

Task 59: Final Sprint 2 Quality and Regression Test Report

Shaikh Zarin Tasnim (Dev 2), Team 74, OAPA Editor Academy Moodle Platform

1. What This Task Was About

This task asked me to independently verify the final Sprint 2 build on "Team 74 - Course Development" after Reshan (Dev 1) applied his Task 57 fixes. That means re-testing his fixes myself rather than taking his write-up at face value, walking the course end to end as a learner, checking Teacher-side configuration and reporting, and recording any regressions, separating genuine defects from things that are only untestable given my current access.

Reshan's Task 57 document ("Fix structural, progression and others according to UX review") lists six fixes applied against Walaa's UX review: renaming the Teaching Team tab to Course Facilitators, standardising every module to a Content, Activity, Workshop, Quiz structure, unlocking Module 1 by default, gating Module 2 behind an 80% or higher score on Module 1's Knowledge Check, gating Module 3 the same way behind Module 2's Knowledge Check, and gating the renamed Module 4 (Assessment) behind at least two of the three workshops being complete. His document had before and after screenshots for every fix except the last one, which had no evidence attached, so that one got the closest attention below.

2. Dev 1's Task 57 Fixes, Independently Re-tested

#	Test Case	Result	Notes
1	Teaching Team tab renamed to Course Facilitators	Confirmed	Tab shows correctly (Fig. 1).
2	Every module standardised to Content, Activity, Workshop, Quiz	Confirmed	New Activity item (a Padlet embed) now sits in Modules 1 to 3, consistent with the fix. Still placeholder content, which is expected at this stage.
3	Module 1 unlocked by default	Confirmed	Landed on Module 1 Reading directly in Student view with no restriction shown (Fig. 2).
4	Module 2 gated behind 80% or higher on Module 1's Knowledge Check	Untestable with current access	The Knowledge Check grades by highest attempt ever, not the latest attempt. I retook it and deliberately scored 25%, then 50%, but Module 2 stayed unlocked because my historical highest score (100%) is what the restriction actually reads (Fig. 3). The restriction itself may well be configured correctly, but this account's history makes it impossible to

#	Test Case	Result	Notes
			prove the locked state. Needs a genuinely fresh Student account with no prior attempts to test properly.
5	Module 3 gated behind 80% or higher on Module 2's Knowledge Check	Untestable with current access	Same limitation as row 4, same account history.
6	Module 4 (Assessment) gated behind at least two of three workshops complete	Confirmed	This had no evidence in Reshan's own document, so I tested it properly: one workshop done kept the Assignment locked (Fig. 4), two workshops done unlocked it (Fig. 5). Correctly implemented as a genuine two of three rule, not just one workshop being enough.

The screenshot displays the 'Course Facilitators' interface within the OAPA Academy. The browser address bar indicates the URL: `academy.open-publishing.org/mod/book/edit.php?cmid=109`. The page header shows 'OAPA Academy Dashboard' and 'Edit mode' toggle. The left sidebar lists the course structure under 'Team 74 - Course Dev...', including 'General', 'Module 1: Section Name', 'Module 2: Section name', and 'Module 3: Section name'. The 'Course Facilitators' tab is active. The main content area shows the breadcrumb 'TEAM74-DEV / General / Course Facilitators' and the 'Course Facilitators' title. Below the title are tabs for 'Book', 'Settings', 'Import chapter', and 'More'. The 'Add new chapter' section includes a 'Chapter title' input field, a 'Subchapter' checkbox (disabled with the note '(Only available once the first chapter has been created)'), and a 'Content' field with a rich text editor toolbar. A 'Collapse all' link is located on the right side of the content area.

Fig. 1. The Course Facilitators tab, correctly renamed.

