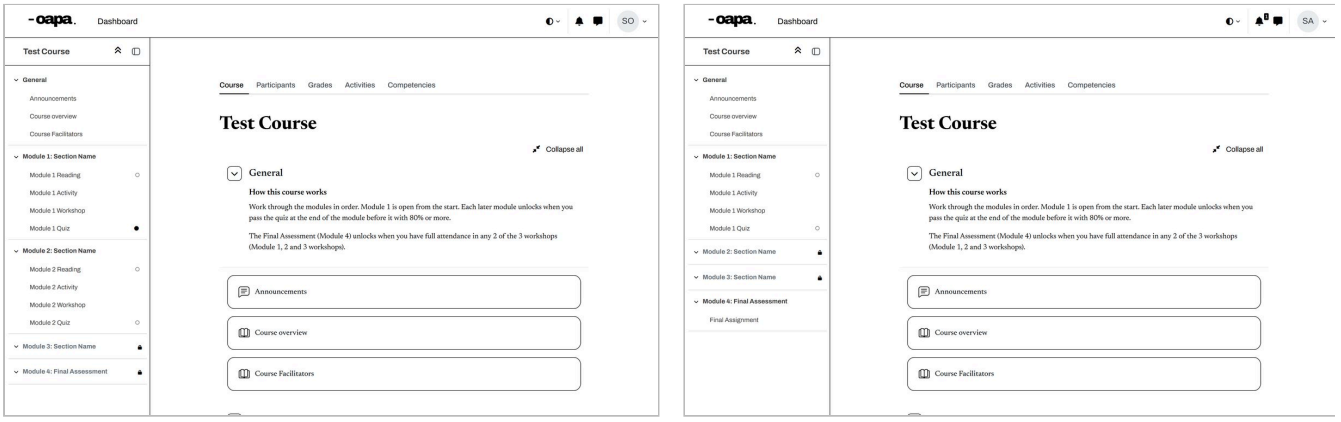

Figure 1. The new wording reads right for a student who has opened the module and for one who has not.

2. D9: logo size

The logo is 104 px wide, the same as Walaa's mock-up. The Brand Book minimum is 220 px, so I left it for Walaa to decide. In the Week 2 audit Walaa wrote that the OAPA logo "is implemented neatly", so I closed D9 and kept 104 px. If it ever needs to change, it is one variable in the SCSS (`$oapa-logo-width`).

3. Walaa's Week 2 audit

Completion indicators. Walaa found that finished items turned black, but the client meeting agreed on green. Finished items in the left panel now show a green dot, and the "Done" button gets a green outline, green tick and green text. I added one colour variable for it (dark green in light mode, a lighter green in dark mode) and used it nowhere else, so the rest of the site stays black and white. I kept Done as an outline so Next is still the one filled button on the page.

Previous and Next. Moodle 5 shows these in a bar fixed to the bottom of the screen, which covered the page. They are now normal buttons under the content, as in mock-up 3: Previous outlined on the left, Next filled in black on the right, and "Mark as done" next to Next. All three are 44 px tall and use the same font. On a phone they do not fit in one row, so "Mark as done" goes full width on top and Previous and Next share the row under it. The links and the completion button are still Moodle's own, I only changed where and how they show.

