

Card Task 18 - Independently test Zarin's interactivity and learner-tracking proof of concept: 90

Tested by: Reshan Lahandapura (Dev 1)

Date: 6/09/2026

Site: <https://localtestsite.moodlecloud.com/> (the deployed test site while we actually get access on oapa to edit courses)

Browser: Chrome

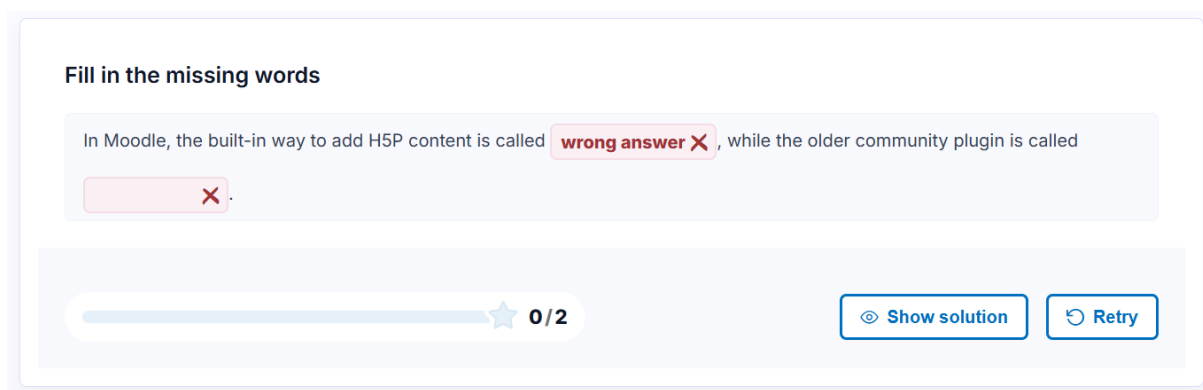

Tests

Test case 1: The fill in the blanks question testing

Test Case 1.1: Testing to check if fill in the blanks question works in a wrong answer selection

Expected: Upon leaving areas blank or entering wrong answers, full marks shouldn't be awarded and only partial marks should be given if any were right, for this test I will test with both an empty and an incorrect answer and it should give me 1/2

Actual result:

Fill in the missing words

In Moodle, the built-in way to add H5P content is called wrong answer X, while the older community plugin is called

X

0/2

Show solution Retry

Upon entering an incorrect answer and leaving one blank indeed it gave us 0/2 as expected with it indicating that our choices were wrong. test passed

Test Case 1.2: Testing to check if fill in the blanks question works in a correct answer selection

Expected: Upon entering both options correctly we should be awarded full marks (2/2)