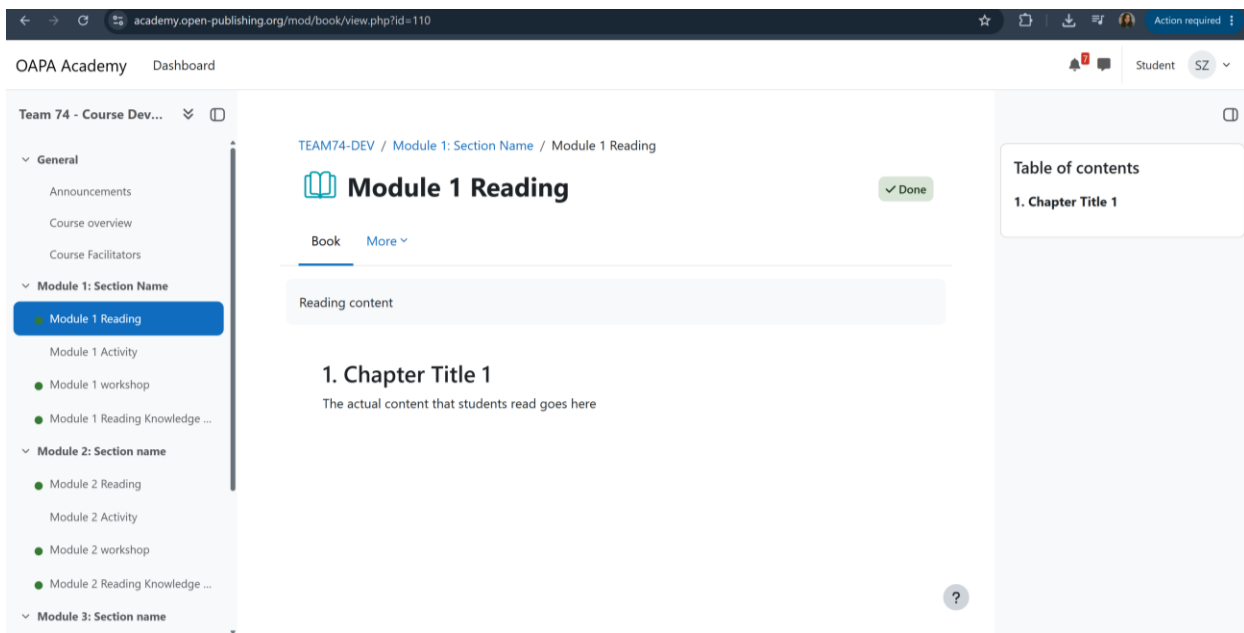

Fig. 2. Module 1 Reading open directly in Student view, no restriction shown on landing.

SZ My attempts

Highest score attempt

#	Date	Score	Max score	Duration	Completion	Success	Report
4	3 October 2026, 10:10 PM	4	4	5 seconds	☒	☒	View report

All user attempts

#	Date	Score	Max score	Duration	Completion	Success	Report
1	20 September 2026, 11:50 AM	4	4	17 seconds	☒	☒	View report
2	3 October 2026, 10:07 PM	0	4	3 minutes 4 seconds	☒	☐	View report
3	3 October 2026, 10:09 PM	4	4	5 minutes 16 seconds	☒	☒	View report
4	3 October 2026, 10:10 PM	4	4	5 seconds	☒	☒	View report
5	3 October 2026, 10:24 PM	1	4	3 seconds	☒	☐	View report
6	3 October 2026, 10:32 PM	1	4	5 seconds	☒	☐	View report
7	3 October 2026, 11:16 PM	2	4	11 seconds	☒	☐	View report

Fig. 3. My attempt history on Module 1's Knowledge Check. Attempt 4 scored 100%, later attempts (5, 6, 7) scored 25%, 25% and 50%. The course still reads my highest attempt, so Module 2 never re-locked despite the later low scores.