Light **Dark**

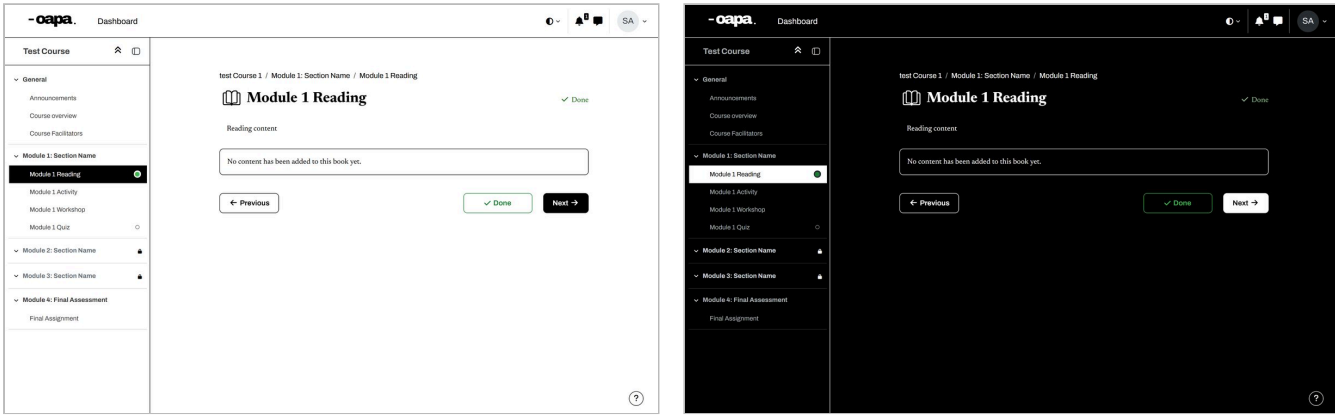

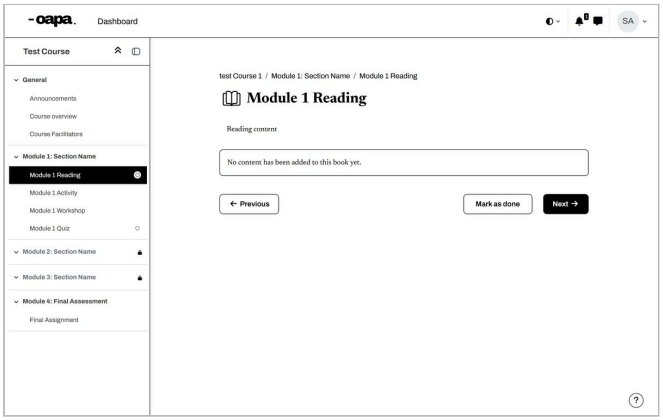

Figure 2. Module 1 Reading after "Mark as done". Green dot in the left panel, green Done outline, Previous and Next under the content.

Not done yet

Phone, 390 px

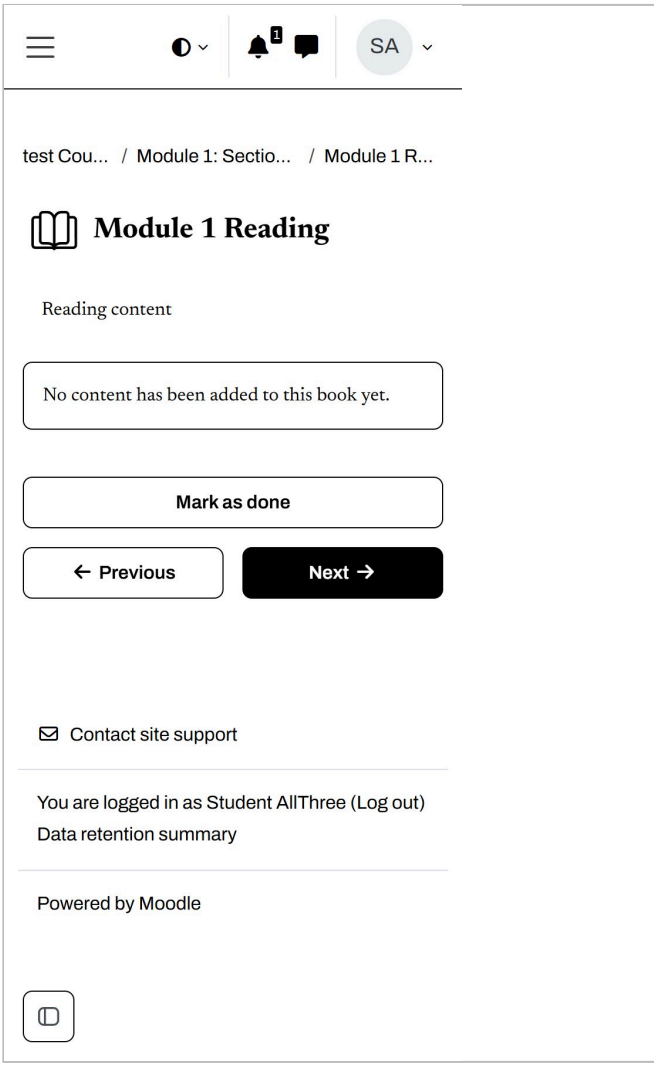

Figure 3. Before marking it done, and the same buttons on a phone.

