Task 70: Sprint 3 Week 1 Cross-Test and H5P Quality Closeout Report

Name Shaikh Zarin Tasnim, Developer 2
Team Team 74, OAPA Editor Academy (Moodle)
Sprint Sprint 3 Week 1
Date 11 Oct 2026. I tested from Tashkent (UTC+5). The Moodle site uses Melbourne time.
Build Local Docker Moodle 5.3.0 from the S4090860/Local-Moodle repo. It has the restored "test Course 1" backup, the Attendance plugin and our OAPA branding.
Criteria Riley's "Workshop Attendance and Assessment Implementation Criteria" (E01, W03, W04, W05, A01 to A08, Q02)

Summary

I tested Dev 1's workshop attendance setup myself. I used seven student accounts for the main tests, and two more (s1w2, s1w3) for the W2 only and W3 only cases. Each has a different workshop pattern. I also used the teacher account. I wanted to check that the 2 out of 3 workshop rule really works, that the final assessment is set up the way Riley's criteria ask, and that the H5P quizzes work.

What works:

- The 2 out of 3 rule works in all 8 workshop cases. No workshops, or only W1, only W2 or only W3, is blocked. Any pair, or all three, is allowed.
- Joining W1 twice does not count as a second workshop.
- A teacher can give one student an extension, and a student can upload a real file as their final submission.
- The H5P quiz works. In my retest in a normal browser, the quiz saved a grade of 100, marked itself complete and opened Module 2.
- The branding follows Walaa's mock-ups where Moodle allows it (details in my Task 69 report).

What does not work yet:

- The Module 4 gate only checks workshops. It does not check that Modules 1 to 3 are done, so a student can reach the final assessment early (E01).
- The assignment allows only 1 attempt, so a student cannot revise after feedback (A03).
- Marking workflow is off, so students see grades as soon as they are saved (A08).

The Late/Excused student stays blocked because Late and Excused only count as half. I have left this for Riley to decide under policy D-03. I have not called it a pass or a fail.

I also tested the last open cases myself: W2 only and W3 only (both blocked, as expected), a duplicate W1 join (W05, still counts as one workshop), an extension for one student (A06) and a real file upload (A04). All four passed. A few edge cases are still not tested, and I list them in the test log.

Result per checklist item

#	Item	Criteria	Result
1	Independent test of Dev 1's workshop attendance	E01, Q02	**PASS**
2	0 / 1 / 2 / 3 workshop states	E01	**PASS**
3	Several 2 of 3 combinations	E01, W05	**PASS**
4	Assessment access	E01, A01	**PARTIAL (D1)**

#	Item	Criteria	Result
5	Soft feedback and revision	A03	**FAIL (D2)**
6	Direct final submission	A04, A05, A06, A07	**PASS (date boundary tests still open)**
7	Branding against the UX handoff	Brand	**PASS**
8	Branding against the Brand Book	Brand	**PARTIAL (D9)**
9	Navigation regression	-	**PASS**
10	Student evidence	Q02	**PASS**
11	Teacher evidence	Q02, W04	**PASS (W04 open, D4)**
12	H5P create and render	-	**PASS**
13	H5P answer feedback	-	**PASS**
14	H5P results and completion	-	**PASS**
15	Staff reporting and Gradebook limits	A08	**PARTIAL (D3)**
16	Moodle Quiz fallback	-	**PASS (tested in Sprint 2, still available)**

Test setup

The course "test Course 1" has four modules:

- Module 1 is open from the start.
- Module 2 opens when the student scores 80% or more on the Module 1 Quiz.
- Module 3 opens when the student scores 80% or more on the Module 2 Quiz.
- Module 4 (Final Assessment) opens when the student has 100% in any two of the three workshops.

Each workshop is an Attendance activity with one session. Present is worth 2 points, Late 1, Excused 1 and Absent 0. So only Present gives 100%. Students cannot mark their own attendance, because the "students can mark" setting is off.

Account	W1	W2	W3	Starting state
s0none	Absent	-	-	No workshops, no quizzes done
s1only	Present	-	-	One workshop only
s2w12	Present	Present	-	W1 and W2
s2w13	Present	-	Present	W1 and W3
s2w23	Absent	Present	Present	W2 and W3
s3all	Present	Present	Present	All three
s2late	Late	Excused	Absent	Two workshops, but one Late and one Excused (50% each)
s1w2	Absent	Present	Absent	W2 only (added later in the day)
s1w3	Absent	Absent	Present	W3 only (added later in the day)

I tested on the restored backup of Reshan's course in our isolated local copy. Reshan's Task 68 report was tested on his own local site and shows extensions, rubric marking, feedback comments and grade notification working there. So some settings on his site may be different from the backup I tested. D1 to D3 are about the backup I tested, and Reshan should check them against his current site.

At the start, no student had done any module quiz, so Modules 2 and 3 were locked for everyone. The teacher account is teacher1. I took attendance for every student as teacher1, through the Attendance plugin. The test passwords are in TEST-ACCOUNTS.md and I have not copied them here.

1. Independent test of Dev 1's workshop attendance

What I tested: I logged in as each of the students and opened Module 4. Then I logged in as the teacher and looked at the attendance report and the grader report. I did not change Dev 1's setup before testing.

Why: the gate should be checked by someone who did not build it.

Result: PASS. The gate does what its settings say. The attendance report matches the grades the gate uses.

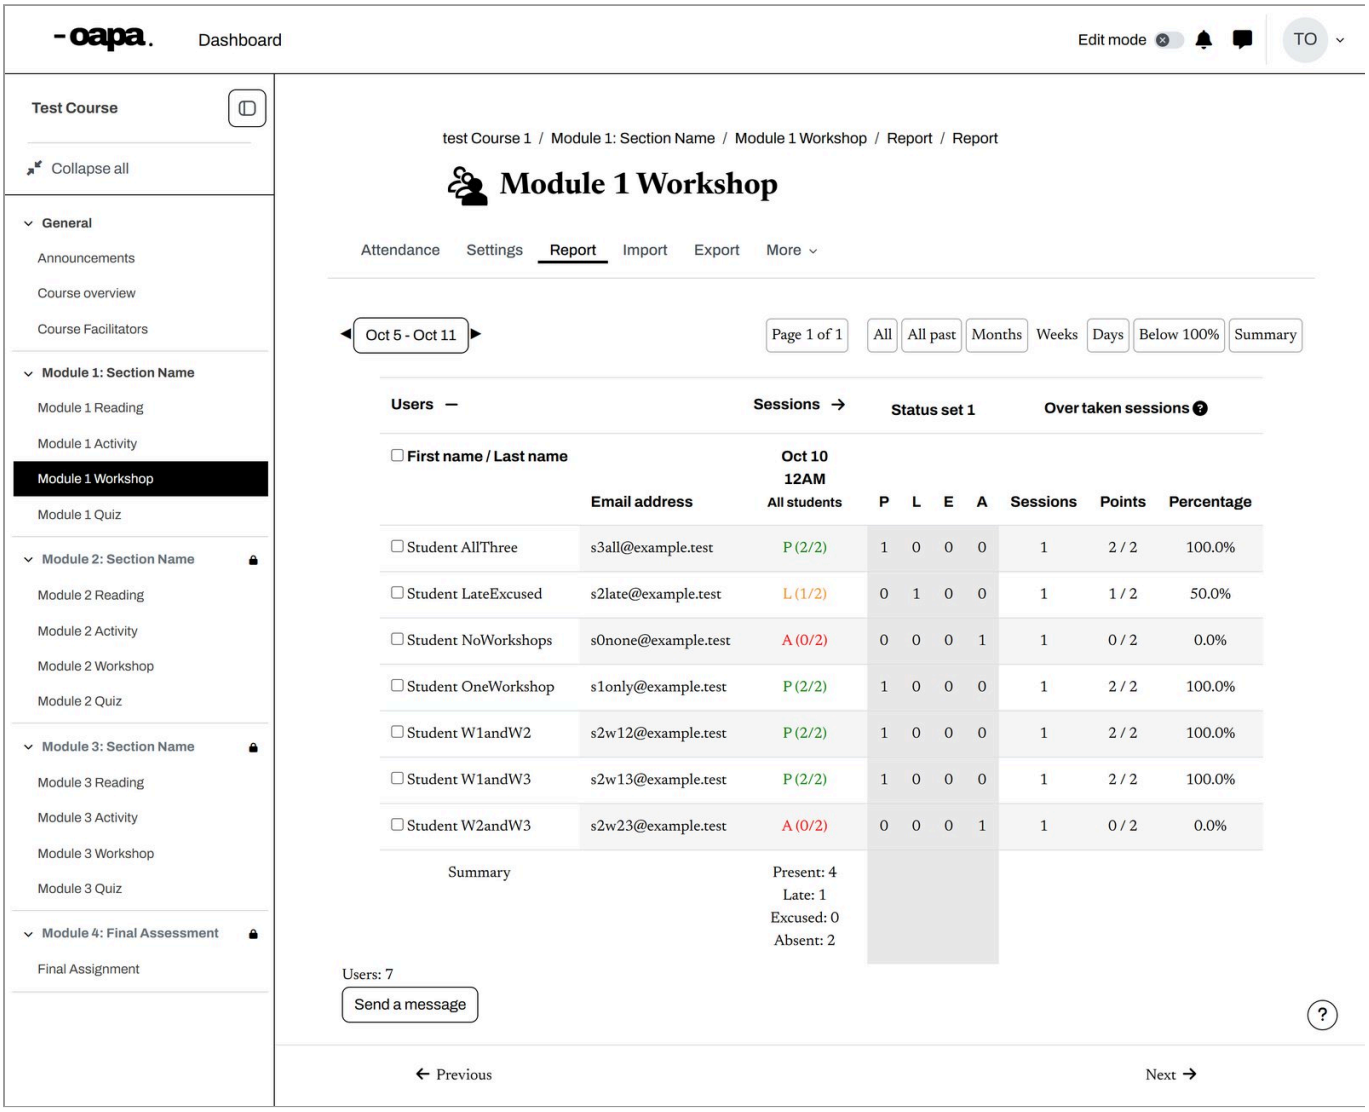

Figure 1. Teacher view of the Module 1 Workshop attendance report. It shows P, L, E or A for each student and the percentage the gate uses.

2. The 0 / 1 / 2 / 3 states

What I tested: I opened Module 4 as a student with 0 workshops (s0none), 1 workshop (s1only), 2 workshops (s2w12) and 3 workshops (s3all).

Result: PASS. With 0 or 1 workshops, Module 4 is blocked and shows a "Not available unless" message. With 2 or 3, the Final Assignment shows.

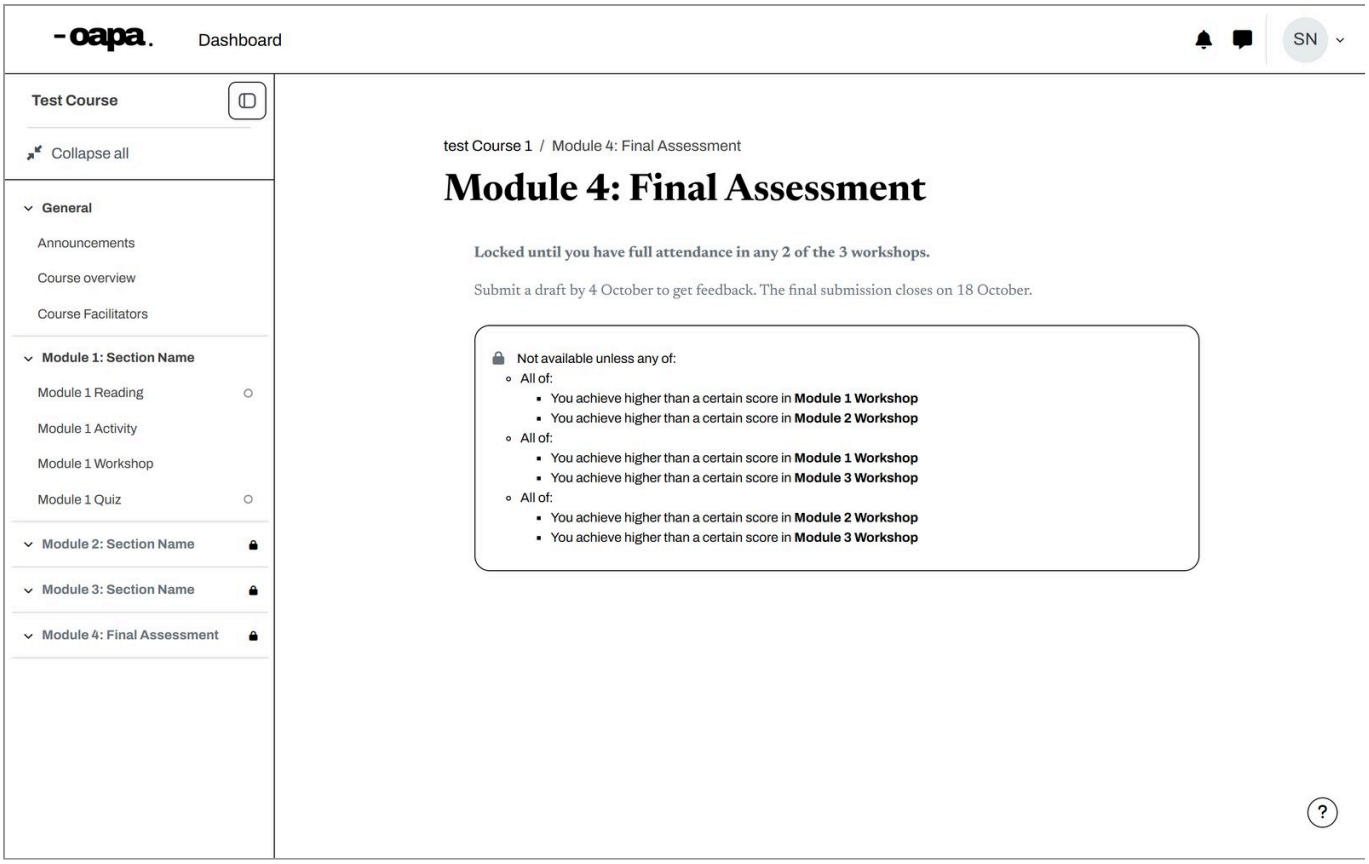

Figure 2. s0none (0 of 3): Module 4 is blocked and lists all three pairs.

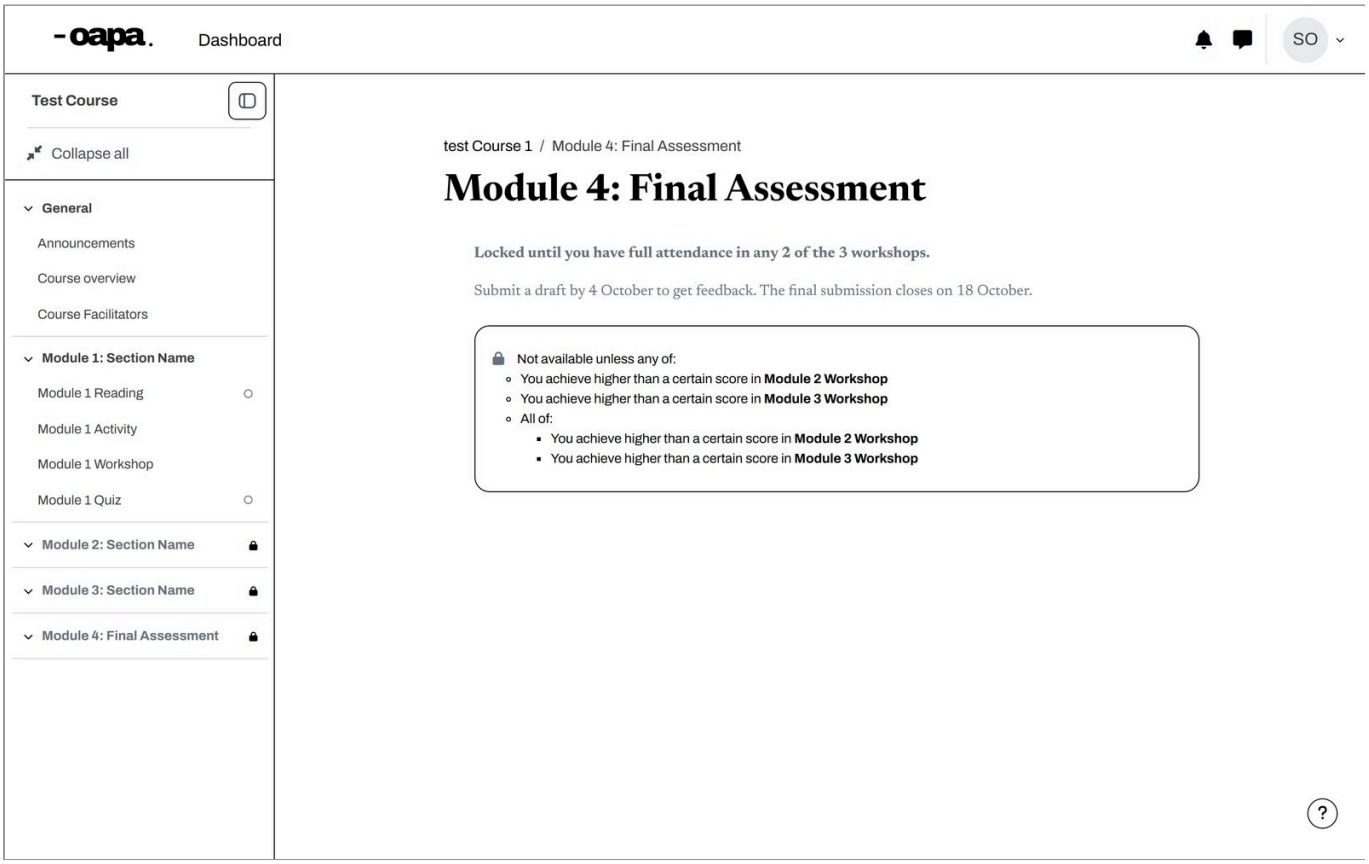

Figure 3. s1only (1 of 3): still blocked. The message lists W2, W3, or W2 and W3 together.