Actual result

Fill in the missing words

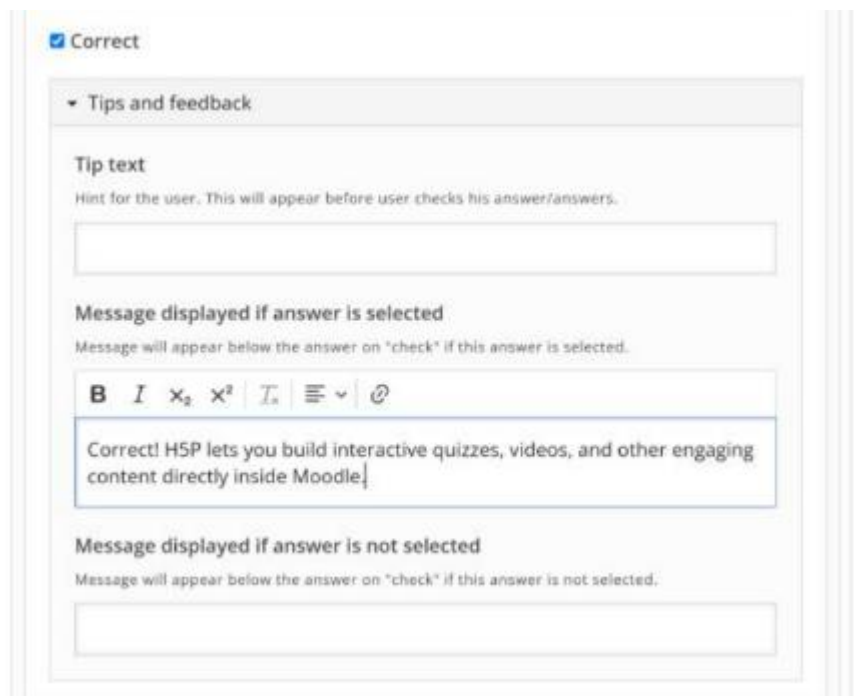

In Moodle, the built-in way to add H5P content is called , while the older community plugin is called .

2/2

Indeed we did get given 2/2 full marks for filling it in correctly, even though a capital is not required it still didnt give me a wrong indicator that it didnt work meaning as long as we have the correct answer it will succesfully pass regardless. test passed

Test case 2: Testing the configuration messages

Test case 2.1: Testing for configured feedback on answers (one example as there is many many set)

☒ Correct

▼ Tips and feedback

Tip text
Hint for the user. This will appear before user checks his answer/answers.

Message displayed if answer is selected
Message will appear below the answer on "check" if this answer is selected.

B I x₂ x² T_a ≡ ∑ @

Correct! H5P lets you build interactive quizzes, videos, and other engaging content directly inside Moodle.

Message displayed if answer is not selected
Message will appear below the answer on "check" if this answer is not selected.

Expected: when submitting any option, feedback should be given based on if it was correct or not, for the question " What is H5P used for in Moodle?" If it was answered

correctly it should display the message "Correct! H5P lets you build interactive quizzes, videos, and other engaging content directly inside Moodle."

Actual Result:

Upon choosing the correct answer, I was given the feedback "Correct! H5P lets you build interactive quizzes, videos, and other engaging content directly inside Moodle." which reflects the expected message given in expected output . test passed

Test case 3: testing the Multiple Choice questions

Testing case 3.1: checking if choosing correct answer gives us the right output

Correct answer expected result and marks the chosen answer as green with a score give as 1/1

Actual result:

The result does infact highlight the answer as green and gives full marks for the question . test passed

Testing case 3.2: checking if choosing an incorrect answer gives us the expected output

Correct answer expected result and marks the chosen answer as red with a score that isn't full marks

Actual result:

What is H5P used for in Moodle?

Creating interactive content like quizzes and videos

✗ Managing student enrolments

Not quite, managing enrolments is handled through Moodle's Participants settings, not H5P. H5P is specifically for interactive learning content.

Sending automated emails to students

Grading assignments automatically

You're just getting started, go back and review the material, then give it another try!

 **0/1**

[Show solution](#) [Retry](#)

The result does in fact highlight the answer as red and doesn't give full marks which reflects the expected results outcomes. test passed

Test case 4: testing the Multiple Choice question Feedback message

Test Case 4.1) Testing to check for the configured feedback for a 1/1 mark score

Expected: Perfect score! You've completely mastered this material!

Actual:

What is H5P used for in Moodle?

☐ Sending automated emails to students

☐ Managing student enrolments

✓ ☒ Creating interactive content like quizzes and videos

☐ Grading assignments automatically

Perfect score! You've completely mastered this material!

 **1/1**

The message does reflect the configured score. test passed

Test Case 4.2) Testing to check for the configured feedback for a 0/1 mark score

Expected: You're just getting started, go back and review the material, then give it another try!

Actual result:

What is H5P used for in Moodle?

Managing student enrolments

Creating interactive content like quizzes and videos

✗ Grading assignments automatically

Close, but that's Moodle's Assignment or Quiz grading system. H5P focuses on interactive content, not grading workflows.

Sending automated emails to students

You're just getting started, go back and review the material, then give it another try!