I tested "Mark as done" as s3all and then undid it, so the test data is the same as before.

4. Course tabs and left panel

These three were on Walaa's Week 1 handoff list. I first thought the tabs needed a plugin, but Moodle builds the tab row from data on the page before its own scripts run, so a short script in Additional HTML can change it.

- **Quizzes and Assignments:** the tab row now reads Course, Participants, Quizzes, Assignments, Grades, Competencies, the same as mock-up 1. Both tabs open Moodle's own activity overview, filtered to H5P quizzes and quizzes, or to assignments, with the heading changed to match. Teachers get their own line under the heading (student attempts, submissions to grade). The Activities tab is gone.
- **Sticky tabs:** the tab row stays under the header when you scroll a long course page, and it sits at the same height on every course page.
- **Left panel:** it starts closed on Participants, Quizzes, Assignments and Grades, and stays open on the course page and inside activities. The button to open it is still there, and the page content now starts after that button so it never covers the title.

Quizzes tab, student

Assignments tab, teacher

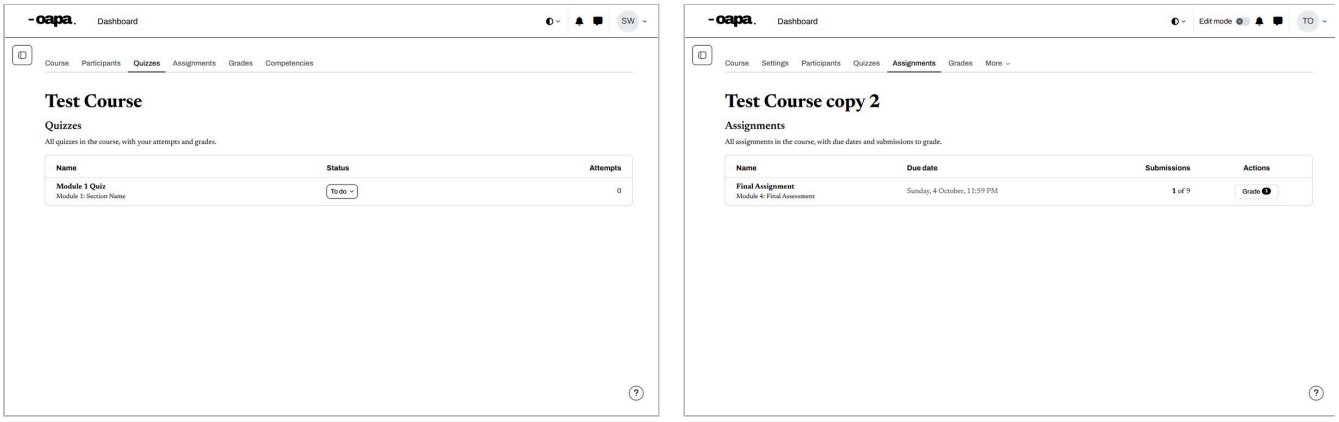

Figure 4. The two new tabs, with the left panel closed.