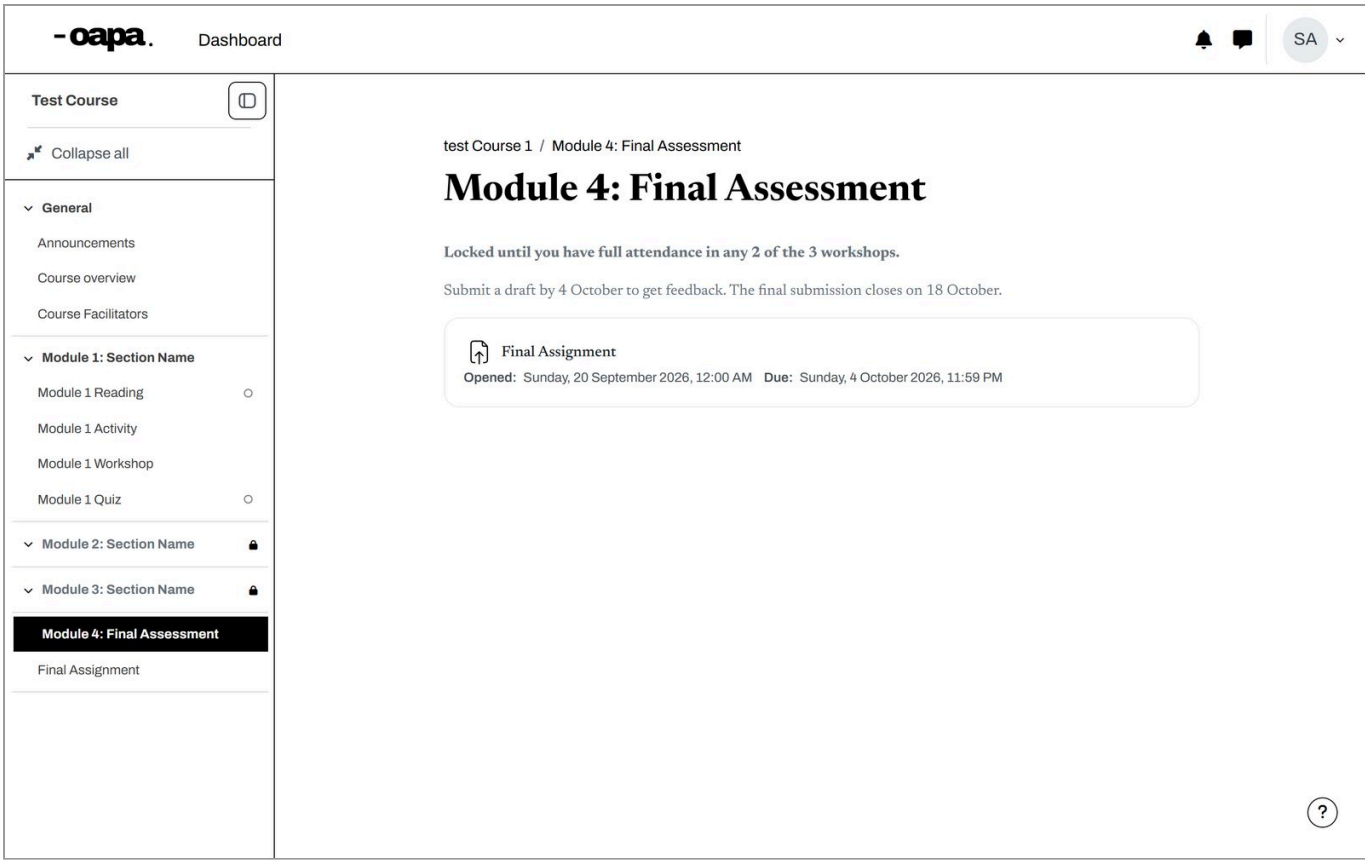

Figure 4. s3all (3 of 3): Module 4 is open and the Final Assignment shows.

3. Several 2 of 3 combinations

What I tested: all three pairs: W1+W2 (s2w12), W1+W3 (s2w13) and W2+W3 (s2w23).

Result: PASS. All three pairs open Module 4.

Later I added two more students to cover the last single workshop cases: s1w2 (only W2) and s1w3 (only W3). Both are blocked from Module 4 and see the "Not available unless any of" message. So all 4 cases with zero or one workshop are blocked, and all 4 cases with two or three workshops are allowed.

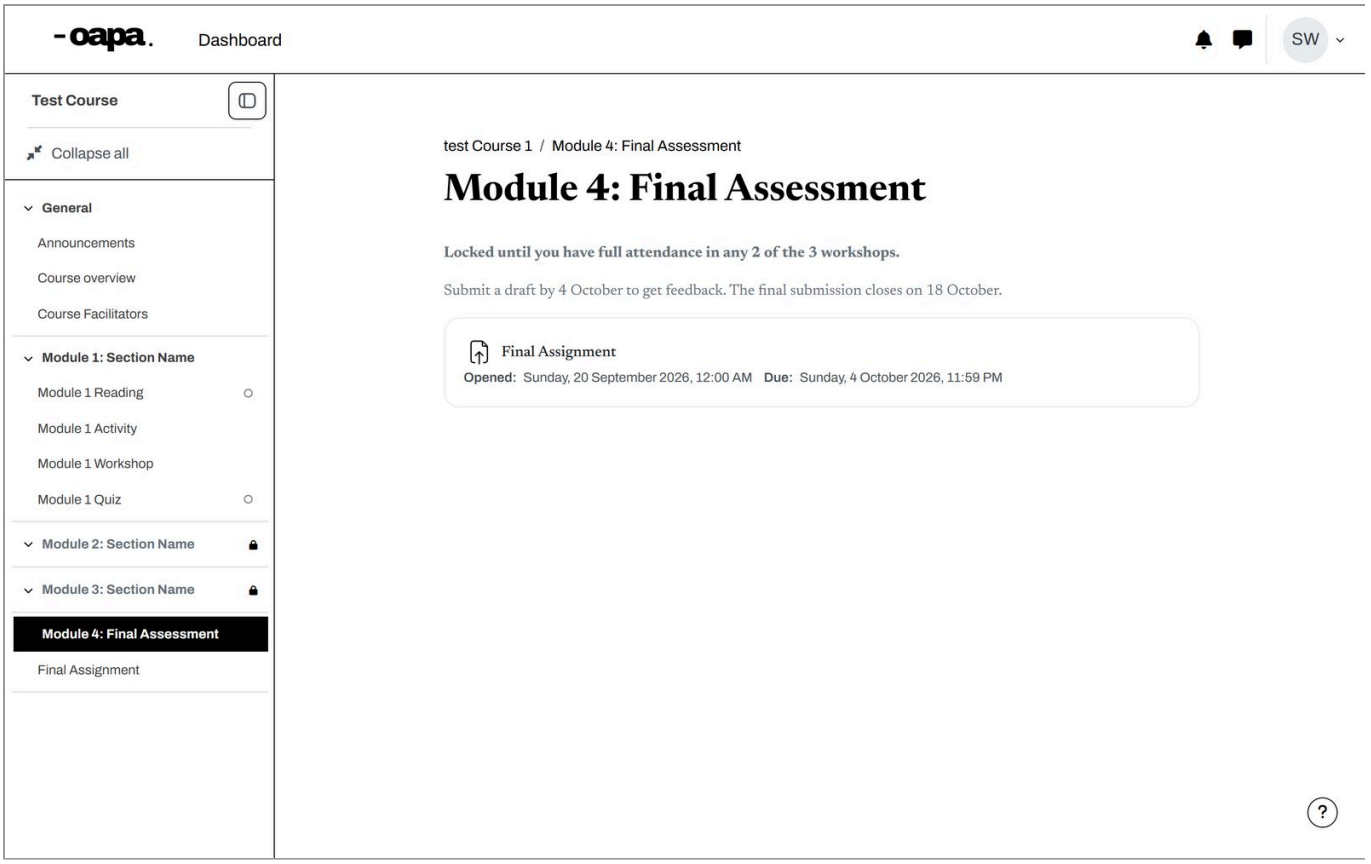

Figure 5. s2w12 (W1+W2): allowed. Modules 2 and 3 still show a lock in the left menu (see section 4).

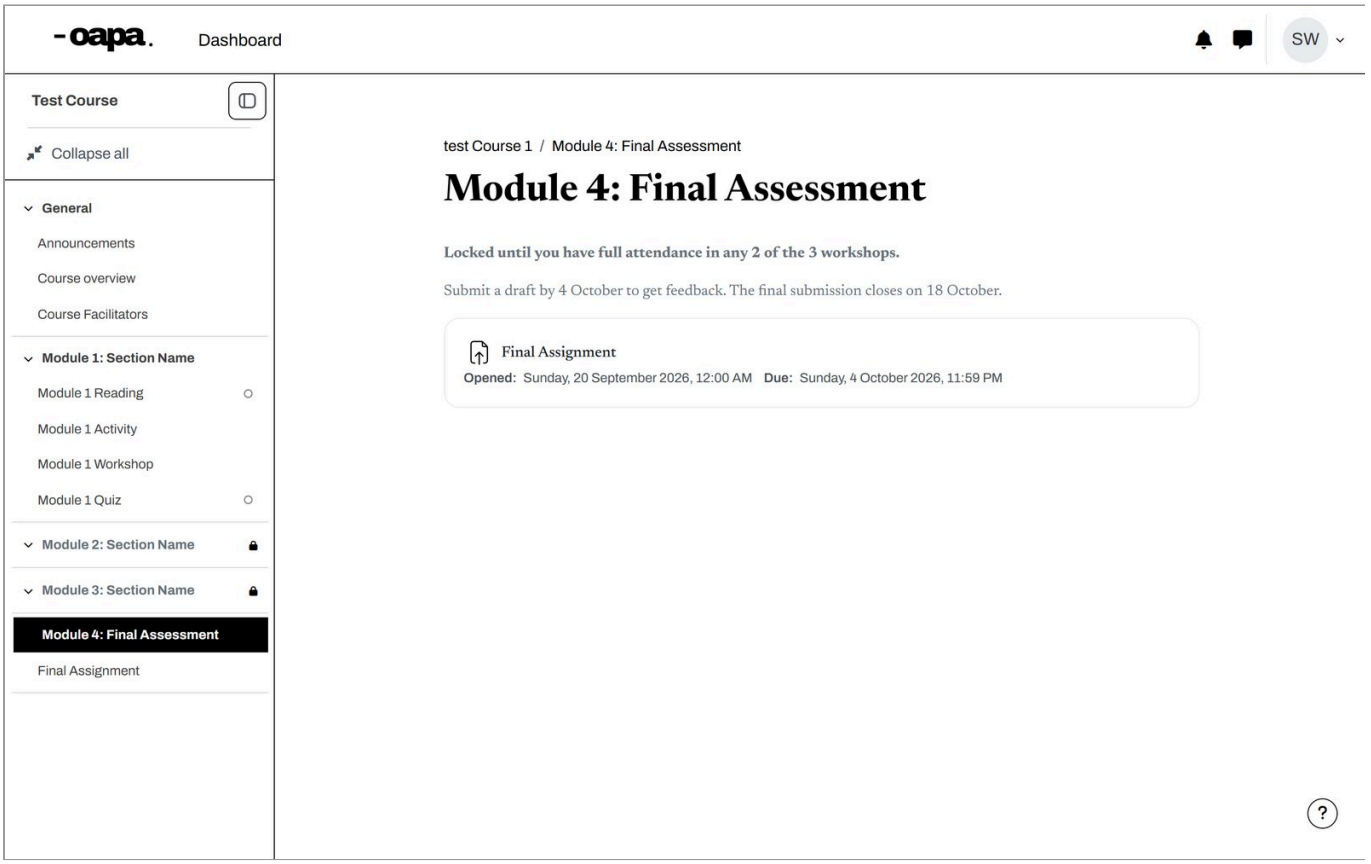

Figure 6. s2w13 (W1+W3): allowed.

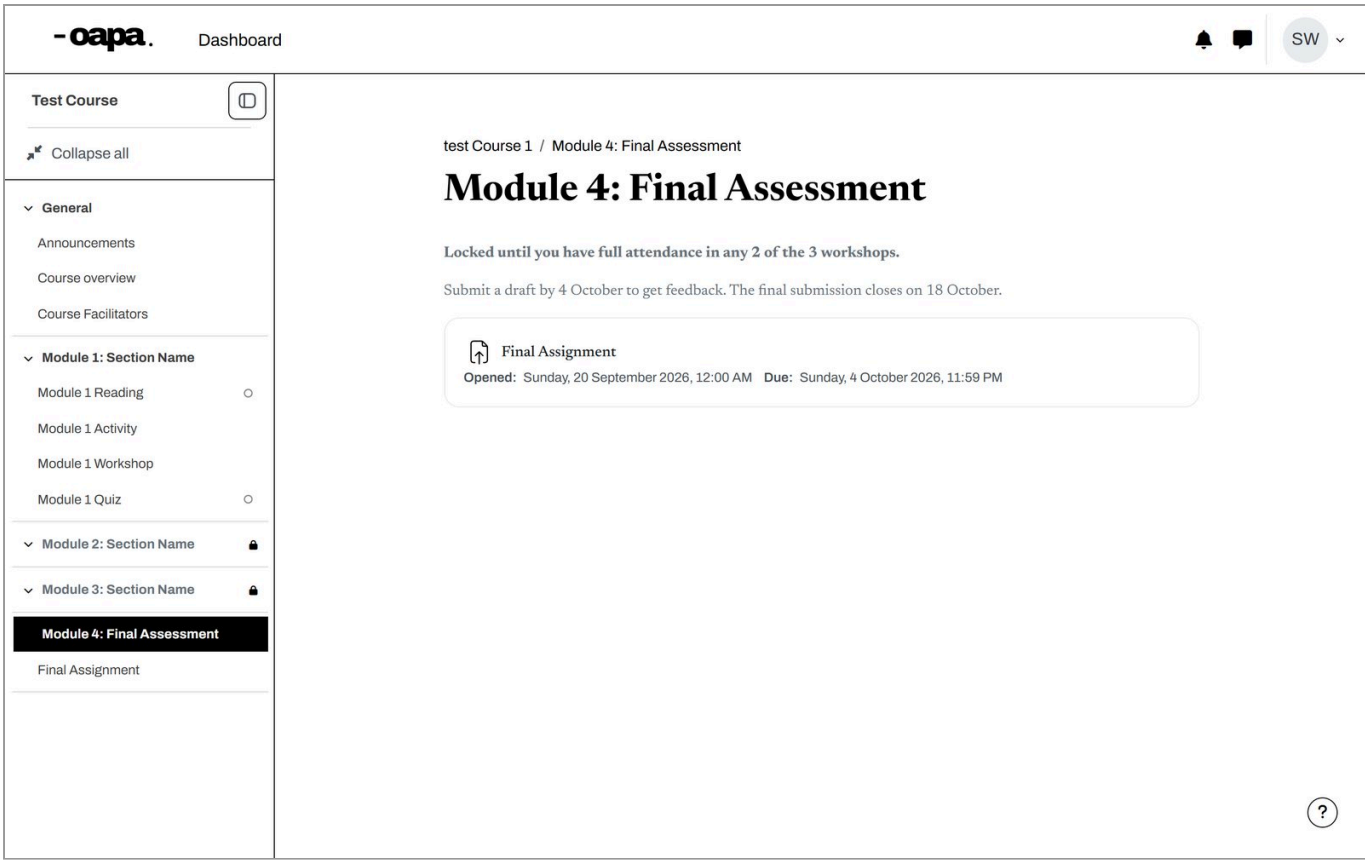

Figure 7. s2w23 (W2+W3): allowed.