0/1

Show solution Retry

Indeed as it was set, when I did 0/1 it gave me the message I expected. test passed

Test case 5: testing the Drag and Drop incorrect/correct answer outputs

Test Case 5.1) Testing to for correct output on an incorrect choices

Expected: when leaving boxes empty or dragging incorrect choices to them, we should be awarded 0 marks or partial marks as we didnt get all right, for this one i am testing with both an empty and incorrect box

Actual output:

Drag the words into the correct boxes

H5P content is created and organized through Moodle's **Question Set ✗**, and the specific tool **Content Bank** used to build quizzes with multiple question types is called the .

0/2

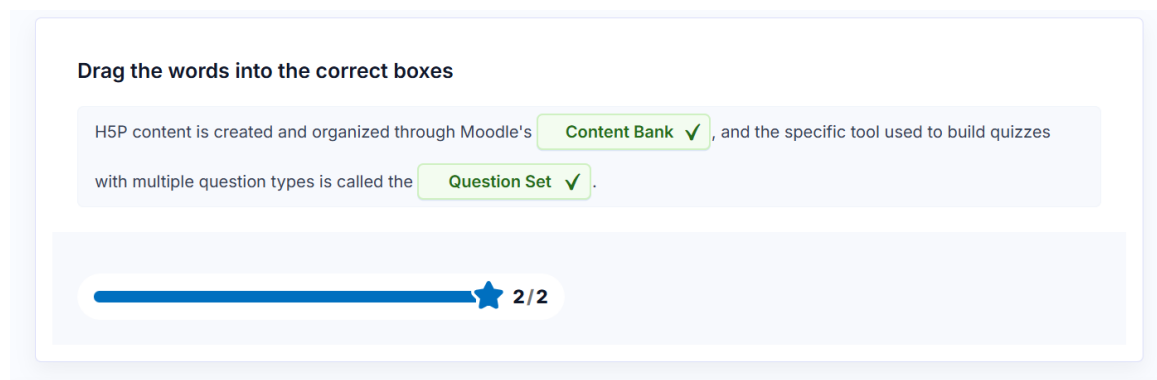

Show solution Retry

Upon putting an incorrect box and an empty box we got awarded 0/2 marks, this reflects what was meant to happen in the expected output. test passed

Test Case 5.2) Testing to for correct output on an correct choices

Expected output: upon choosing BOTH correct options we should be given full 2/2 marks

Actual result:

Drag the words into the correct boxes

H5P content is created and organized through Moodle's **Content Bank ✓**, and the specific tool used to build quizzes with multiple question types is called the **Question Set ✓**.

Progress bar: 2/2

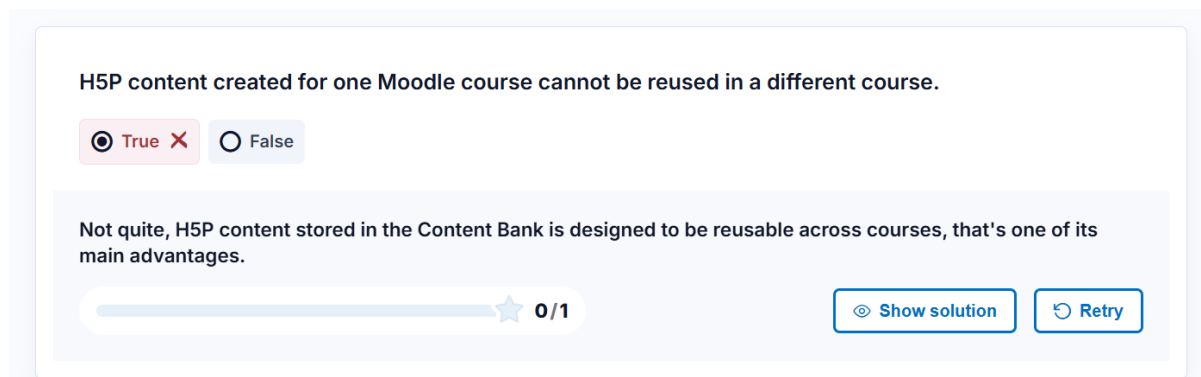

We were indeed given 2/2 marks as reflected on the expected output, test passed

Test case 6: testing the true or false incorrect/correct answer outputs

Test Case 6.1) Testing to for correct output on an incorrect choices

Expected: when choosing the incorrect option, no marks should be awarded

Actual result:

H5P content created for one Moodle course cannot be reused in a different course.