Course page scrolled

Phone, dark

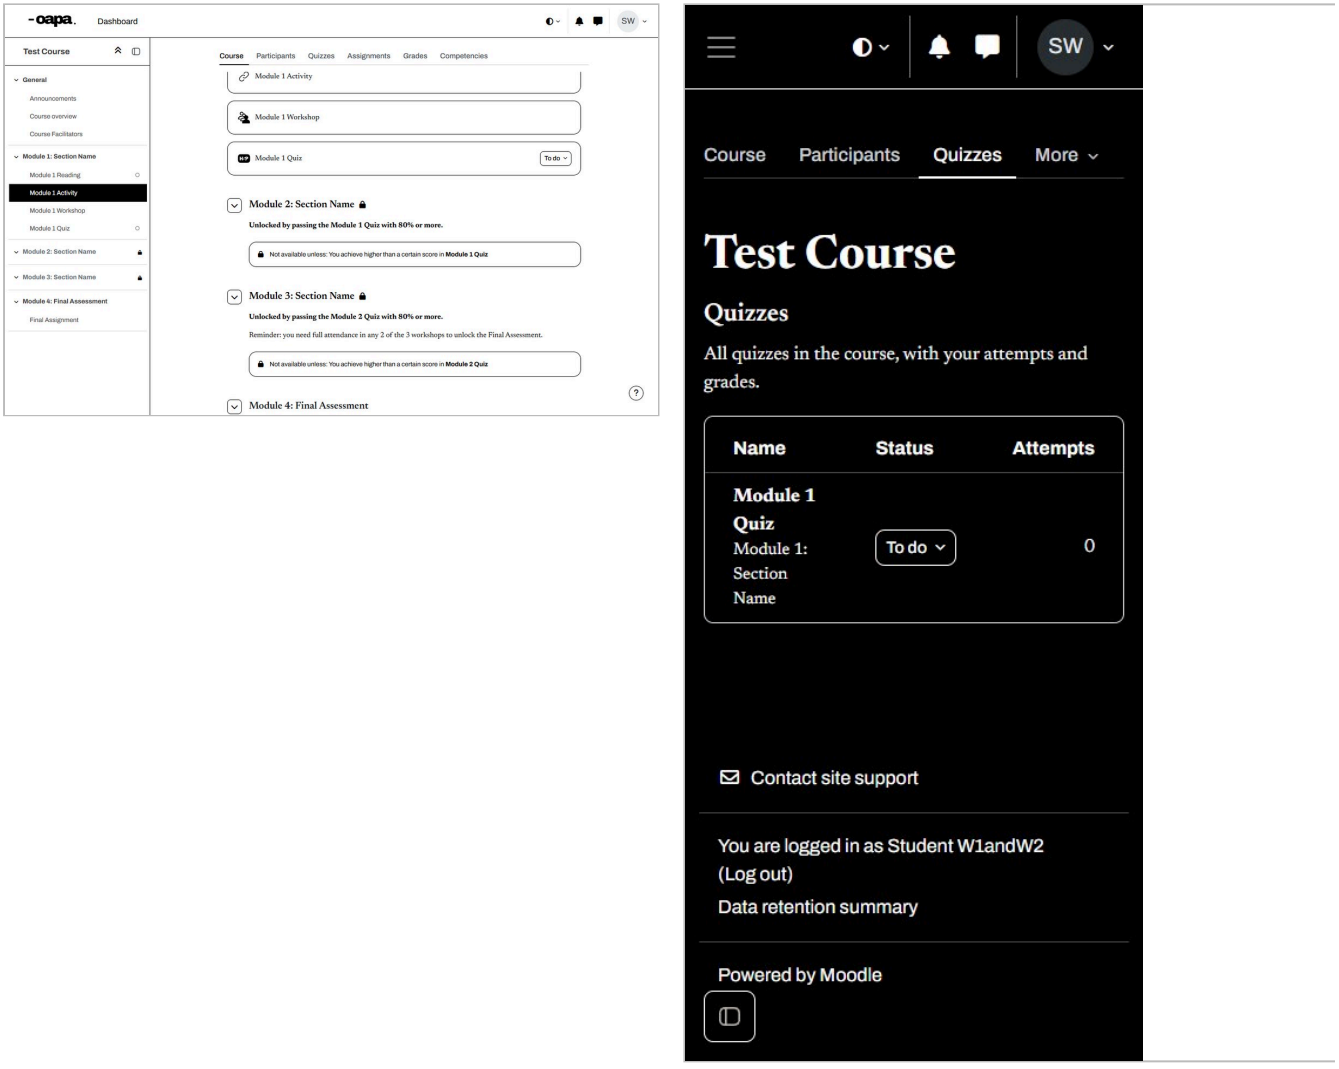

Figure 5. The tab row stays at the top while scrolling. On a phone the extra tabs go under "More".

I checked all of this with a script that opens each tab as s2w12 and reads the tab names, the active tab, whether the panel is open and where the tab row sits after scrolling. There were no script errors on any page.

5. Dark mode and other fixes

In dark mode the icons were black on black, the left panel text was greyed out, the logo was a white box and the course cards stayed white. Every colour now comes from a small set of light/dark variables, so dark mode is white on black everywhere and icons follow the text colour.