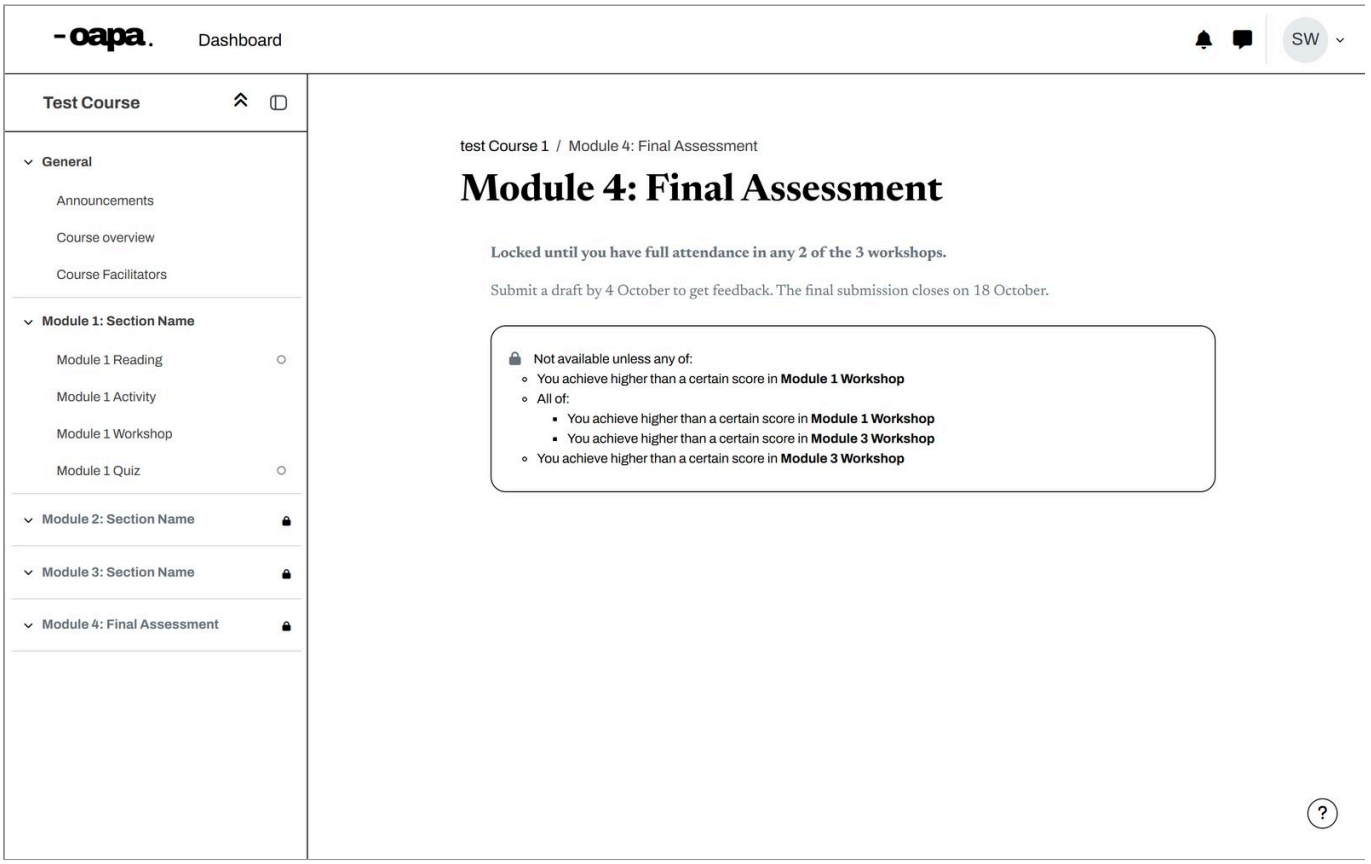

Figure 8. s1w2 (W2 only): Module 4 is blocked.

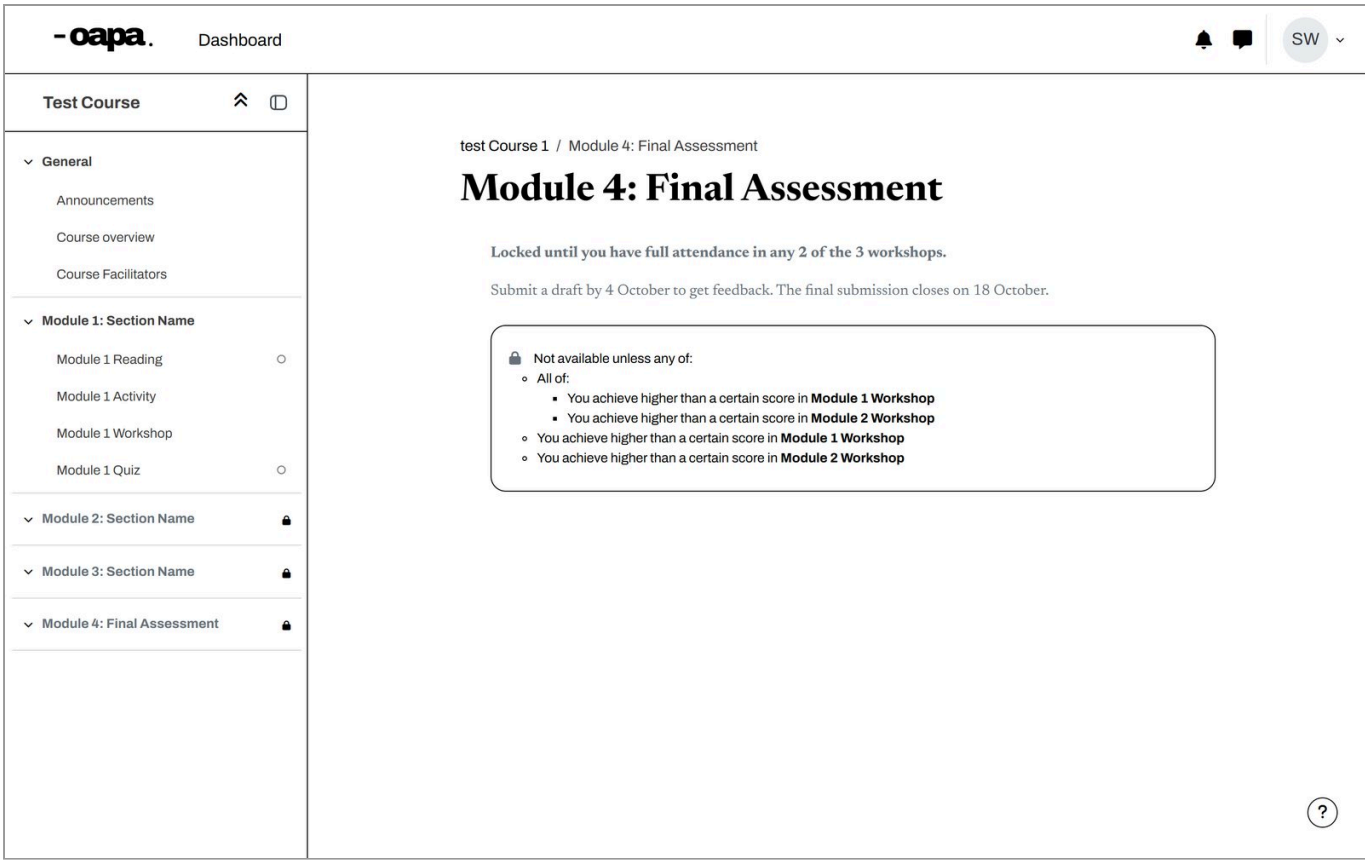

Figure 9. s1w3 (W3 only): Module 4 is blocked.

Joining the same workshop twice (W05)

What I tested: s1only had W1 as Present and nothing else. As teacher1, I took attendance for the same W1 session two more times, both as Present.

Why: a student who joins the same workshop twice should still only have one workshop, not two.

Result: PASS.

The plugin updates the same attendance record and does not add a new one. There was 1 record for s1only before and 1 after. The W1 report still shows P (2/2), 1 session and 100%. The workshop grades are still W1 100, W2 0, W3 0, and Module 4 is still blocked.

I did not test a second, separate session inside the same W1 activity. The gate reads the W1 grade only once, so it should still count as one workshop, but I have not run it.

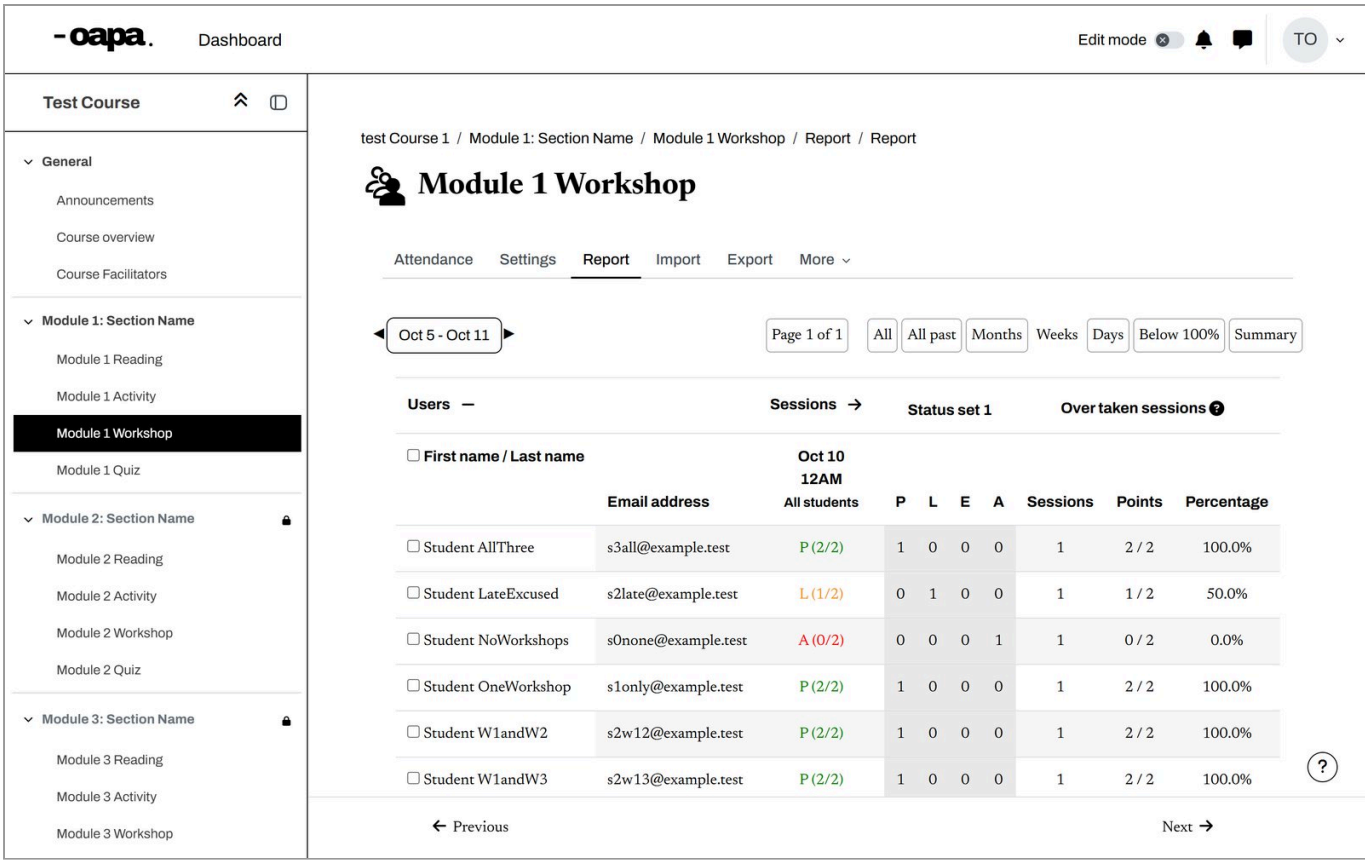

Figure 10. Teacher view of the W1 report after taking W1 again for s1only: still P (2/2), 1 session, 100%.

Late and Excused (W03, policy D-03)

s2late was Late for W1, Excused for W2 and Absent for W3. Late and Excused each give 50%, so the gate stays closed. Riley's criteria say we should not make up our own rule, and policy D-03 (does Late or Excused count?) is not decided yet. So I have **flagged this to Riley under D-03** and not called it a pass or a fail.

Students also cannot mark their own attendance, because self-marking is off. This matches W03.

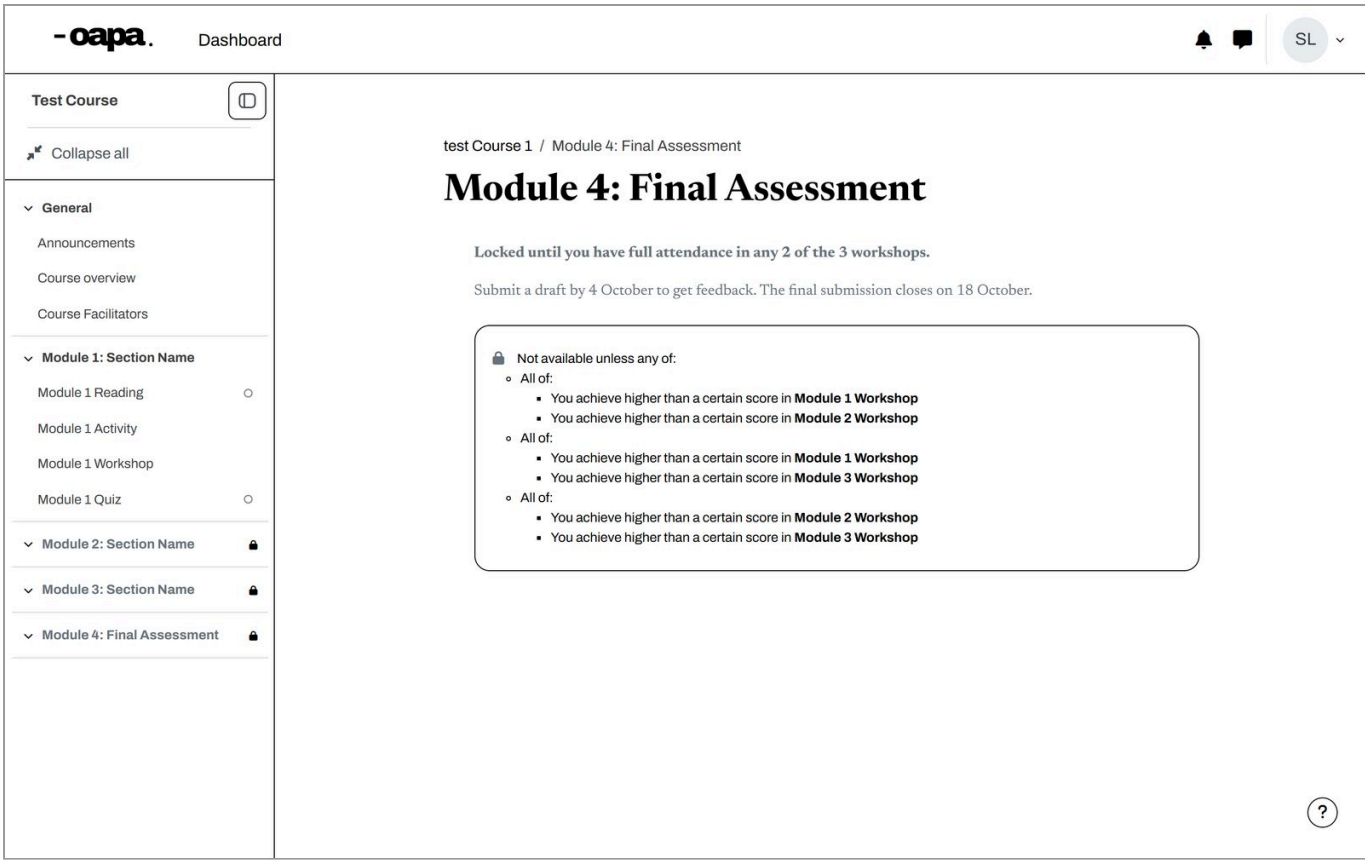

Figure 11. s2late (W1 Late, W2 Excused): Module 4 is still blocked.