☒ True ✗ ☐ False

Not quite, H5P content stored in the Content Bank is designed to be reusable across courses, that's one of its main advantages.

Progress bar: 0/1

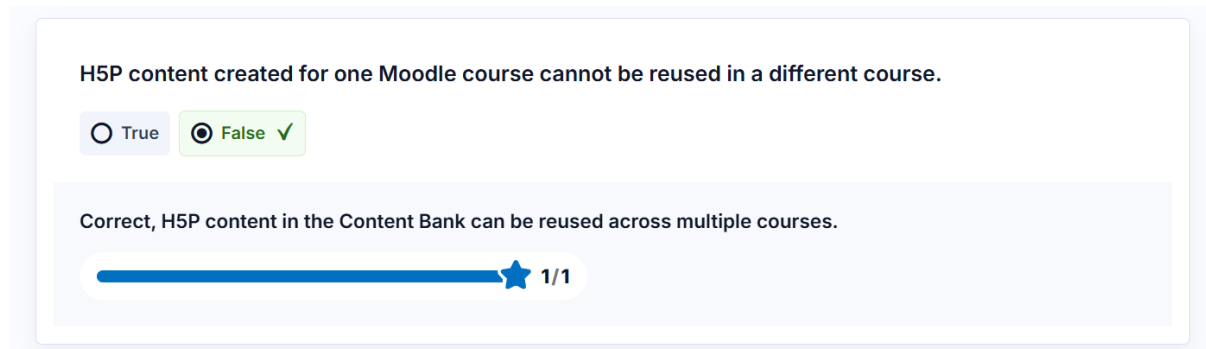

Buttons: Show solution, Retry

No marks were awarded as reflected on expected outcome, test passed once again

Test Case 6.2) Testing to for correct output on a correct choice

Expected: when choosing the correct option, marks should be awarded

Actual result:

A screenshot of a Moodle quiz question. The question text is "H5P content created for one Moodle course cannot be reused in a different course." Below the question, there are two radio button options: "True" and "False". The "False" option is selected, indicated by a filled circle and a green checkmark. Below the options, a feedback message states: "Correct, H5P content in the Content Bank can be reused across multiple courses." At the bottom of the question box, there is a progress bar that is fully filled with a blue line, followed by a star icon and the text "1/1".

H5P content created for one Moodle course cannot be reused in a different course.

☐ True ☒ False ✓

Correct, H5P content in the Content Bank can be reused across multiple courses.

1/1

marks were awarded as reflected on expected outcome, test passed once again successfully

Test case 7: testing the Completion Tracking

Test case 7.1: Testing for completion tracking via quiz completion

Expected: Upon completing the quiz and receiving a grade, the activity should be marked as done which in this case means the activity was actually completed

Actual Result:

H5P Module Self-Check Template

✓ Done

H5P Attempts report

Completion requirements:✓ **Done:** Receive a grade**What is H5P used for in Moodle?**

- ☐ Managing student enrolments
- ☐ Sending automated emails to students
- ☒ Creating interactive content like quizzes and videos

After finishing the quiz and receiving a grade, the activity is officially checked as done, reflecting the expected outcome

Test case 8: verifying that the quiz participation is tracked

Test case 8.1: Testing to check if each students attempts are counted and logged

Expected: When a student tries the quiz or anyone fo that matter, that participation should be logged with a history displayed

Actual result:

My attempts**Highest score attempt**

#	Date	Score	Max score	Duration	Completion	Success	Report
3	6 September 2026, 1:57 PM	9	9	8 minutes 35 seconds			View report

All user attempts

#	Date	Score	Max score	Duration	Completion	Success	Report
1	5 September 2026, 8:59 PM	1	1	20 seconds			View report
2	5 September 2026, 11:05 PM	9	9	18 minutes 20 seconds			View report
3	6 September 2026, 1:57 PM	9	9	8 minutes 35 seconds			View report
4	6 September 2026, 2:02 PM	8	9	13 minutes			View report