Before **After**

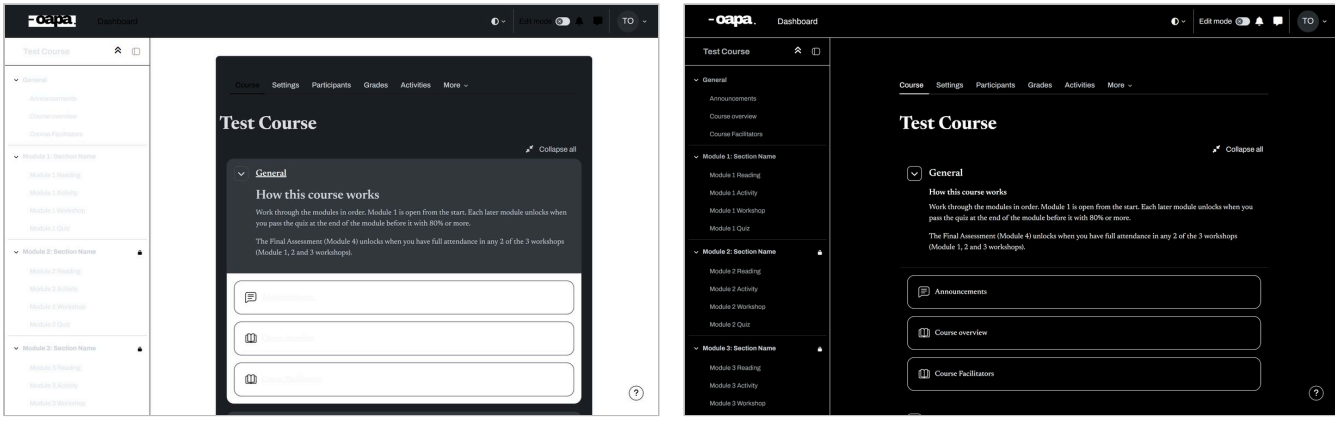

Figure 6. Course page in dark mode as teacher1.

- **Alignment:** the title, tab row and content start at the same edge on every course page.
- **Borders:** search boxes, selects and tick boxes use the 1 px black border from the Brand Book.
- **One main button per view:** on the teacher Participants page only "Enrol users" is filled.
- **Notification count:** black and white instead of red.
- **Grades:** the item icons and the empty grades picture are grey instead of blue.
- **Focus and labels:** inputs get a 2 px outline on focus, and the search and sort controls have proper labels.
- **Phones:** 16 px side margins, no sideways scrolling at 390 px, and the panel button no longer covers the footer.

The accessibility numbers (heights, outlines, labels) are in evidence/task80/checks/accessibility-probe.txt.

6. Limits and OAPA admin steps

Item	Why	What is needed
H5P Check button stays blue (D10)	It is inside the H5P iframe, so site CSS cannot reach it	OAPA admin: Site administration > H5P > H5P settings, custom styles. Or use the native quiz fallback (Task 80).
Same changes on the live site	I only have the local copy	OAPA admin pastes the same Raw SCSS and Additional HTML from our repo. It is one step.

7. Regression

After all changes I ran the gate check again for seven test students on both courses. The result is the same as Week 1, so my changes did not affect the unlock rules, completion or grades.

Student	Module 2	Module 3	Module 4
s0none	locked	locked	locked
s1only	open	locked	locked
s2w12, s2w13, s2w23, s3all	locked	locked	open
s2late	locked	locked	locked

Module 4 opening while Modules 2 and 3 are locked is D1. Reshan fixed it on the shared site in Task 78. My local copy still has the old course settings, so it shows here. I will re-check it on the shared site.

8. Defect status

ID	Defect	Owner	Status
D1	Module 4 rule only checks workshops	Reshan	Fixed in Task 78, to re-check
D2	Final Assignment allows 1 attempt only	Reshan	Fixed in Task 78, to re-check
D3	Marking workflow off	Reshan	Fixed in Task 78, to re-check
D4	Attendance override looks like real attendance	Reshan, Riley	Open
D5	H5P grade not saved	Zarin	Closed in Week 1
D6	Workshop has no real date and time	Reshan	Open
D7	"Locked until..." shown after unlock	Zarin	Fixed
D8	Modules still called "Section Name"	Content owner	Open
D9	Logo 104 px vs Brand Book 220 px	Walaa	Closed, 104 px approved
D10	H5P blue Check button	Zarin	Known limit