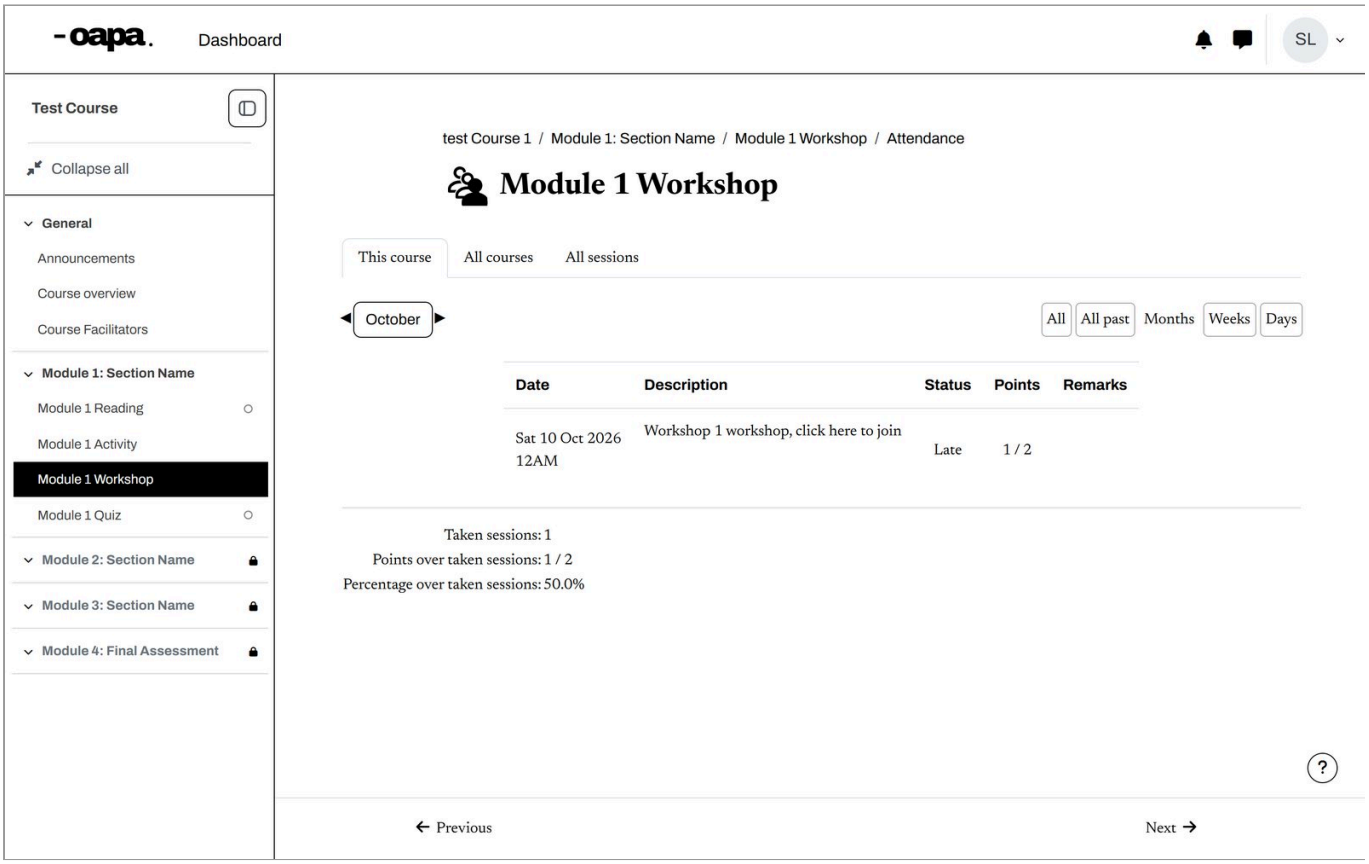

Figure 12. s2late's own W1 attendance page: Late, 1 / 2 points, 50%. There is no way for the student to mark themselves.

4. Assessment access

What I tested: whether allowed students can open the Final Assignment, and whether the gate matches E01. E01 says a student needs all modules done AND any two workshops.

Result: PARTIAL. The workshop part works. The module part is missing.

The Module 4 rule is only "(W1 and W2) or (W1 and W3) or (W2 and W3)". It does not check Modules 1 to 3. In Figure 5, s2w12 has not passed any quiz and Modules 2 and 3 are still locked, but the Final Assignment is open anyway. This is gap **D1**. E01 says "module not done plus a pair" should be Blocked, but it comes out Allowed.

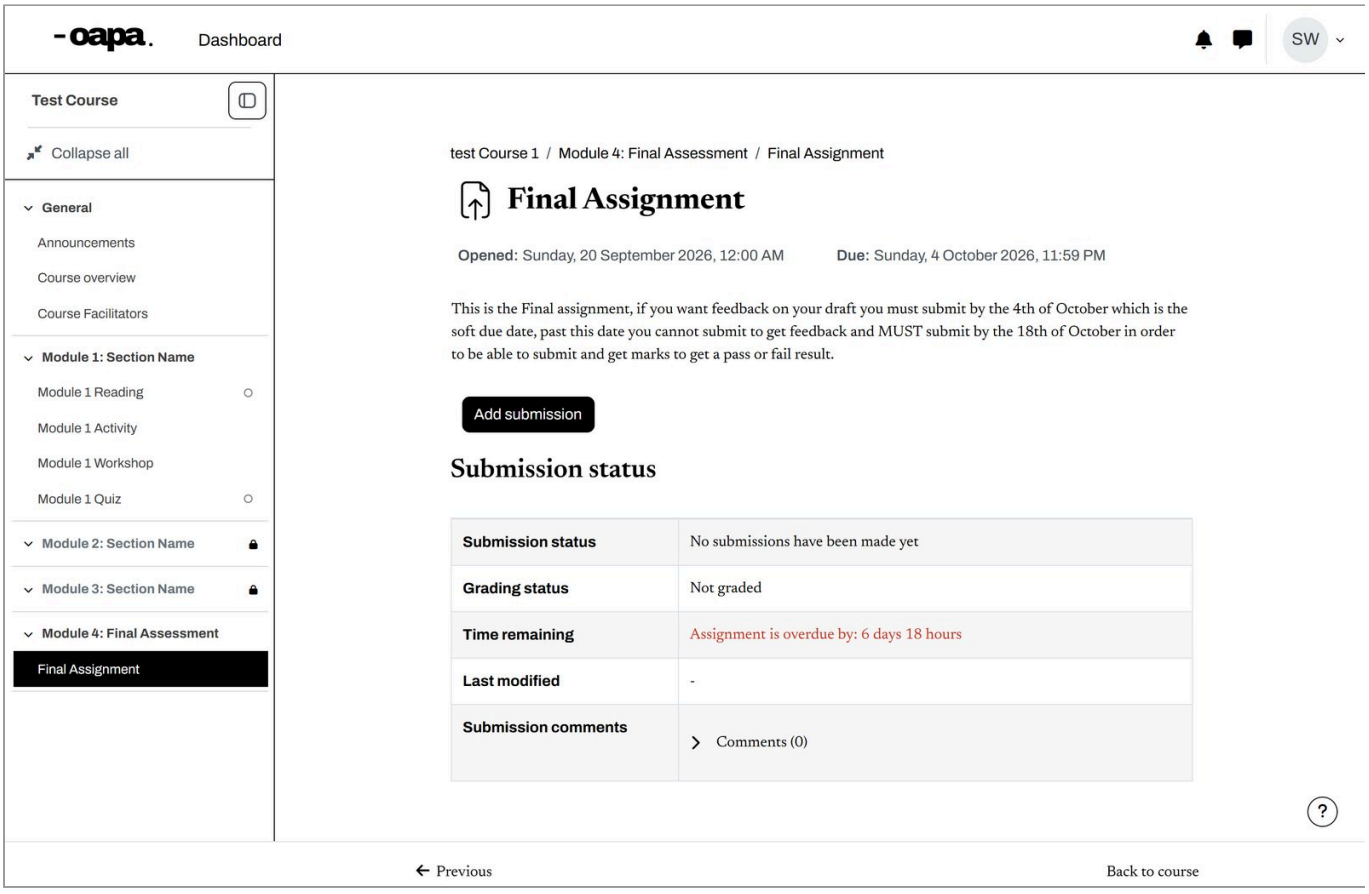

Figure 13. s2w12 can open the Final Assignment and sees "Add submission" while Modules 2 and 3 are locked.

5. Soft feedback and revision

What I tested: the assignment settings for feedback and resubmitting. A03 says a student should get feedback on a draft, revise it, and then hand in a final version.

Result: FAIL (D2).

The settings are:

- Due date Sun 4 Oct 2026 11:59 PM. This is the soft date for feedback.
- Cut-off Sun 18 Oct 2026 11:59 PM.
- "Require students to click submit" is off.
- Attempts reopen "until pass", with a maximum of 1 attempt.

With only 1 attempt allowed, Moodle never reopens the submission. So a student who gets feedback cannot hand in a new version. To allow one revision, the maximum attempts must be at least 2 and the reopen setting should be "Manually", so the teacher can reopen the draft after feedback without giving it a grade. The owner is Reshan. I did not change it, because it is Dev 1's build.

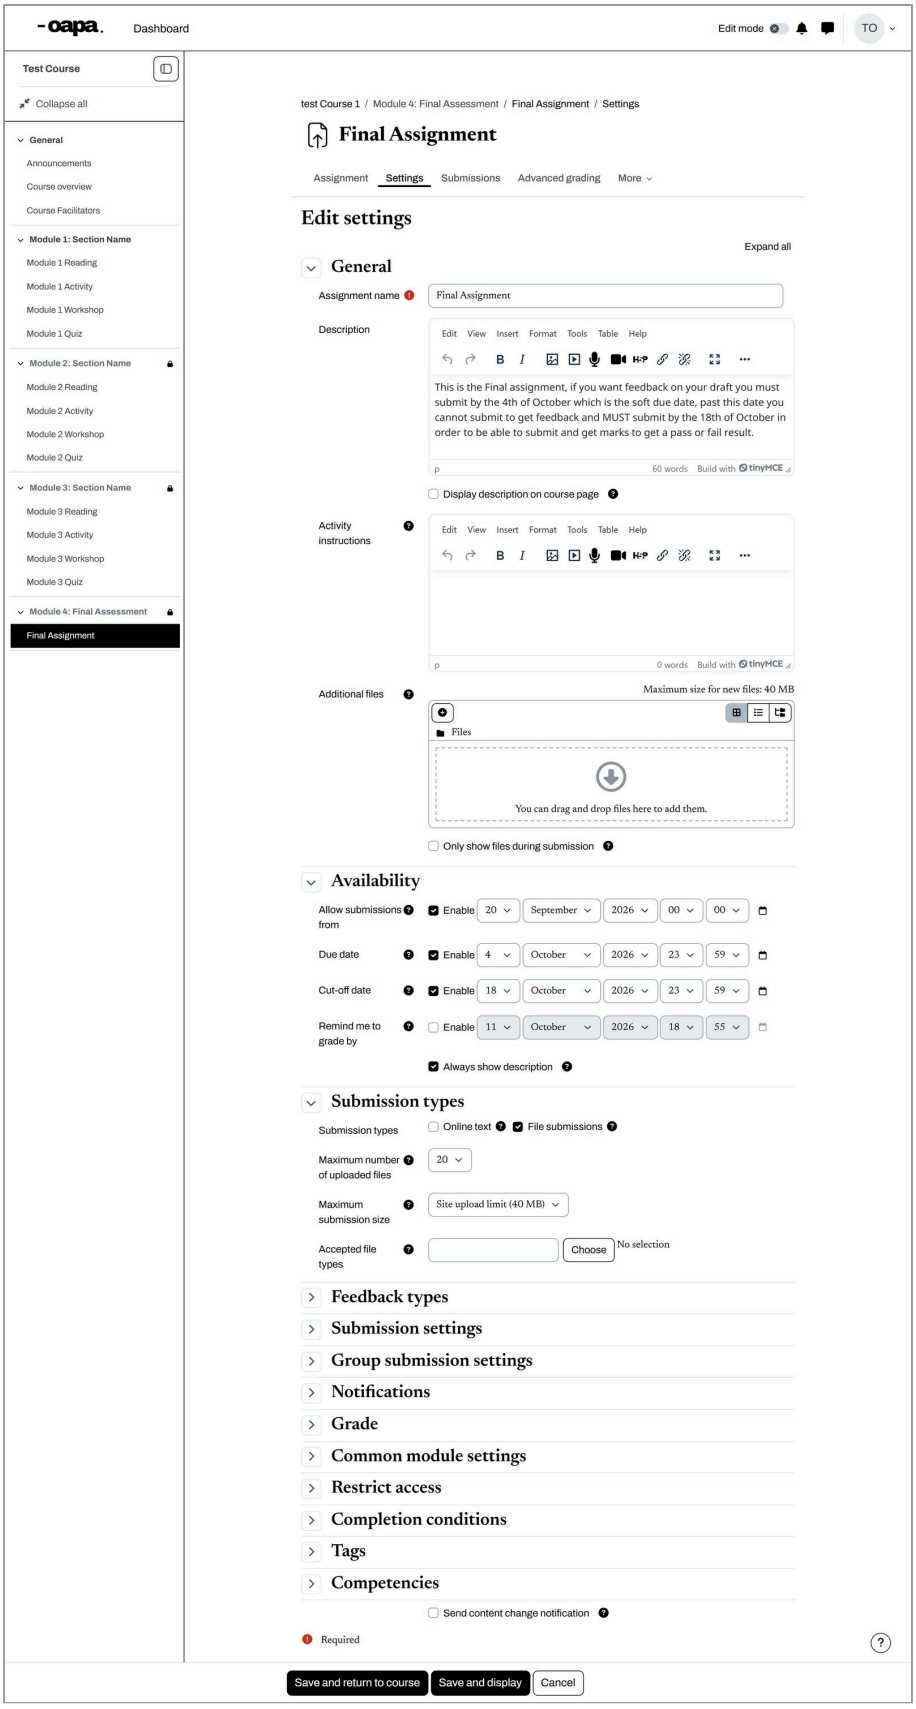

Figure 14. Teacher view of the Final Assignment settings: dates and submission types. I checked the attempt settings in the database (until pass, max 1 attempt).

6. Direct final submission

What I tested: whether an allowed student can still submit after the soft due date, whether a real file upload works, and whether a teacher can give one student more time.

Why: students who miss the feedback date must still be able to hand in their final work, with no penalty. Staff must be able to give extra time to one student when needed.

Result: PASS. The date boundary tests are still open.

Late submission with no penalty (A07)

On 11 Oct (after the due date, before the cut-off), s2w12 and s3all can both see "Add submission". The page says the work is "overdue", but there is no penalty and no automatic fail.

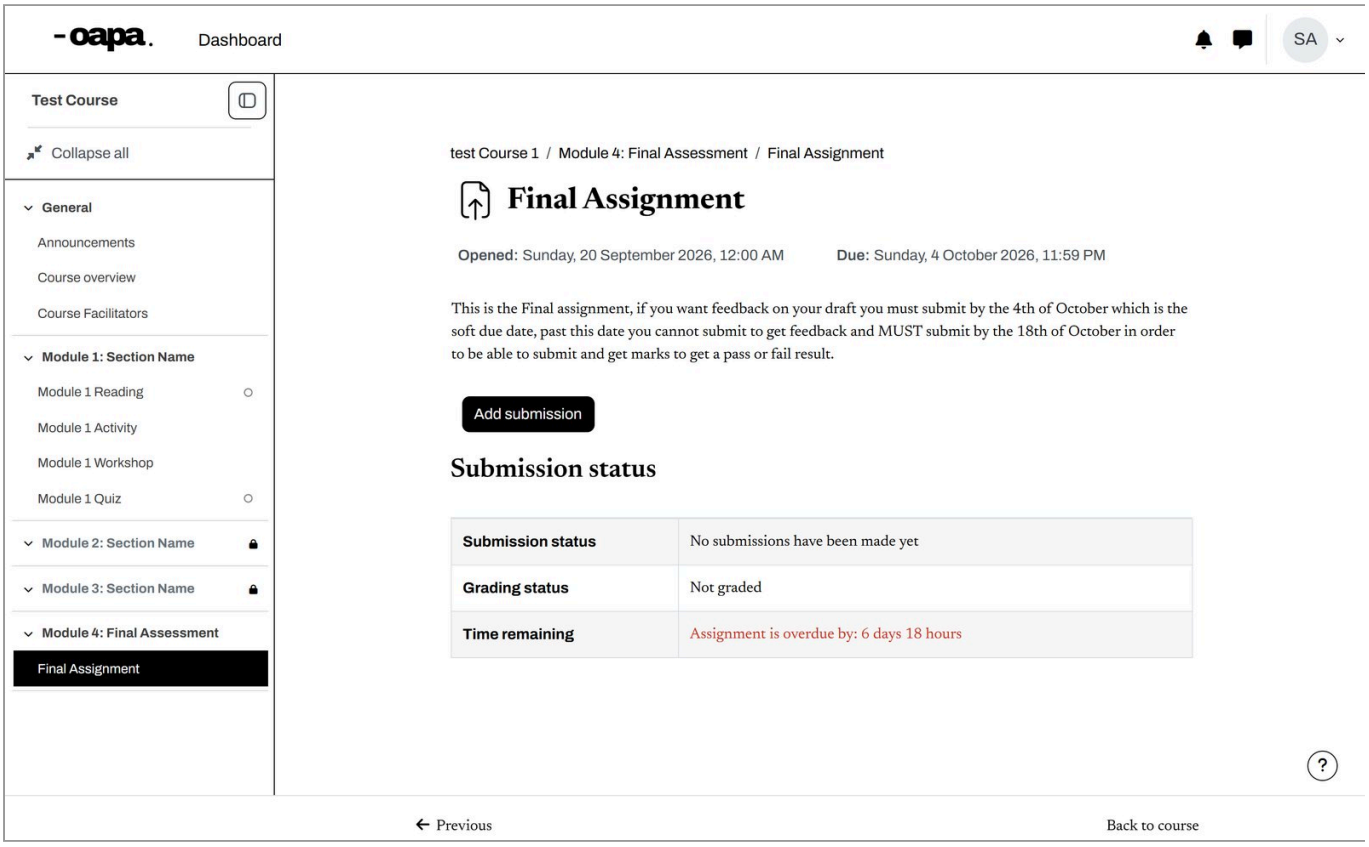

Figure 15. s3all after the soft due date, before the upload: they can still add a submission, and there is only an "overdue" note.