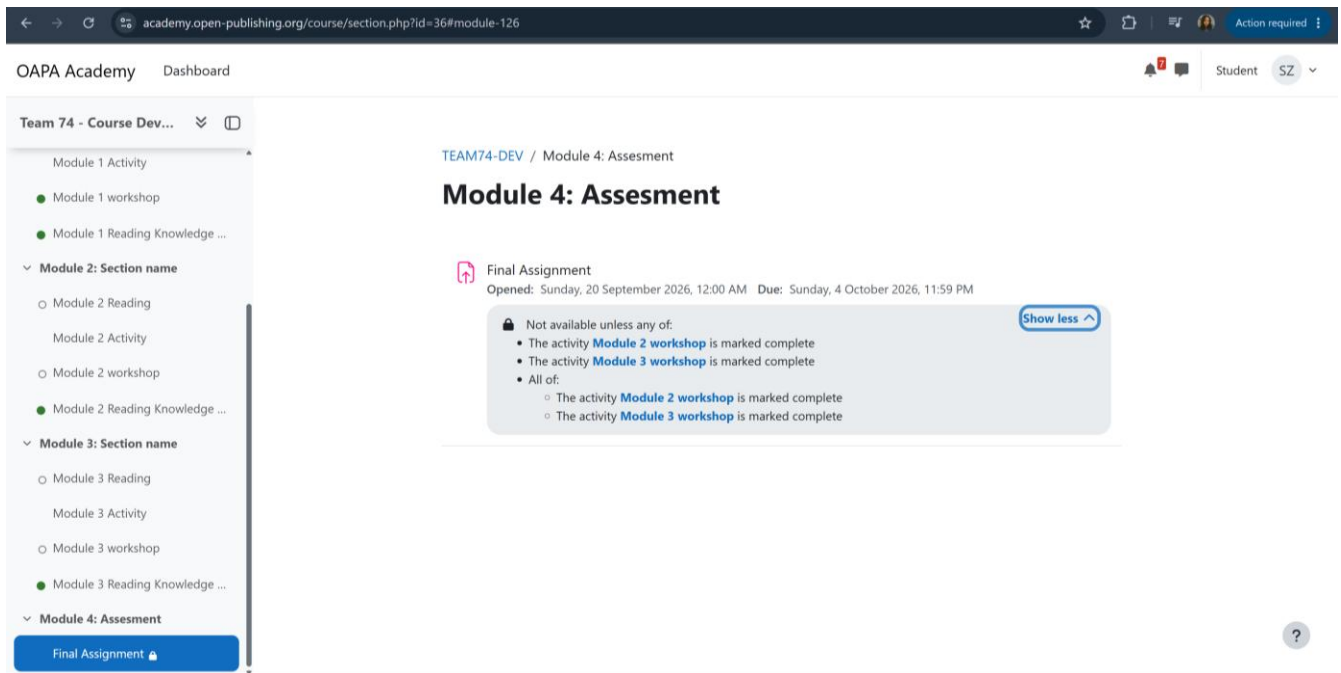

Fig. 4. With Module 1 workshop marked done and Modules 2 and 3 not done (one of three), the Final Assignment stays locked. The restriction text updates to show the two remaining workshop combinations that would still satisfy it.

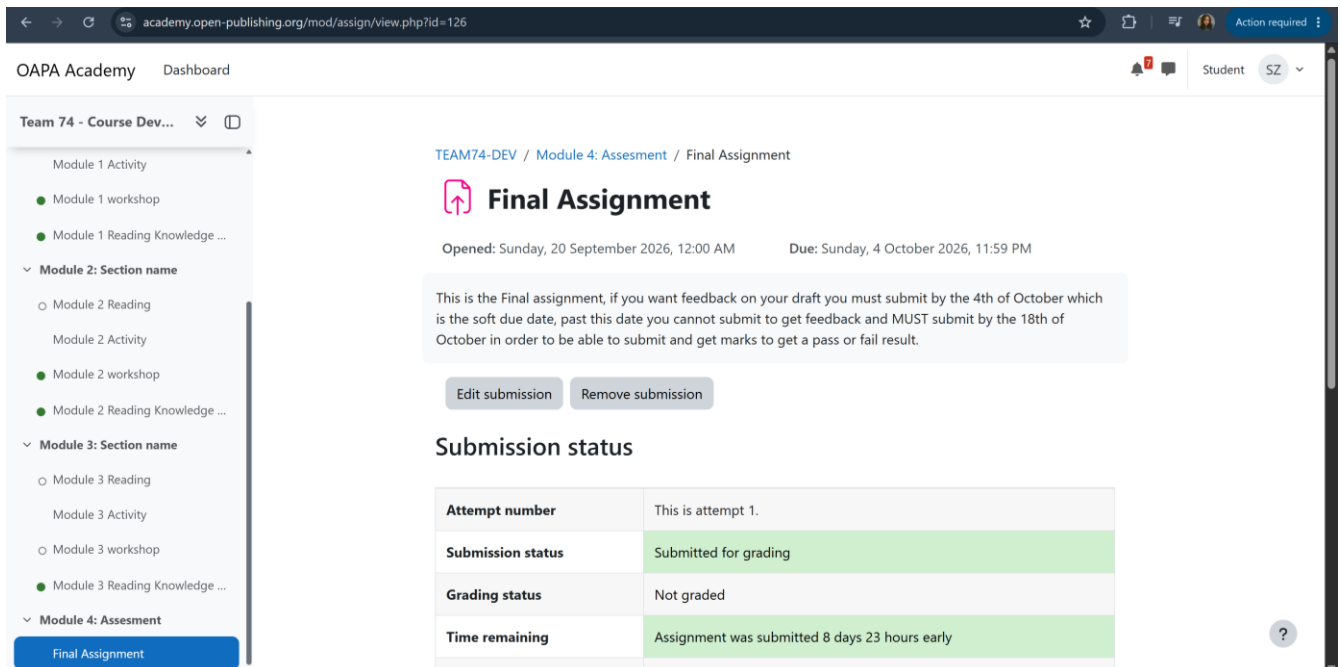

Fig. 5. With Module 1 and Module 2 workshops both marked done (two of three), the Final Assignment unlocks and my earlier test submission is visible again.