Extension for one student (A06)

As teacher1, I gave s3all an extension on the Final Assignment with Moodle's normal "Grant extension" feature, until Wed 21 Oct 2026 11:59 PM (site time). The normal due date is 4 Oct and the cut-off is 18 Oct.

- s3all's page now shows "Extension due date Wednesday, 21 October 2026, 11:59 PM".
- s2w12 still only sees the normal due date of 4 October, with no extension.
- In the teacher's grading table, "Extension granted" only shows on the s3all row.

So the extension only applies to the one student the teacher picked. This matches A06. I did not test the exact times just before, at and after each date, or check that the extension does not also move the soft feedback date. Those stay open.

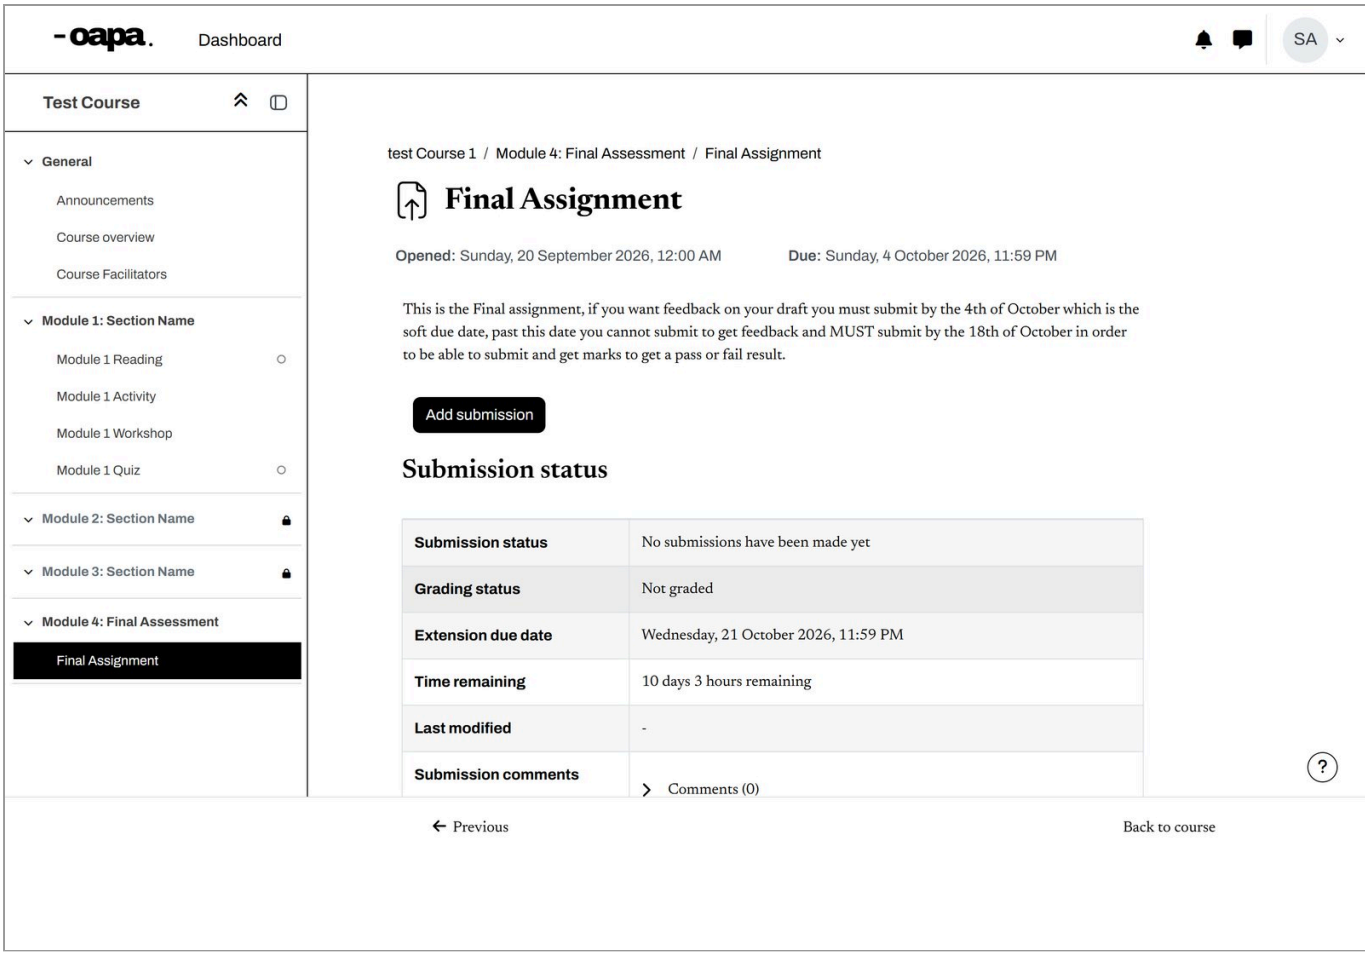

Figure 16. s3all after the extension: "Extension due date Wednesday, 21 October 2026, 11:59 PM".

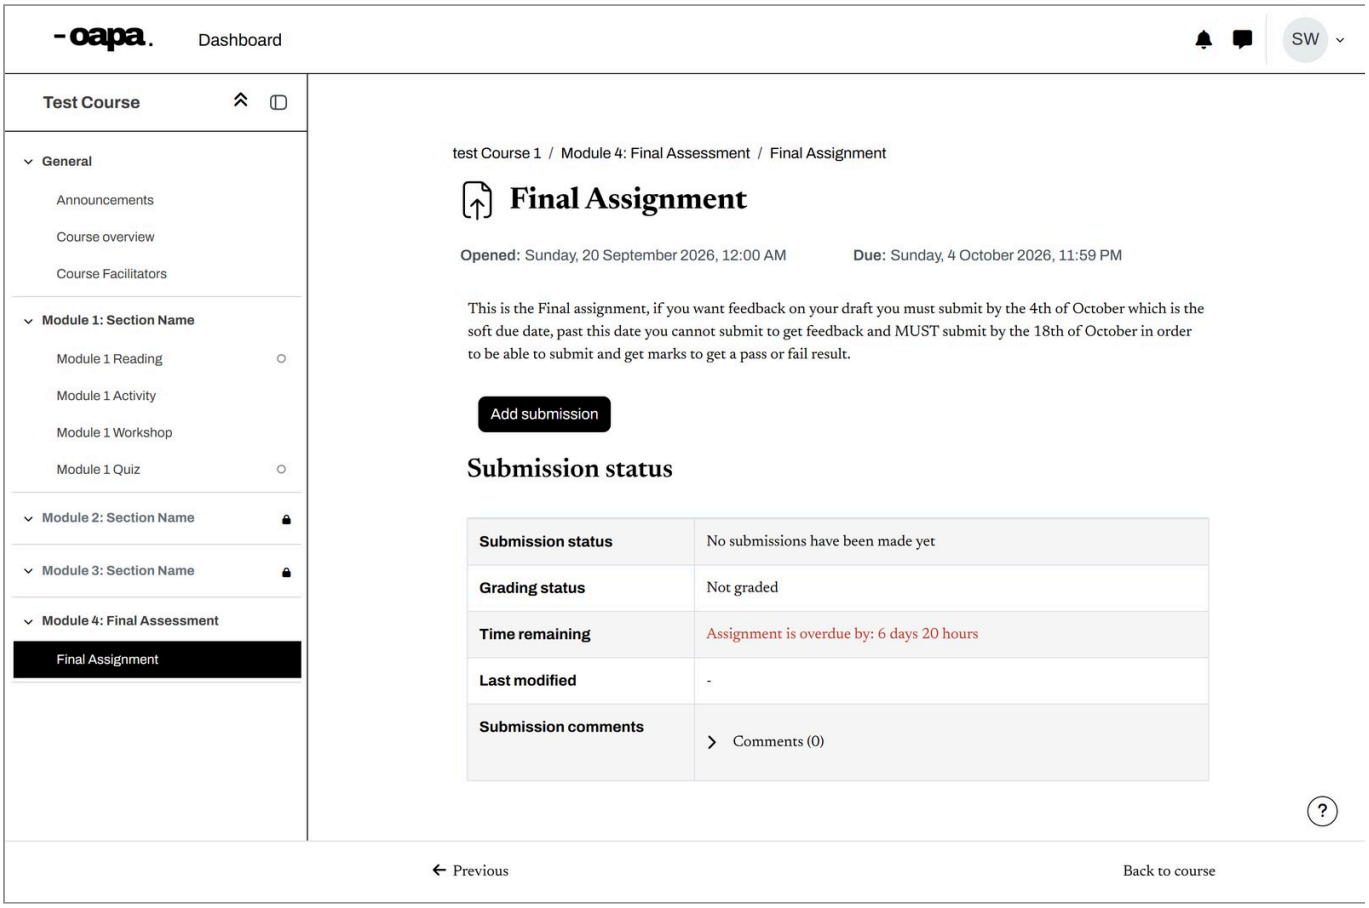

Figure 17. s2w12 at the same time: only the normal due date, and no extension.

Real file upload (A04, A05)

I logged in as s3all through the normal login page. s3all has all three workshops, so Module 4 is open. I clicked Add submission, used "Upload a file" to add a 1 page test PDF (s3all-final-assessment-test.pdf) and clicked Save changes.

- Because "click submit" is off, it went straight to "Submitted for grading". Grading status is "Not graded".
- Last modified is Sunday 11 Oct 2026, 8:26 PM site time (2:26 PM Tashkent time).
- The teacher grading table shows Student AllThree as "Submitted for grading" with the file.

I did not grade it, on purpose. This submission was after the soft date and before the final date, so it also covers the A05 case "direct final submission between the soft and hard dates".

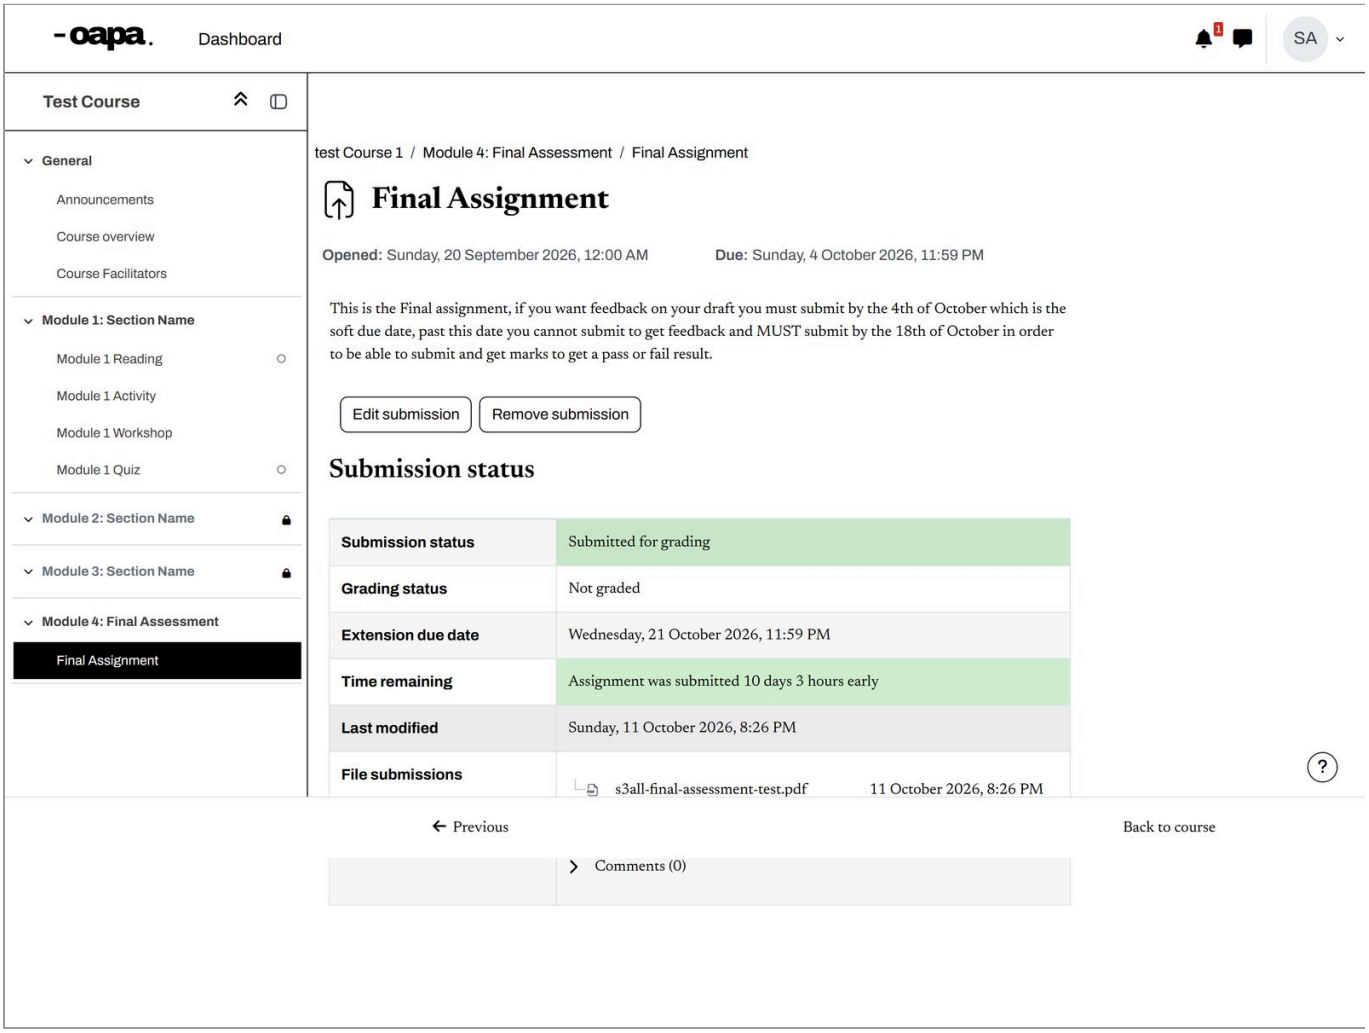

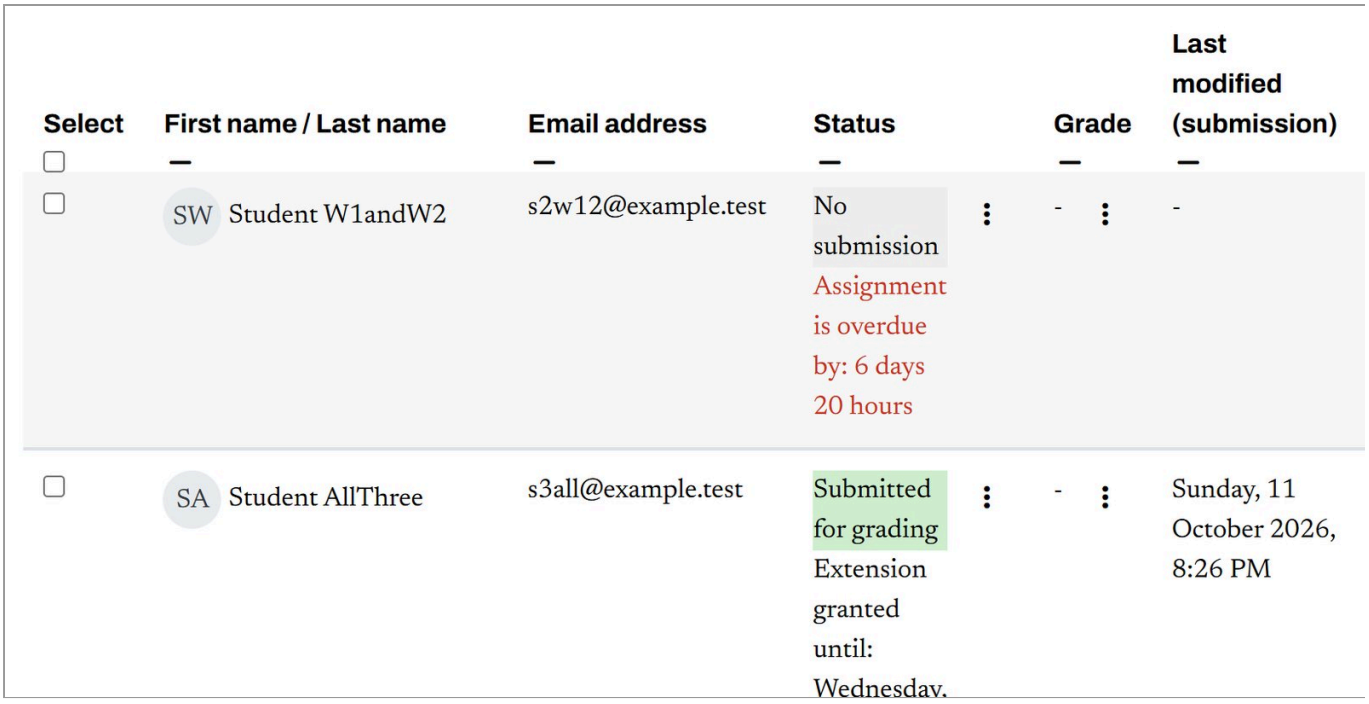

Figure 18. s3all after the upload: "Submitted for grading", Not graded, with the PDF listed.

Select	First name / Last name	Email address	Status	Grade	Last modified (submission)
☐	SW Student W1andW2	s2w12@example.test	No submission Assignment is overdue by: 6 days 20 hours	-	-
☐	SA Student AllThree	s3all@example.test	Submitted for grading Extension granted until: Wednesday,	-	Sunday, 11 October 2026, 8:26 PM

Figure 19. Teacher grading table (two rows shown): s2w12 has no submission. s3all is "Submitted for grading", has the extension and has the file.

7. Branding against the UX handoff

What I tested: I compared the header, logo, left menu, tabs and page layout with Walaa's mock-ups.

Result: PASS.

The screenshots in this report follow the mock-ups where Moodle allows it (details in my Task 69 report):

- the short "-oapa." logo at the top left
- a 72 px header with a black line under it
- filled header icons and the user's initials
- a full-height left menu with a black highlight on the current page
- tabs above the course title, with a black underline
- black and white colours, Archivo for menus and buttons, and Newsreader for reading text

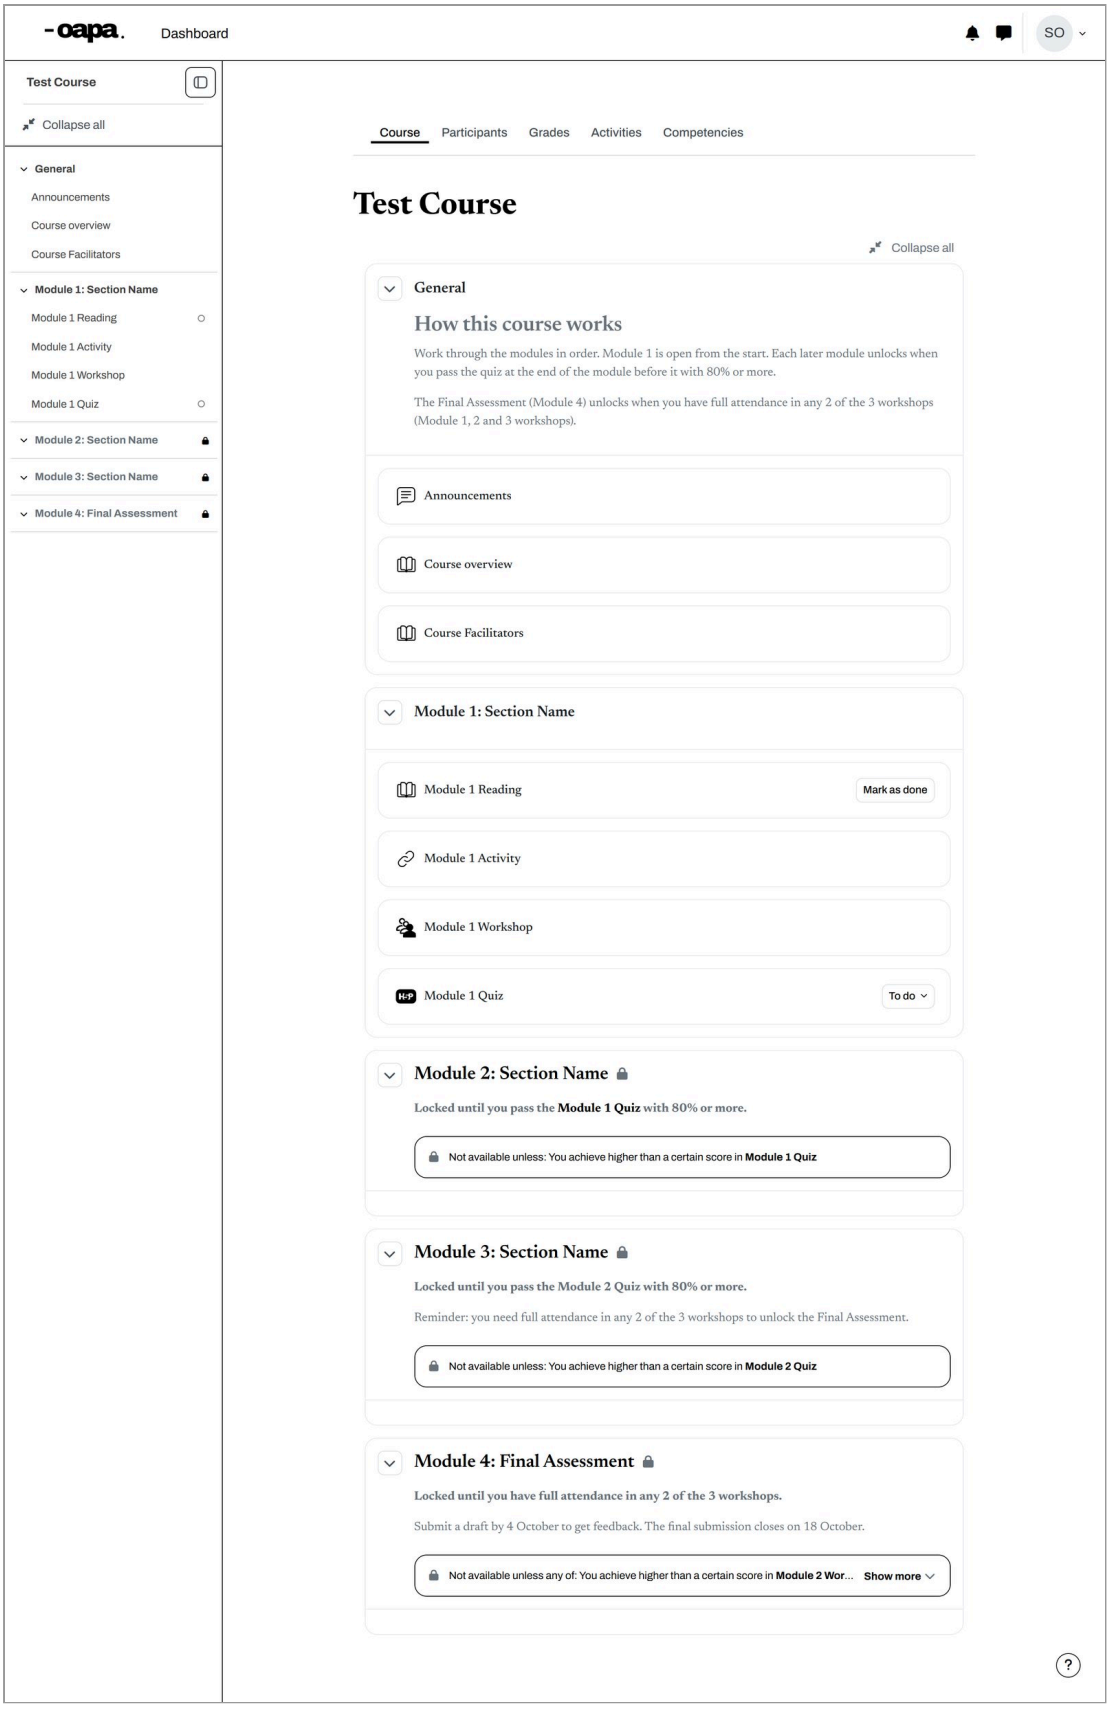

Figure 20. Student course page with the "How this course works" box, the lock messages and the OAPA styling.

8. Branding against the Brand Book

Result: PARTIAL.

- The header logo is 104 px wide, but the Brand Book says at least 220 px. I used the mock-up size to match Walaa's design, and I flagged this to Walaa (D9).

- The H5P quiz sits in its own frame and keeps H5P's blue Check button. Our theme cannot change it (D10, known limit).
- Tables keep light grey stripes so they are easier to read. This is a small change from pure black and white.
- The fonts, colours and "no shadows" rule all follow the Brand Book.

9. Navigation regression

What I tested: as students and as the teacher, I checked the left menu, the lock icons, the Previous and Next links and the breadcrumbs. I did this after the branding and text changes, to make sure nothing broke.

Result: PASS.

Locked sections show a lock, the current page is highlighted, the breadcrumbs are right and Previous/Next work. Module 4 is now called "Module 4: Final Assessment". Modules 1 to 3 are still called "Section Name" (D8, content owner).

10. Student evidence

Result: PASS.

Students only see their own grades. Their grade report only lists items from the modules they can open. So s0none only sees the Module 1 items.

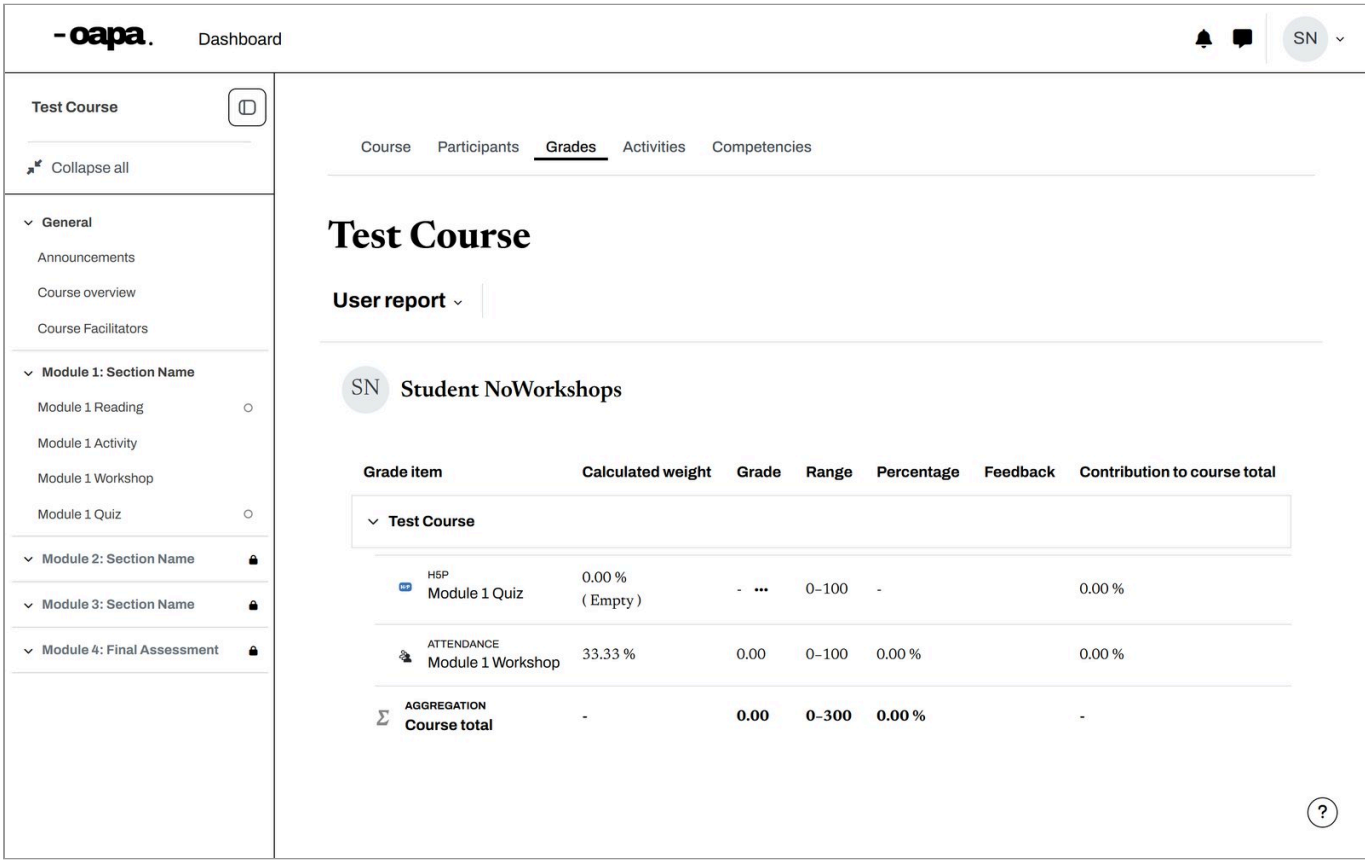

Figure 21. s0none's grade report: Module 1 Quiz is empty and Module 1 Workshop is 0.

11. Teacher evidence

Result: PASS for reporting. W04 is open.

The teacher can see every test student in the attendance report (Figure 1), the grader report and the assignment submissions table.

W04 is about a facilitator override. In the Attendance plugin the teacher can set any status and add a remark. But an override looks exactly like a real Present in the gate and the gradebook, so you cannot tell them apart. I have recorded this as open (D4). My suggestion for Riley and Reshan is a separate status such as "Facilitator approved", or always adding a remark.

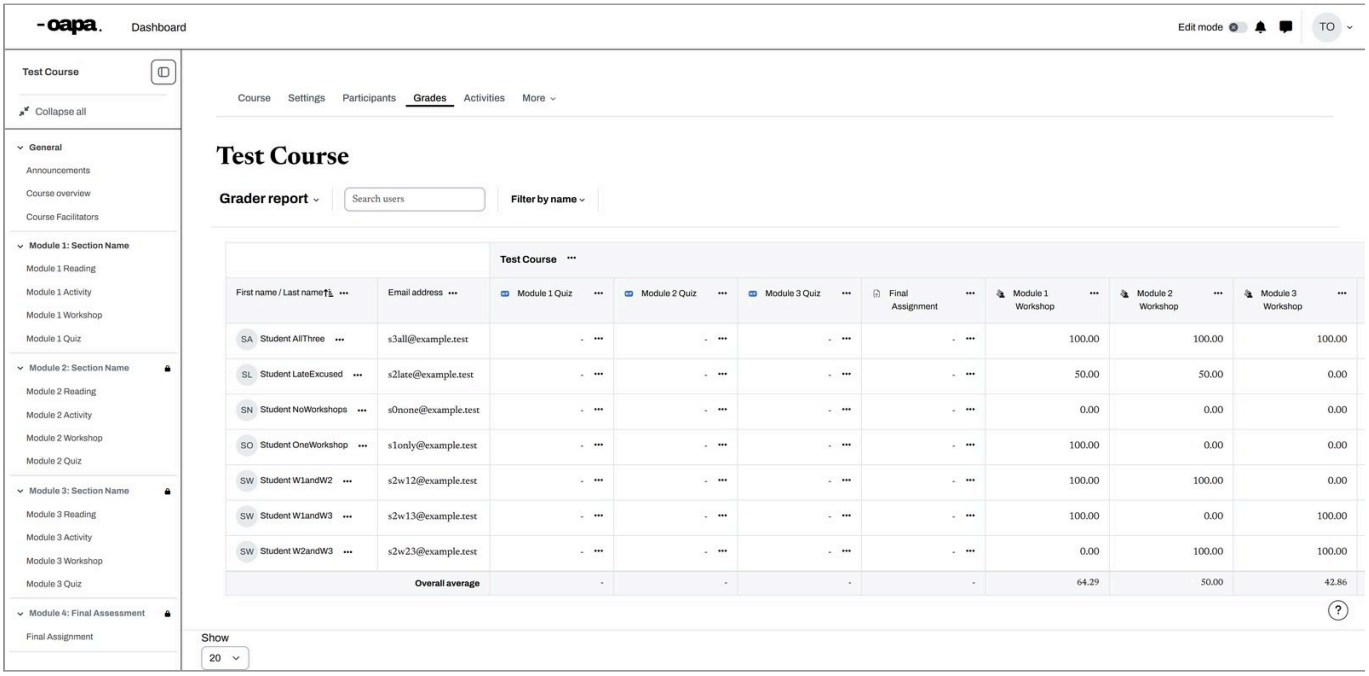

Figure 22. Grader report: three workshop columns (100 / 50 / 0) and one column for each H5P quiz. This was taken before the H5P retest.