3. Student-View End-to-End Flow

I walked through the full course as a learner, Reading, Activity, Workshop and Knowledge Check for all three modules, then the Final Assignment. Nothing broken or confusing came up. Navigation, signposting and the progress indicators in the sidebar and course home all behaved as expected.

4. Teacher-View and Configuration Behaviour

Two things worth flagging here, both staff-side reporting gaps rather than anything affecting what a learner experiences:

- The course Grader report is still stuck on "Recalculating grades," with the same "Activity deletion in progress" warning documented back in Task 49. This is a pre-existing, Site Administrator dependent issue (Fig. 6), not something introduced by this round of testing or by Reshan's fixes.
- New this round: the Teacher-side Attempts report for the Module 1 Knowledge Check shows "No participants to display" (Fig. 7), even though this same account has a genuine Student enrolment with real recorded attempts, visible to the account itself in Student view. I didn't track down whether this is a filter setting or an actual reporting defect, since I'm not the one who configured this report. Flagging it for Reshan to check, since he'll know fastest whether it's a filter or a real gap.

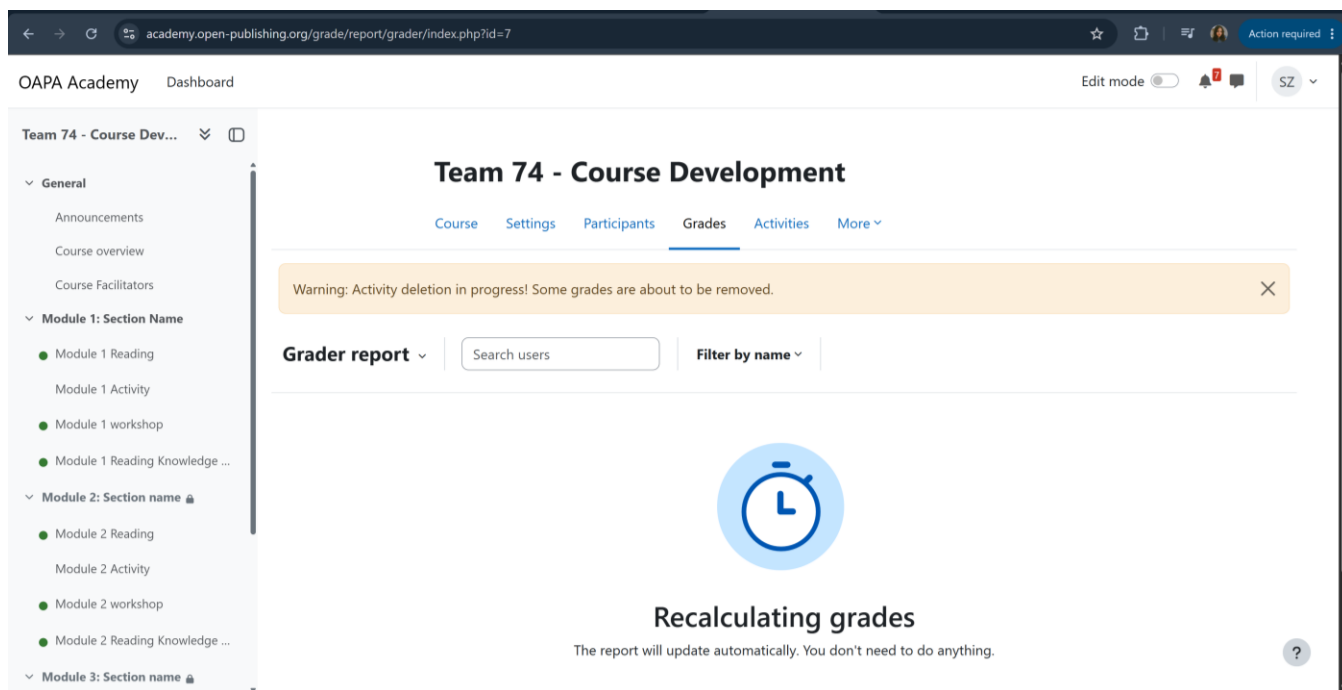

Fig. 6. Grader report stuck on Recalculating grades, same issue as previously reported in Task 49.