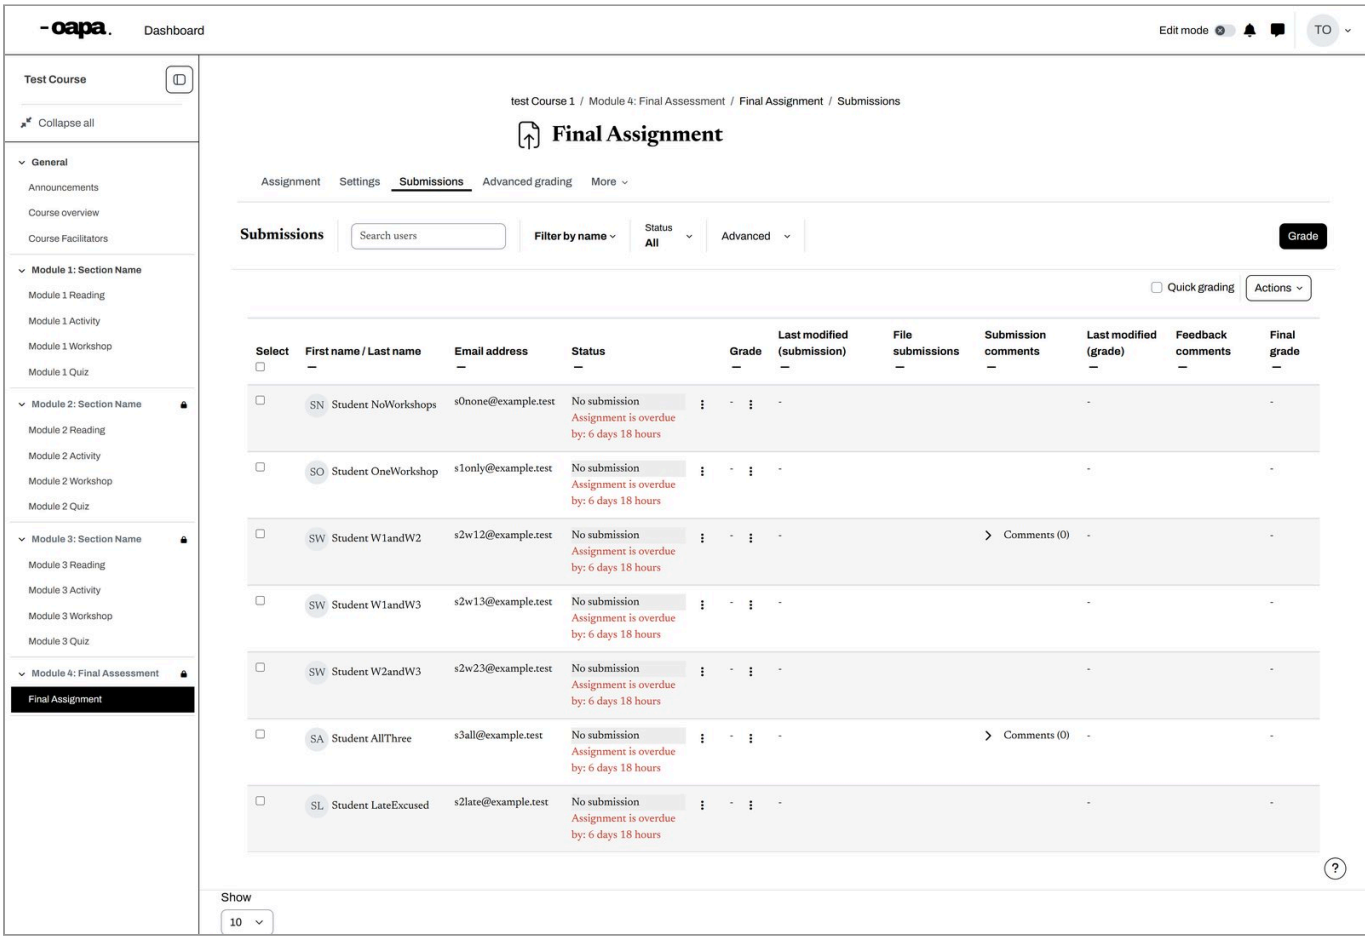

Figure 23. Final Assignment submissions table, taken before the upload test: all seven students at that time are listed and there are no submissions yet.

12. H5P create and render

What I tested: I opened the Module 1 Quiz (an H5P Question Set with 5 questions) as s1only.

Why: to make sure the quiz actually shows up inside the Moodle page.

Result: PASS. The quiz shows the question, the answers, a Check button, the progress dots and Next.

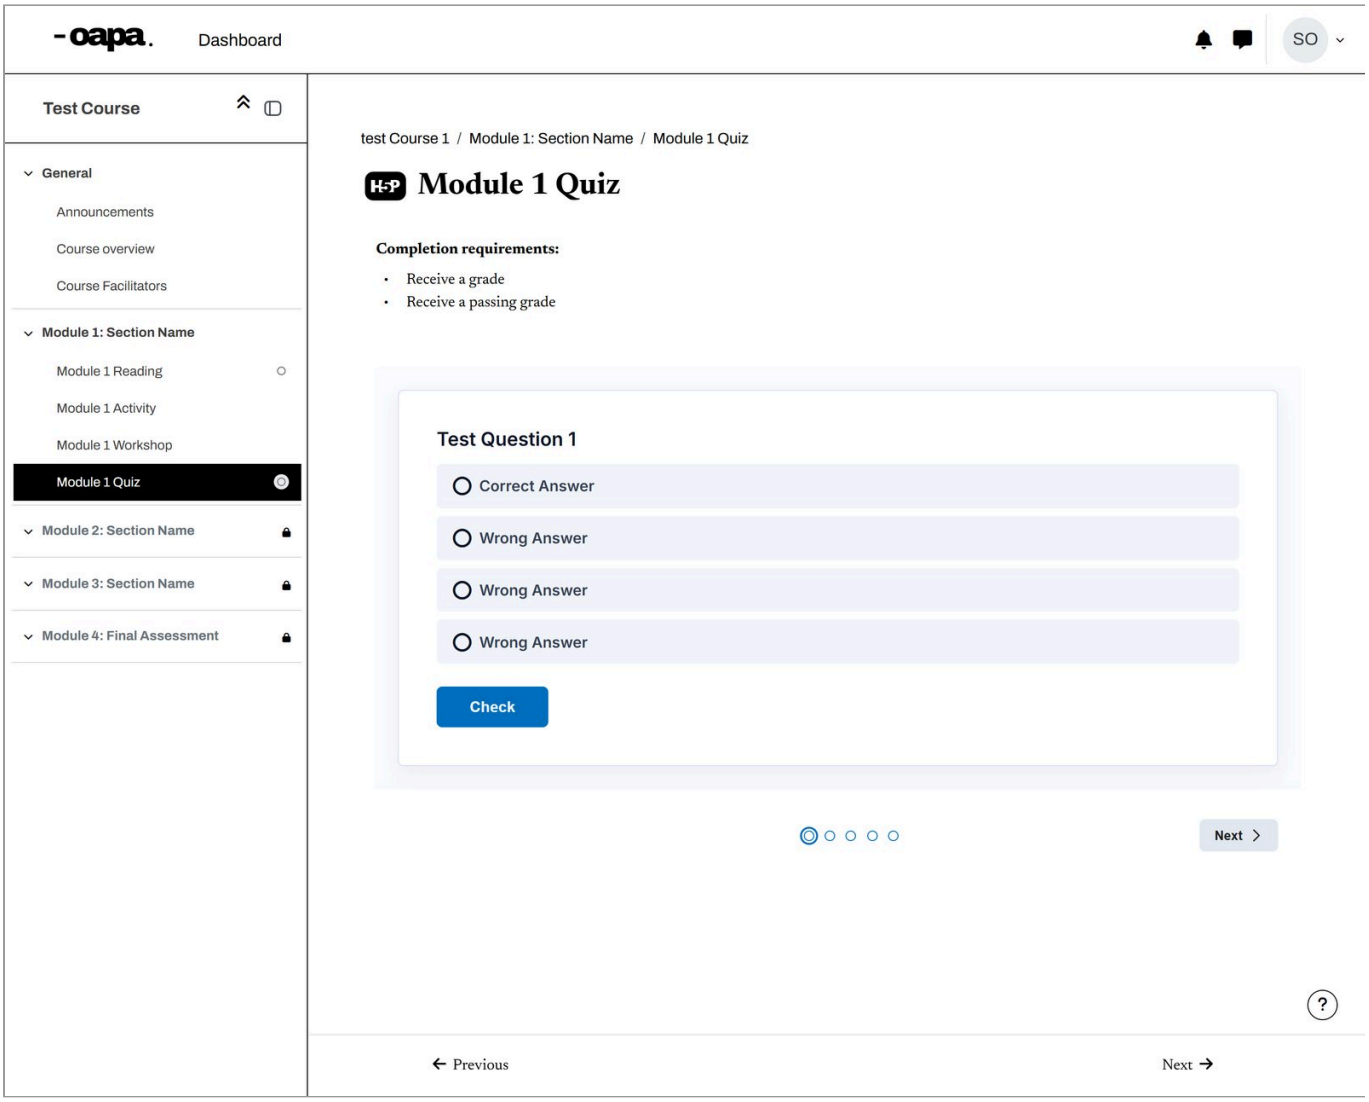

Figure 24. s1only, Module 1 Quiz inside Moodle. I took this picture with a test script. In the script the H5P frame did not always size itself, so I set its height by hand to take the picture.

Note: The task asks for real OAPA Academy evidence. All my H5P tests were done on the isolated local copy, because we do not have editing access on the live Academy yet (C1/C2). The same check needs to be repeated on the live Academy once access is given. Owner: Zarin, with access from Aryan.

13. H5P answer feedback

What I tested: I answered all 5 questions and clicked Check on each one, to see if the student gets feedback.

Result: PASS.

I did the retest myself in a normal Chrome browser, logged in as s1only through the admin "Log in as" option. Every question showed the green tick and "1/1" after Check. Then I clicked Finish.

14. H5P results and completion

What I tested: whether finishing the quiz saves a grade, marks the quiz complete and opens Module 2.

Why: the whole course depends on this. If the quiz grade does not save, students can never move past Module 1.

Result: PASS.

After I clicked Finish, I checked Moodle and the database:

- Moodle saved 6 attempts at 8:17 PM Melbourne time: one for the whole quiz (5 out of 5) and one for each question I checked (1/1 each). The grade method is highest attempt, so the grade is 100.
- The Module 1 Quiz grade is 100.
- The quiz completion is "complete, pass".
- Moodle now lets s1only into Module 1 and Module 2. Modules 3 and 4 stay locked, which is correct.

The attempts report shows the attempt at 8:17 PM on 11 Oct 2026 in Melbourne site time, which is 2:17 PM Tashkent time.

The task asks for real OAPA Academy evidence. All my H5P tests were done on the isolated local copy, because we do not have editing access on the live Academy yet (C1/C2). The same check needs to be repeated on the live Academy once access is given. Owner: Zarin, with access from Aryan.

Note: my first automated tries did not save an attempt. The cause was the test script's browser, where the H5P frame did not fully load. In a normal browser it saves fine.

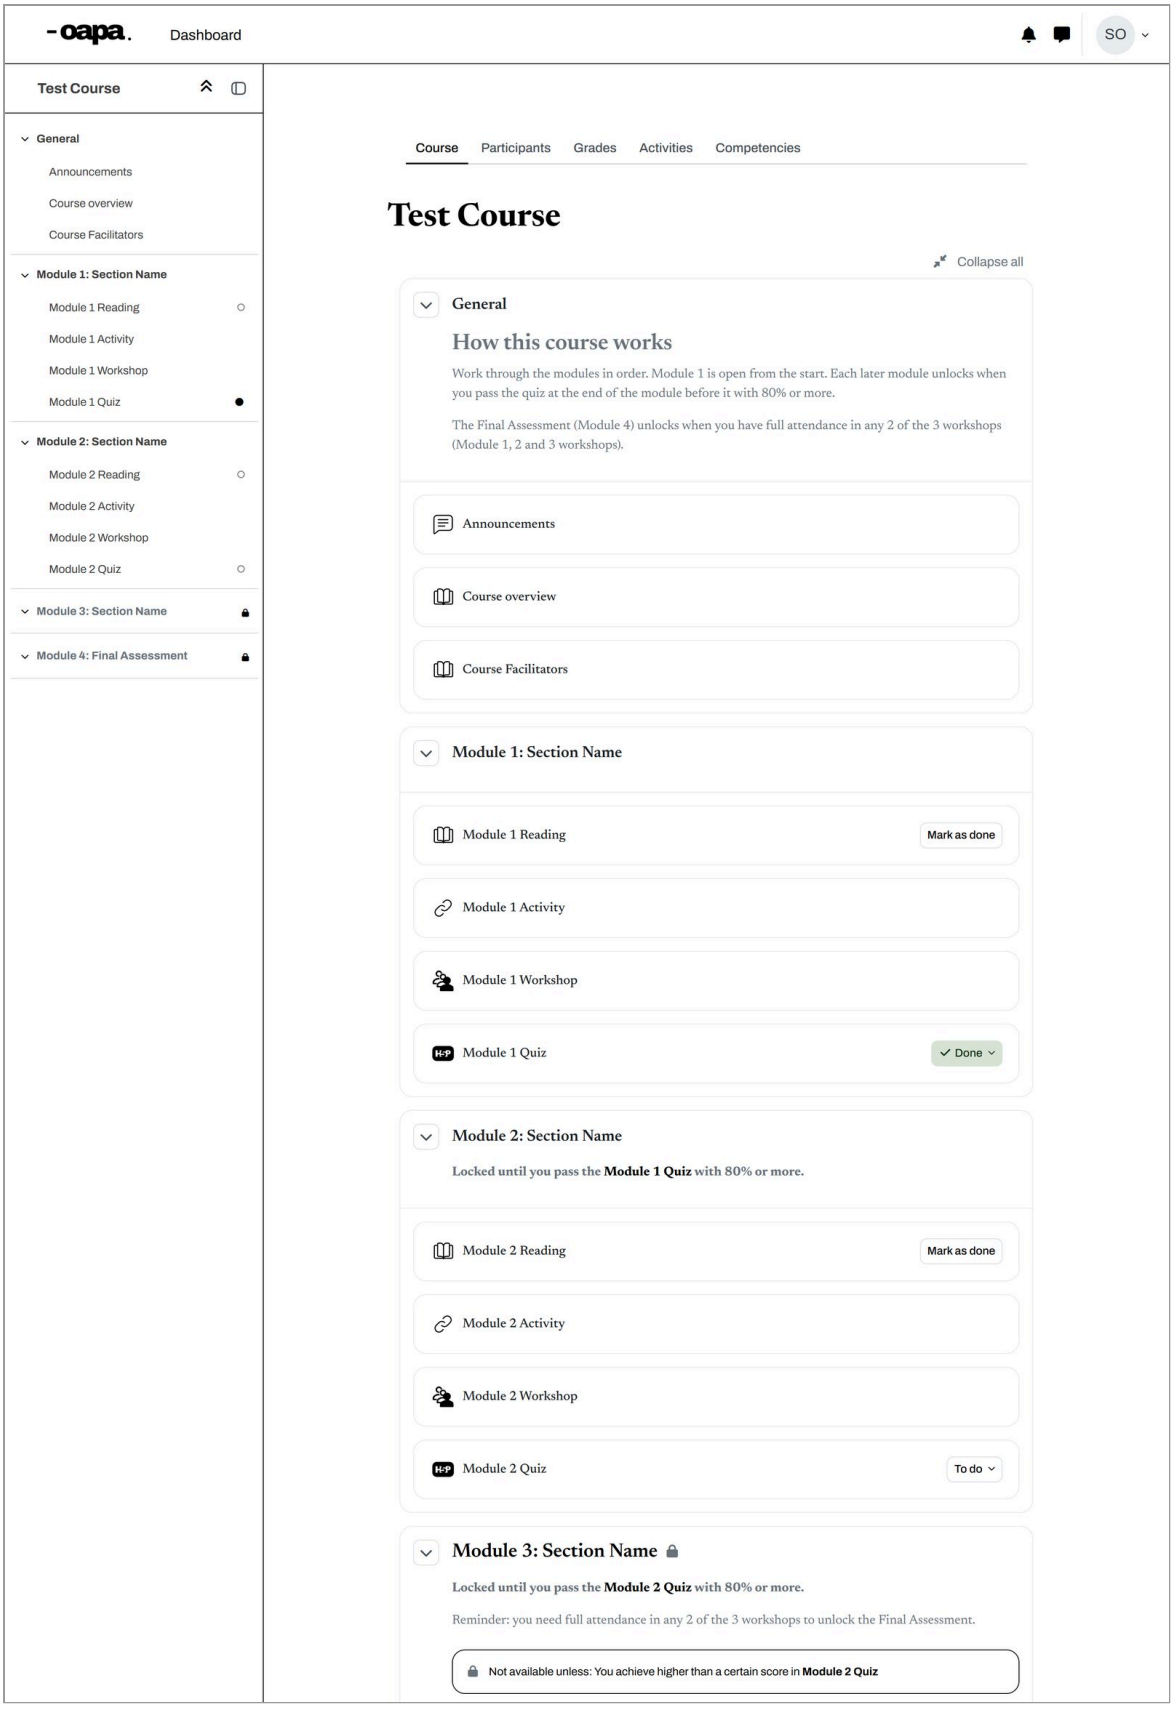

Figure 25. s1only's course page after the retest: Module 1 Quiz shows "Done" and Module 2 is open. Module 3 is still locked.

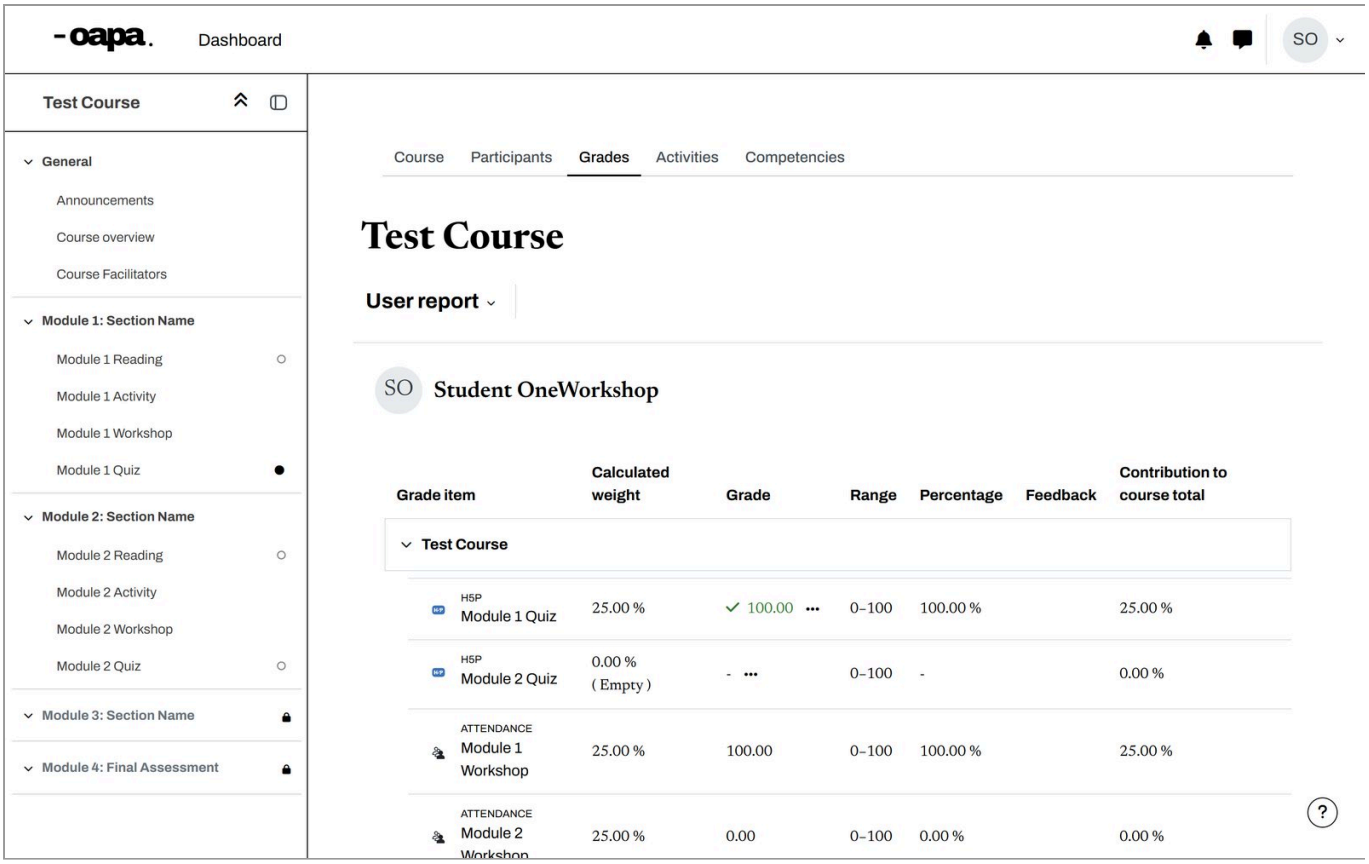

Figure 26. s1only's grade report after the retest: Module 1 Quiz is 100 with a green tick.

15. Staff reporting and Gradebook limits

What I tested: what staff can see about H5P results, and whether grades are held back until release.

Result: PARTIAL.

- Each H5P activity has an "Attempts report". It shows the date, score and number of attempts for each student (Figure 27).
- The Gradebook only keeps one grade per H5P activity. It does not show each question. To see each question, staff have to open the attempt in the H5P report.
- **A08:** marking workflow is off on the Final Assignment. So a student sees their grade as soon as it is saved, and grades are not held back until release (D3, owner Reshan).

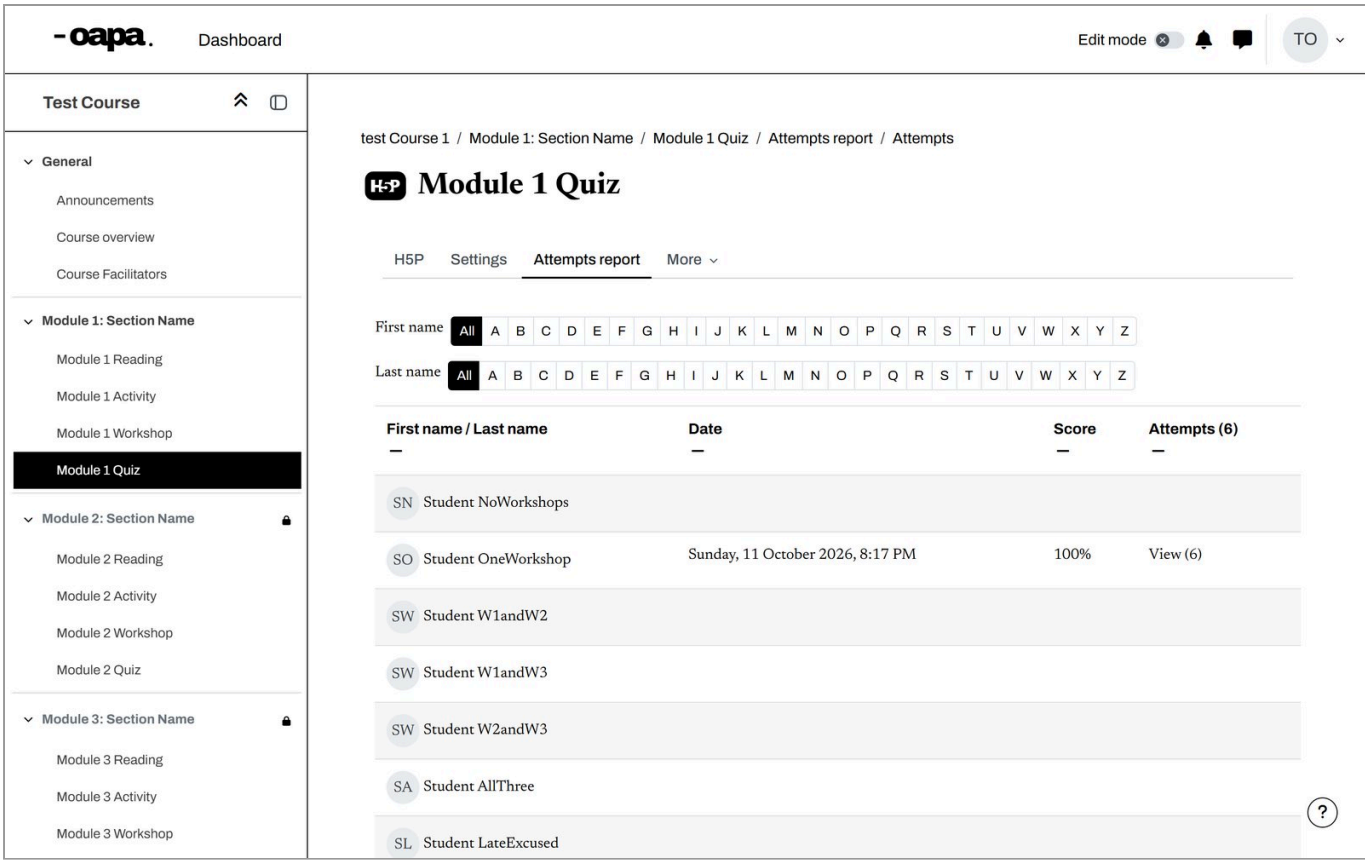

Figure 27. Teacher view of the Module 1 Quiz attempts report after the retest: s1only has 100% and "View (6)".

16. Moodle Quiz fallback

Result: PASS (tested in Sprint 2, still available).

The Moodle Quiz fallback was already tested in my Sprint 2 Task 60 report (section 3). That test used "Module Self-Check 1", built with six native question types: Multiple Choice, True/False, Matching, Numerical, Short Answer and Drag and Drop into text. On this build the Quiz activity is still turned on for the site, so the fallback is still there. If H5P grading fails on the live Academy, we can rebuild the module quizzes as Moodle quizzes with an 80% pass mark. The H5P retest passed, so I did not rebuild a quiz this week.

Test log (Q02)

For every test below, the build was local Docker Moodle 5.3.0 (Local-Moodle repo, restored test Course 1). I ran them on 11 Oct 2026. The site time zone is Melbourne. I am the tester unless it says otherwise.

ID	Criterion	Role / starting state	Expected	Actual	Evidence	Fixer / retester
T1	E01 none	Student, 0 workshops	Blocked	Blocked	Fig 2	- / Reshan
T2	E01 W1 only	Student, W1	Blocked	Blocked	Fig 3	- / Reshan
T3	E01 W1+W2	Student, W1 W2	Allowed	Allowed	Fig 5, 13	- / Reshan
T4	E01 W1+W3	Student, W1 W3	Allowed	Allowed	Fig 6	- / Reshan
T5	E01 W2+W3	Student, W2 W3	Allowed	Allowed	Fig 7	- / Reshan
T6	E01 all three	Student, W1 W2 W3	Allowed	Allowed	Fig 4, 15	- / Reshan
T7	E01 module not done + pair	Student, W1 W2, M1 to M3 not done	Blocked	Allowed	Fig 5, 13	Reshan / Zarin
T8	E01 W2 only, W3 only	Students s1w2 (W2 only) and s1w3 (W3 only), no quizzes done	Blocked	Blocked for both	Fig 8, 9	- / Reshan
T9	E01 verified + self-marked	-	Blocked	Cannot happen, because self-marking is off. Not run as a separate case.	Fig 12, DB	- / Reshan
T10	W05 duplicate W1 joins	Teacher, s1only with W1 only. W1 taken 2 more times.	Still one workshop, blocked	Still 1 record, W1 100%, blocked	Fig 10, DB	- / Reshan
T11	W03 Late / Excused	Student, W1 Late, W2 Excused, W3 Absent	Policy D-03	Blocked (50%)	Fig 11, 12	Riley to decide D-03
T12	W04 override	Teacher	Override exists and can be told apart	Exists, but looks the same	Fig 1	Reshan / Zarin
T13	A03 feedback then revision	Teacher, settings	Revision possible	Max 1 attempt, no revision	Fig 14, DB	Reshan / Zarin
T14	A07 late, no penalty	Student s3all after due date	Can submit, no penalty	"Add submission" shows, no penalty	Fig 15	- / Reshan
T15	A06 extension	Teacher, then s3all and s2w12	Extension only for the chosen student	s3all has 21 Oct, s2w12 has no extension	Fig 16, 17, 19	- / Reshan
T16	A08 grade release	Teacher, settings	Held until release	Workflow off, shown straight away	DB	Reshan / Zarin
T17	H5P grade and unlock	Student s1only, W1 only, no quiz done. Normal Chrome, through "Log in as".	Grade saved, M2 opens at 80%+	5/5, grade 100, complete and passed, M2 open	Fig 25, 26, 27, DB	- / Reshan
T18	A04, A05 real file upload	Student s3all, all workshops, after the soft date, with extension	File saved as the final submission	"Submitted for grading" with the PDF, not graded	Fig 18, 19	- / Reshan

ID	Criterion	Role / starting state	Expected	Actual	Evidence	Fixer / retester
T19	A06, A07 date boundaries	-	Right result just before, at and after each date	Not run before the deadline. Next action: I will run it after the submission.	-	Zarin / Reshan
T20	W05 second session in W1	-	Still one workshop	Not run before the deadline. Next action: I will run it after the submission.	-	Zarin / Reshan
T21	H5P on the live Academy	Student on the live OAPA Academy	Same result as T17	Not run. We do not have editing access yet (C1/C2).	-	Zarin, with access from Aryan

s2late (T11) is ready for a retest once Riley decides D-03. I ran T8, T10, T15 and T18 later on 11 Oct, at about 2:20 to 2:30 PM Tashkent time. T19 to T21 are still open.

T13 and T16 are based on the settings, so they need a real run once fixed. T7 is also based on the settings, but Figure 13 shows it happening.

Test matrix (9 students)

Student	W1	W2	W3	Full workshops	Expected (workshop part of E01)	Actual Module 4	Result
s0none	0	0	0	0	Blocked	Blocked	PASS
s1only	100	0	0	1	Blocked	Blocked	PASS
s2w12	100	100	0	2	Allowed	Allowed	PASS
s2w13	100	0	100	2	Allowed	Allowed	PASS
s2w23	0	100	100	2	Allowed	Allowed	PASS
s3all	100	100	100	3	Allowed	Allowed	PASS
s2late	50	50	0	0 (1 Late, 1 Excused)	D-03 not decided	Blocked	Flagged to Riley
s1w2	0	100	0	1	Blocked	Blocked	PASS
s1w3	0	0	100	1	Blocked	Blocked	PASS

Under the full E01 rule (all modules AND two workshops), s2w12, s2w13, s2w23 and s3all should be blocked right now, because none of them has finished Modules 1 to 3. See D1.

Defects

ID	Steps	Expected	Actual	Severity	Owner	Next action
D1	Log in as s2w12 (W1+W2, no quizzes done) and open Module 4	Blocked until M1 to M3 are done (E01)	Final Assignment opens while M2 and M3 are locked	High	Reshan	Reshan adds "Module 1, 2 and 3 Quiz complete" to the Module 4 rule. Then I retest T7.
D2	Open the Final Assignment settings, then Submission settings	Feedback, then revision, then final (A03)	"Until pass" with max 1 attempt, so no revision	High	Reshan	Reshan sets max attempts to 2 and reopen to Manually. Then I retest T13.

ID	Steps	Expected	Actual	Severity	Owner	Next action
D3	Open the Final Assignment settings, then Grade	Grades held until release (A08)	Marking workflow is off, so grades show when saved	Medium	Reshan	Reshan turns on marking workflow. Then I retest T16.
D4	As the teacher, set a status in a workshop session	Override is possible and can be told apart (W04)	Override looks the same as real attendance	Medium	Reshan, Riley to confirm	Riley decides how an override is marked. Reshan sets it up.
D5	As s1only, do the Module 1 Quiz and click Finish	Attempt and grade saved, Module 2 opens	CLOSED. It works in a normal browser. It only failed in the test script's browser, where the H5P frame did not fully load.	Closed	Zarin	None. Closed.
D6	Open any workshop session	A real date, time and length	Sat 10 Oct 2026, 12 AM, 0 minutes long	Low	Reshan	Reshan sets a real workshop time and length.
D7	As s2w12, open Module 4. As s1only, open Module 2 after passing the quiz.	The text fits the student	"Locked until..." still shows after the section is open	Low	Zarin	I change the summary text so it does not say "Locked" once open.
D8	Open the course page	Real module names	Modules 1 to 3 are still called "Section Name"	Low	Content owner	Content owner adds the real module names.
D9	Look at the header logo	Brand Book minimum is 220 px	104 px, to match the mock-up	Low	Walaa to decide	Walaa confirms 104 px or 220 px.
D10	Open any H5P quiz	Black and white buttons	H5P's own blue Check button (inside its frame)	Low (known limit)	Zarin	None. Known limit, kept as is.