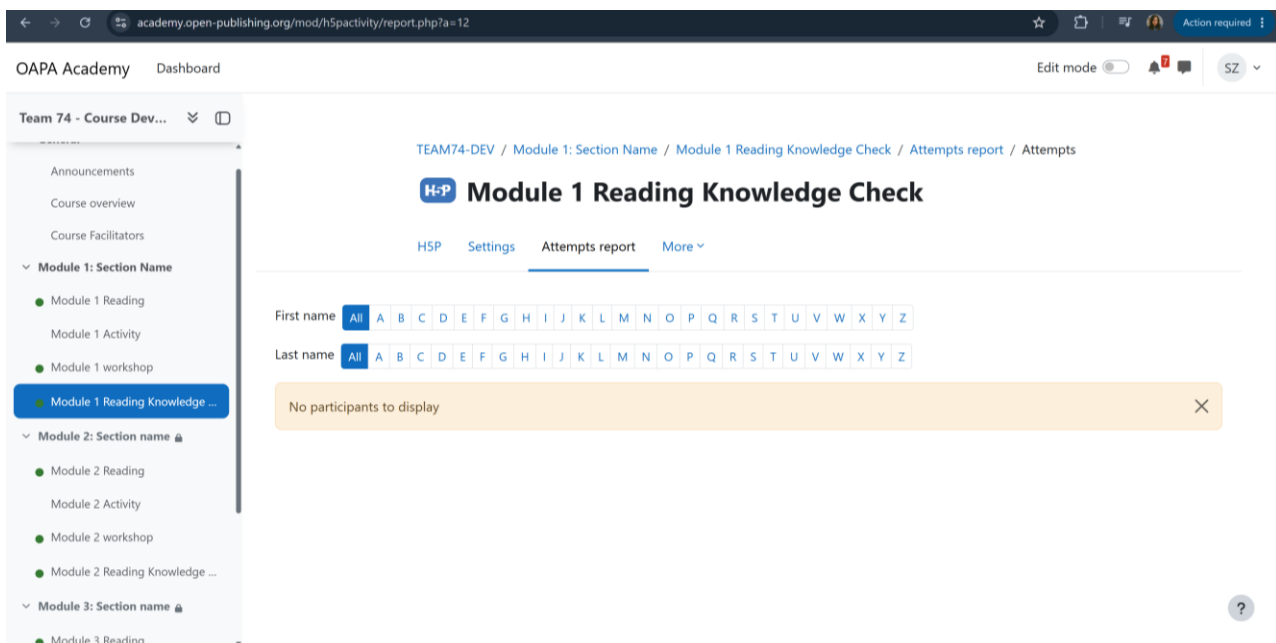

Fig. 7. Teacher-side Attempts report for Module 1's Knowledge Check showing no participants, despite this account having real recorded attempts.

5. Items Not Testable This Session

A few checklist items couldn't be properly exercised given what's available to me right now. I'm recording these as open rather than guessing at a result:

- Browser compatibility: only tested in the one browser available to me this session. Not checked against any other browser.
- Responsive and device behaviour: no other device sizes available to test against this session.
- Accessibility findings reviewed against implementation: this needs Walaa's accessibility findings document to compare against, which I don't have on hand. Pending that document.

6. Issues, Re-tests and What's Still Outstanding

#	Test Case	Result	Notes
1	Module 2 and Module 3 grade-based gates can't be proven to lock, only to unlock	Open	Caused by the Knowledge Check's highest-attempt grading method, not necessarily a fault in the restriction itself. Needs a fresh Student account with no prior attempts to test properly.
2	Teacher-side Attempts report shows no participants for a genuinely enrolled Student with real attempts	Open	Raised for Reshan to check, since the cause (filter setting versus actual defect) isn't something I could determine from this account.

#	Test Case	Result	Notes
3	Course Grader report stuck on Recalculating grades	Blocked	Needs Site Administrator access. Previously reported in Task 49, still unresolved.
4	Browser compatibility, responsive and device behaviour, accessibility findings review	Deferred	Not testable with what's available to me this session. Browser and device checks need access to more environments, and the accessibility check needs Walaa's findings document.

7. Summary

Of Reshan's six Task 57 fixes, four are independently confirmed working, including the two of three workshop gate on the Final Assignment, which had no evidence in his own document and turned out to be correctly built. The two grade-based module gates couldn't be proven to lock under test, not because they're necessarily broken, but because this account's own high-score history on both Knowledge Checks makes the locked state untestable without a fresh account. The student-side journey is clean end to end. On the Teacher side, the previously known stuck Gradebook is still unresolved, and a new reporting gap turned up on the Knowledge Check attempts view that needs Reshan to check. Browser, device and accessibility checks are deferred, since none of those are things I can properly test with what's available to me right now.
